1.4.4. Routing robustness and self-organization
in vehicular networks ........................................ 23
1.4.5. Vehicular network security ............................. 23
1.5. Bibliography ............................................. 23

CHAPTER 2. ROUTING FOR VEHICULAR AD HOC NETWORKS. ............................................. 29
2.1. Basic concepts ........................................... 29
  2.1.1. Single-hop versus multi-hop beaconing
        in VANETs ........................................... 29
  2.1.2. Routing classification of VANETs. ..................... 31
2.2. Quality-of-service of VANET routing ..................... 35
  2.2.1. Quality-of-service definition ......................... 35
  2.2.2. Quality-of-service criteria ......................... 36
2.3. VANET routing standards ................................ 37
  2.3.1. Dedicated short range communication .................. 38
  2.3.2. Standards for wireless access in vehicular
        environments (WAVE) .................................. 40
  2.3.3. VANET standards related to routing layers .............. 42
  2.3.4. Other VANET routing standards ....................... 44
2.4. VANET routing challenges and issues ................... 45
  2.4.1. Dynamics nature of VANETs
         (mobility pattern and vehicles’ velocity) .............. 45
  2.4.2. Vehicular network density and scalability ............ 46
  2.4.3. Safety improvement and quality-of-service .......... 46
2.5. Bibliography ............................................. 47

CHAPTER 3. CONVENTIONAL ROUTING PROTOCOLS FOR VANETS ............................................. 51
3.1. Topology-based routing .................................. 51
  3.1.1. Reactive routing protocols ......................... 52
  3.1.2. Proactive routing protocols ......................... 55
  3.1.3. Hybrid routing protocols ......................... 57
  3.1.4. Critics of topology-based routing .................... 58
3.2. Geography-based routing ................................ 59
  3.2.1. Geography-based routing principle .................... 59
  3.2.2. Geography-based routing protocols .................... 59
  3.2.3. Critics of geography-based routing .................... 67
3.3. Cluster-based routing ................................... 68
  3.3.1. Cluster-based routing principle ...................... 68
### Chapter 4. Bio-inspired Routing Protocols for VANETs

4.1. Motivations for using bio-inspired approaches in VANET routing
   - Network scalability: 80
   - Computational complexity: 80
   - Self-organization and adaptability: 81
   - Routing robustness: 81

4.2. Fundamental concepts and operations of bio-inspired VANET routing
   - Optimization problem definition: 82
   - Search space (SSp): 83
   - Objective function: 83
   - Population: 84
   - Individual encoding: 84
   - Initialization: 84
   - Stopping criterion: 85

4.3. Basic bio-inspired algorithms used in VANET routing literature
   - Genetic algorithm: 86
   - Ant colony optimization: 89
   - Particle swarm optimization: 90
   - Bees life algorithm: 92
   - Bacterial foraging optimization: 93

4.4. Evolutionary algorithms for VANET routing
   - Sequential genetic algorithms for VANET routing: 95
   - Parallel genetic algorithms for VANET routing: 100

4.5. Swarm intelligence for VANET routing
   - Ant colony optimization for VANET routing: 102
   - Particle swarm optimization for VANET routing: 106
   - Bee colony optimization for VANET routing: 108
   - Bacterial foraging optimization for VANET routing: 110

4.6. Another bio-inspired approach for VANET routing: 112

4.7. Bibliography: 113

### Conclusion

- 121

### Index

- 125
