Index

A
A. rhizogenes 161
A. tumefaciens 161
Abbreviations 964
for units of measurement 860
Açaí 80
acidity 821
Acronyms 959
AFLP see amplified fragment length polymorphism 42
Africa hullers 690
African Mole Cricket 426
Agroforestry 227
alaclor, for pre-emergent weed prevention 102
Albizias, used for shade 219
Aldrin
for termite nest destruction 427
in Mealybug Root Disease control 510
Allogamic species 92
Amelopsis spp., used for shade 219
Altitude, effect on coffee quality 802
Aluminum, as fertilizer 259
Amaro de Botucatu 78
Amber bean (F 4) 769
American Leaf Disease 66
American Leaf Spot 525
causal organism 525
control 526
propagation 526
symptoms 525
American Leaf Spot Disease, effects of shading on 412
anaerobic ponds, residual water treatment 734
analytical convection ovens 823
analytical techniques, moisture determination by 822
androgenesis 150–151
animal feed, from coffee byproducts 737
annual gross profit (AGP) 832
Ant Bears 427
Antestia Bugs 433
Antestia Sting Bug, influence on coffee quality 805
Anther 11
Ants, coffee pests 457
Aphids, coffee pests in Africa 428
Apolo huller 689
Aquadulpa 648
Aquadulpa ELMUS 732
Arabica 799
Arabica bean, immature 793
Arabica black bean 795
Arabica “Cardenillo” bean 794
Arabica natural 791
Arabica washed 791
fair quality beans 792
Arabusta 65
Arachis pintoi
as artificial cover crop 209
ground cover plants 275
Aroma 821
Artocarpus integrifolia, used as wind breaks 223
Arusha 78
Atmospheric humidity (RH) 170
Axial root 7
B
Bacillus, with beneficial effect on coffee roots 384
Bacillus thuringiensis, Berry Moth control 451
Bacteria
in coffee storage 749
which attack coffee beans 795
Bacterial Blight 66
Bacterial Blight see Elgon die-back 545
Bacterial diseases 545
Bagging 711
bags
for coffee storage 752
for green coffee shipment 759
Banrot, used in plant damaging agents control 98
bare root plants 235
bare root stumps 236
basamid
  in root rot control 509
  used in cryptogamic diseases 505
  used in plant damaging agents control 98
bean 744
  abnormalities in 20
  defects or imperfections 751
  depulping 93
  deterioration process of stored 743
  determination of defective 819
  modification through processing 611
  moisture content 744
  physiology 742
  size 23
  size and shape of 797
  sizing 901
  viability 744
  weight of coffee 934
bean defects 768
bean fragment (P 10) 782
bean heavily damaged (F 2) 768
bean heavily damaged by storage pests (S 7) 788
bean in parchment (P 6) 780
bean infested by storage pests (S 8) 78
bean quality assessment 818
bean size 818
  effect of shading on 415
bean size distribution 819
bean slightly damaged (F 1) 768
bean slightly damaged by storage pests (S 6) 787
Beauveria bassiana, Berry Borer control 473
Bee Hawk Moth 456
belt loaders 712
bench terraces 206
Benlate 527
Benomyl
  anti-fungal solution 131
  for Seedling Blight control 506
Bergendal 78
Berry-boring Lepidoptera, coffee pests in Africa 450
big bags, in coffee storage 754
biodigestors, anaerobic 734
biodiversity 401
biolistics 161
biological nitrogen fixation (BNF) 379
biotechnology
  applications to coffee 146
  methods and their application to coffee 164
  plant 141
bird-friendly 401
black bean (FP 1) 774
Black Borer, coffee pest 439
Black Citrus Aphid 428
Blawan Pasumah 78
blending 709
  feeding systems 709
  mixing systems 709
  techniques and equipment 709
Blight Spot 527
blossom showers 320
blotchy bean (spotted, mottled) (PS 3) 784
blotchy beans 810
BLP 78
Blue Mountain 78, 799
BNF see biological nitrogen fixation 379
BOD see biochemical oxygen demand 737
body 821
body of elephant bean, core, ear (F 10) 772
Bogor Prada 64
Bordeaux Mixture 514
American Leaf Spot control 526
boron, as fertilizer 260
boron deficiency 271
Bourbon 799
Bourbon Mayaguez 78
Bourbon Pointu 44
Bourbon types 42
  some resistance to CBD 42
Bourbon-type varieties 78
Brazil 823
break-even point, calculated according to drops in the price offered 837
Break-even point (BEP) 832
breeding 61
  for resistance 566
  scheme for improvement of C. arabica 69
breeding methods 68
breeding techniques 61, 68
Brocarial 473
broken bean (P 11) 782
brown bean (FP 3) 775
Brown Blight 535
Brown Eye Spot 66, 528
Brown Eye Spot disease, effects of shading on 412
bruised bean (crushed) (P 2) 778
bud
  differentiation 10
  head of series 10
  serial 10
budding
  precautions by 115
  upgrading by shield 115
Bukobensis 50
bulk container loading 712
bulk vessels, for loose coffee shipment in 762
bulking 709
feeding systems 709
mixing systems 709
techniques and equipment 709
Burn
causal organism 533
symptom 533
burnt bean 810
Burundi 826
butterfly stage 100
byproducts, integral use of coffee 735

C
C. arabica 3, 28, 42, 45, 70
disease resistance 70
dispersion of 39
genetic structure 42
history of coffee selection 62
hybrid vigor 70
insect resistance 71
mutants of commercial interest 43
natural crosses with diploid species 45
nematode resistance 70
nutrient requirements 253
origin of 36
populations 39
rust resistance 562
selection methods applied to 69
C. brevipes 28
C. canephora 4, 28, 45, 50
breeding strategies applied to 72
conventional clone selection 73
conventional hybrid selection 71
genetic organization of 48
interspecific hybridization 74
natural crosses with diploid species 50
reciprocal recurrent selection 73
rust resistance 563
traditionally cultivated populations 50
C. congensis 28, 30
C. eugenioides 28, 30
C. excelsa 4
C. fadenii 28
C. farafanganensis 32
C. humilis 28
C. kapakata 32
C. liberica 4, 28, 30
rust resistance 563
C. mauritiana 30
C. mufindiensis 28
C. pseudozanguebariae 28, 30
C. racemosa 28, 30, 32
C. salvatrix 28
C. sessiliflora 28
C. stenophylla 28, 30
C. zanguebariae 28
caballete 197
caffein, from coffee byproducts 737
caffeine content
as coffee selection criterion 67
in different brews 935
Cajanus cajan
mulching material 244
used for temporary shade 219
calcium
as fertilizer 257
calcium deficiency 271
calix 11
Calliandra calothyrsus, as shade tree 217
calluses 133
Calopogonium mucunoides, as artificial cover crop 209
Canavalia ensiformis, as artificial cover crop 209
Canephora 50
Canephora types, damaged by Fusarium Disease 64
Canker see Machete Disease 513
carbosulfan, in Coffee Berry Borer control 444
“Cardenillo” bean (PS 1) 783
Carpenter Ant 458
Casuarina equisetifolia, used as wind breaks 223
Casuarina junghuhniana, used for shade 219
Casuarina oligodon, used for shade 219
catador 700
multiple 701
Catimor 799
cation-exchange capacity (CEC) 174, 266, 377
catisc 81
catrenic 81
Caturra 43, 798
Cauvery 81
CEC see cation-exchange capacity 377
center pivot 324
Centro de Investigação das Ferrugens do Café (CIFC) 519, 558
Centrosoma macrocarpum., as artificial cover crop 209
Cercospora Blotch see Brown Eye Spot 495, 528
Cercospora coffeicola 66
certification 392
costs 392
criteria for “bird-friendly” or “Eco-OK” 402
chat-trade 392
chlorine oxygen demand (COD) 737
cherry coffee, storage 746
chloroplast 34
Index

chlorosis 269–270
chlorpyrifos
  
Berry Moth control 451
  for Scale control 432
  for termite nest destruction 427
  in Coffee Berry Borer control 444
  in Coffee Thrips control 437
Cinchona 3
  cleaning 683
  problems and impact on quality 684
  techniques and equipment 683
clonal material, supply of 136
clones, planting 137
CLR see Coffee Leaf Rust 39
C:N ratio 266
coated bean (FP 6) 777
Cocoa Department (IDEFOR) 146
COD see chemical oxygen demand 737
Coffeea genus 26
  distribution of 28
coffee associations, organizations and teaching centers 922
Coffee Bean Weevil, in grain storage and coffee 748
Coffee Berry Borer
  breeding techniques to increase resistance to 61
  coffee pest in Africa 443
  coffee pest in the Asian-Pacific region 471
  control 472
  development while flowing period 13
  in grain storage and coffee 748
  influence on coffee quality 805
Coffee Berry Butterfly 452
Coffee Berry Disease 557
  assessment of losses caused by 544
  causal organism 534
  control 539
  propagation 536
  races 567
  resistance tests 565
  resistance to 564
  symptoms 535
Coffee Berry Disease (CBD) 495
  breeding techniques to increase resistance to 61
Coffee Berry Moth 450
Coffee Blotch Miners 447
coffee blowers 712
coffee brew 934
Coffee Brown Beetle 467
  control 468
Coffee Canker 528
Coffee Capsid Bug, coffee pests 435
Coffee Chafers 445
coffee classification 901
coffee components, balance of 724
coffee deterioration index 827
coffee diseases 495
  biological and agronomic control 501
  eradication measures 502
  treatment methods 498
coffee events 922
Coffee Feeding Pyralid 455
Coffee Fruit Fly 445
coffee growing 168
  after World War II 846
  characteristics of coffee by variety 926
  during the Colonial Period 845
  environmental conditions 925
  in the first half of the 20th century 845
  origins of 845
  the Globalization Era 846
coffee husks 681
  fuel for coffee dryers 681
Coffee Lace Bugs, coffee pest in Africa 436
Coffee Leaf Miner, breeding techniques to increase resistance to 61
Coffee Leaf Miners 447
Coffee Leaf Rust 429
  causal organism 513
  control 518
  damage caused 515
  propagation 516
  races of 559
  resistance genes 560
  resistance reactions 561
  resistance tests 561
  resistance to 557
  symptoms 515
Coffee Leaf Rust (CLR) 39
  breeding techniques to increase resistance to 61
  resistance 39
Coffee Leaf Skeletonizer 456
coffee liquor, terms related to 956
Coffee Playboy 452
Coffee pulp vermicompost 333
Coffee Red Spider Mite 459
coffee research organizations 923
Coffee Ringspot Virus (CoRSV) 550
  Coffee Berry Disease control 554
  distribution 554
Coffee Root Mealybug, coffee pest in Africa 431
Coffee Rusts Research Center (CIFC) 63
coffee species 800
Coffee Stem Borer, coffee pest in Africa 442
Coffee Storage Weevil, influence on coffee quality 805
Coffee Thrips, coffee pests 437
Coffee Twig Borer, coffee pest 439
Coffee varieties, characteristics of 926
Coffee Weevil 460
Coffee White Stem Borer
pest control 466
pest in the Asia-Pacific region 464
Coffee Wilt Disease 496
causal organism 510
control 512
symptoms and biology 511
coffeine content 799
colchicine, applied on the buds to cause diploidy 151
collar crack 508
collecting missions 29
Colletotrichum kahawae 66
Colletotrichum spp. 66
Colombia 824
color 799
green bean 821
impact of storage 751
some types of coffee 799
color sorter
with belt 707
with channels 706
with chutes 706
with rollers 706
color sorting 704
bean transport 705
problems and impact on quality 708
techniques and equipment 705
color-sorting technology 707
Committee for Organic Product Certification (CUCEPRO) 350
community scheme to support technology transfer (MOCATT) 848
compression sprayer 574
Congolese genotypes 46
Conidia 473
Conillon 50, 64
conservation 51
ex situ 51
in situ 55
in vitro 53
of coffee seeds 51
of pollen 55
container, dry, with liner bags 763
containers
for coffee storage 756
genuine bulk 762
standard, dry boxes for coffee shipment 760
ventilated for coffee shipment 760
contour planting 197
defining the slope of the land 198
marking out planting holes 199
pegging the base lines 198
pegging the contours 199
pegging the master rows 198
controlled droplet application (CDA) 579
conversion tables 859
soil-related conversions 897
Coorg 63
copper, as fertilizer 260
corchosis 483
Cordia alliodora, used for shade 219
corolla tube 11
Corticium spp. 66
Costa Rica 824
cotyledons 4–5
counter 10G, for insect control 98
covas 95
Crickets, coffee pests in Afrika 426
crop management 19
biennial pattern 20
high-yield option 19
influence on coffee quality 805
low-yield option 19
crop-adapted spraying (CAS) 585
cross-beater hullers 691
cross-pollination 12
Crotalaria spp.
as artificial cover crop 209
mulching material 244
used as wind breaks 223
used for temporary shade 220
Croton glabulus, used as wind breaks 223
Croton mubango, used for shade 219
Croton reflexifolius, used as wind breaks 223
cryopreservation 53
conventional 149
cryobank for C. arabica germplasm 55
for zygotic embryos 53
of coffee 148
pre-drying/freezing 149
simplified method 149
cryptogamic diseases 504
crystallized bean (jade bean) (P 9) 781
cultivated species 38
cultivated varieties 78
Bourbon-type varieties 78
Catimor- and Sarchimor-type varieties 80
Catuai 80
Icatu 81
multiplication of selected varieties 82
root-stock varieties for nematode resistance 81
Ruiru 11 81
S795 variety 78
selected Canephora varieties 82
Typica-type varieties 78
cultivation practices, influencing the quality of
green coffee 814
cup flavor 751
cup quality
effect of the altitude on 802
influence of potassium and calcium content on 804
influence of shade on 805
cup tasting 821
cutting pit, for cuttings 124
cuttings
brick propagation box with 120
environmental conditions 130
influence of the vegetal material 130
polybags and cutting pits for 122
preparation of the 125–126
pricking out 126, 130
root trimming 128
rooted 130
substrate for raising 123
transport of 129
Cyproconazole
American Leaf Spot control 526
in Coffee Leaf Rust control 518
D
D-D, for fumigated ion of termites 428
*D. intortum*, as artificial cover crop 209
damping off 504
dark brown beans (F 3) 769
Dark Brown Scale 430
dark grey bean 810
data on coffee 925
Dazomet, used in plant damaging agents control 98
deltamethrin, Berry Moth control 451
dense shade 404, 414
density, coffee apparent 747
depulpers, performance of conventional 930
Derosal, used in plant damaging agents control 98
*Desmodium ovalifolium*, as artificial cover crop 209
destoning, techniques and equipment 685
development costs 834
diammonium phosphate, seedling fertilization
with 104
Diazinon
against Grasshopper pests 427
for Scale control 432
β-dichlorophenoxyacetic acid, used as rhizogenic
substance 127
dichlorvos, in Coffee Thrips control 437
dicrotophos, in Coffee Thrips control 437
die-back 19, 495, 531
caused by Leaf Miners 447
way of fighting 532
dieldrin
Coffee Borer control 441
control of Biting Ants 457
for Scale control 432
in Mealybug Root Disease control 510
in Twig Borer control 440
dimethoate
Aphid colony control 428
in Leaf Rolling Thrips control 437
Red Stem Borer control 470
direct seeding 235
discolored over-dried bean (P 8) 781
disease, influence on coffee quality 805
diseases, effects of shade on 411
disk pulpers 637
Disyston 12G, for insect control 98
DNA
low frequency of structural changes in the
chloroplast 34
nuclear ribosomal 34
*Dolichus lablab*, as artificial cover crop 209
domatia 11
Dominican Republic 825
dormancy 12
double-compartment hullers 689
dried cherry, pod (P 7) 780
dried parts of the coffee fruit (DP) 789
dry (ball) cherry coffee, storage 747
dry milling 720
dry processing 623, 726
channels with traps 626
flotation 625
mechanical washer/separators 626
problems and impact on quality 627
sifting 625
siphon tanks 625
static water tanks 625
winnowing 623
dry weight of green coffee (DW green) 415
dry weight of parchment coffee (DW parch) 415
dryers 669
cascade 673
column 671
column (tower) batch 670
combination 676
rotary 675
two-tray 670
vertical 670
with stirrers 669
drying 662, 720, 929
  direct fire heater and heat exchanger 678
  fuels for 680
  in ecological processing 726
  influence on coffee quality 809
  speed 664
  techniques and equipment 665
  temperature curves for 663
  temperatures 662
dwarfness 65

E
  E. fetida 328
  early crop 170
  Earthworm, in vitro studies 329
  Earthworm fertilizer 339
  Earthworms 334
    feeding 337
  Eco-OK 401
