A

Abbey National, 261; background on, 205; Retail Board of, 206; Retail Transformation Programme (RTP) of, 134–135, 205–209, 234
Acceptance procedure, 241
Activity sequencing, 147
Advanced beginners, 253
Aerospace industry. See Defense and aerospace industries
Alignment: of people with business strategy, 9–11; of people with portfolio of projects, 11–12; of portfolio with business strategy, 12–13, 153–162; of portfolio with resources, 13–14; of projects with other projects, 14–15; of projects with strategy, 153–162; of projects within organizational structure, 15–16; between top management and project management, 8–19. See also Strategic alignment
Alternatives, 267
Armstrong, N., 270
Assessment of capability, 67–69, 111–117. See also Benchmarking; Maturity assessment and models
Association for Project Management, 45, 68, 223
Association of Project Managers (England), 91
Australian Institute of Project Management (AIPM), 90–91
Australian National Competency Standards for Project Management, 90–91
Authority, of program versus project managers, 160–161

B

Balanced matrix, 73
Balanced scorecard, 138–139
Balfour Beatty, 260
Benchmarking: to assess project management capability, 18, 63–65, 69; global network for, 112–113, 116; interindustry, 260–261; internal, 113–117; to track progress, 208
Benefits realization or harvesting, 39; in business change projects, 199; defined, 32; factors in, 126–127; governance and, 178; mapping, 199; measurement of, 138–139, 165–166, 173; planning, 171–172; project closeout and, 241–242; in project-driven organizations, 52; sponsor’s responsibility for, 126–127, 181–182
Bergman, I., 111, 275
Berra, Y., 228
Big-time players, 248
Body of Knowledge (Association for Project Management), 45
Boros, B., 115
Bottom-up project proposals, 13
BP Oil, 229–230, 261
British Petroleum, 233
Budgets, 14, 45, 235
Burns, R., 153
Business case: benefits management and, 168, 172; clear goals and, 228; decision making based on, 172; for different project types, 124, 125; elements of, 137–142; scope planning and, 125, 140–143, 147–149; sponsor as owner of, 124–126, 181
Business Excellence Model, 68
Business process reengineering projects, 30
Business strategists, mind-set of, 5–7
Butterfly curve, 184
Buy-in: business case for, 140, 141; for capability assessment, 68–69, 116; for strategically important projects, 8–9. See also Stakeholder commitment

C
Capability for Success Index, 225–227
Capability maturity model-integrated (CMM-I), 66
Capability maturity models (CMMs), 66–69. See also Maturity assessment and models
Career development, 93–94
Carnegie-Mellon University, Software Engineering Institute, 66
Centers of excellence, 79–80, 277
Certification, 89–90
Chain of conversations, 256–257
Champion, 130, 167, 200, 248. See also Sponsor
Change, costs of, 183–185
Change agent, 131, 193–203
Change management, 193–203; governance of, 200–203; program management and, 159–162, 197–198; project scope definition and, 148–149; SAP implementation and, 107; soft system projects and, 146; sponsor and, 181–182
Chaordic organization, 75
Charter, M., 209
Chief executive officers (CEOs), 201
Chief project officer (CPO), 80–81
Chunking, 207–208, 231
Civil engineering contractors, 264–265
Closeout procedures, 240–243. See also Handover
Collaboration, to align portfolio with business strategy, 12–13
Collective responsibility, 11
Commissioning (handover), 32, 240, 241. See also Closeout procedures
Communication: of benefits delivery plan, 174; change projects and, 195, 198; in knowledge management, 110; in project management, 246, 255–257
Communities of practice, 58, 59
Companywide concentrated matrix, 74
Companywide scattered matrix, 74
Competence and competencies: acquisition of, 252–253; for leading change projects, 201–203, 252–253; of people, 88–91, 234; of program managers, 159–160; in project management, 252–253; of sponsors, 201–203
Competence testing and models, 89–91
Competent performers, 253
Computerized systems, 86–87
Concurrent engineering approach, 8–9
Confucius, 93
Construction industry, project management practice in, 260, 262, 263, 264–266
Construction Industry Institute, 260
Consultants. See External consultants; Internal consultants
Contextual factors, 69–70
Continuous improvement: in project management, 56, 81; as project versus process, 17
Control: metrics and, 231–232; planning and, 230–233
Control theory, 46–48, 252
Controlled release of work packages, 224
Corporate Practice Questionnaire (CPQ), 113–114
Corporate project management office (CPMO), 81, 82
Cost factor, 221–224, 225, 246
Cost tracking, SAP project system for, 99–107
Cost variability, by type of project, 144
CPM (Critical Path Method), 270
Crawford, L., 234, 246
Creating an Environment for Successful Projects (Englund and Graham), 107
Creating the Project Office (Englund, Graham, and Dinsmore), 107
Critical success factors, 4, 29; defined, 29; for projects done right, 4, 223–227; for the right combination of projects, 4, 43–60; for the right projects, 4
Cross-organizational resourcing, 234
Culture: alignment with business strategy and, 9–11; of cooperation, 169–170; industry differences in, 266; leading change programs and, 201–203; types of, 10–11
Cycle time tracking, SAP project system for, 99–107

D
Dashboards, 36, 186–190, 191
Data formats, 51, 278
Decision making: benefits management and, 166, 167, 168, 172; business-case-based, 172; creating an environment for, 183–186; human dimension of, 254–255; metrics for, 186–190; in project governance, 177–191; in stage gate reviews, 156–157
Defense and aerospace industries: project management practice in, 260, 262–263, 269–270; project roles in, 33; technical requirements management and, 230
