About the companion website xiv

### Part 1 Introduction

1. Milestones in neonatology 2  
2. Epidemiology 4

### Part 2 Perinatal medicine

3. Perinatal medicine 6  
4. Prepregnancy care, prenatal screening and fetal medicine 8  
5. Maternal medical conditions 10  
6. Intrauterine growth restriction 12  
7. Multiple births 14  
8. Preterm delivery 16  
9. Birth defects and genetic disorders 18  
10. Maternal drugs affecting the fetus and newborn infant 20  
11. Congenital infection 22

### Part 3 Delivery

12. Adaptation to extrauterine life 26  
13. Neonatal resuscitation and post-resuscitation care 28  
14. Hypoxic–ischemic encephalopathy 34  
15. Birth injuries 38

### Part 4 The normal newborn infant

16. Routine care of the newborn infant 40  
17. Routine examination of the newborn infant 42  
18. Neurologic examination 44  
19. Care and support for parents 46  
20. Feeding 48  
21. Minor abnormalities in the first few days 50  
22. Common problems of term infants 52

### Part 5 The sick newborn infant

23. Admission to the neonatal unit 54  
24. Developmental care 56  
25. Stabilizing the sick newborn infant 58  
26. Respiratory support 60

### Part 6 The preterm infant

27. Preterm infants and their complications 66  
28. Lung development and surfactant 68  
29. Respiratory distress syndrome 70  
30. Temperature control 72  
31. Growth and nutrition 74  
32. Intraventricular hemorrhage and periventricular leukomalacia 76  
33. Patent ductus arteriosus (PDA) 78  
34. Infection, jaundice, anemia, osteopenia of prematurity 80  
35. Apnea, bradycardia and desaturations, retinopathy of prematurity 82  
36. Necrotizing enterocolitis 84  
37. Bronchopulmonary dysplasia 86  
38. Outcome of preterm infants 88

### Part 7 Neonatal problems

39. Respiratory distress in term infants 90  
40. Upper airway disorders 94  
41. Jaundice 96  
42. Neonatal infection 100  
43. Specific bacterial infections 102  
44. Viral infections 104  
45. Hypoglycemia and hyperglycemia 106  
46. Inborn errors of metabolism 108  
47. Gastrointestinal disorders 110  
48. Gastrointestinal obstruction 114  
49. Cardiac disorders 116  
50. Renal and urinary tract anomalies diagnosed prenatally 120  
51. Renal and urinary tract disorders 122  
52. Genital disorders 126  
53. Disorders of sex development 128  
54. Anemia and polycythemia 130  
55. Neutrophil and thrombotic disorders 132  
56. Coagulation disorders 134  
57. Dermatological disorders 136  
58. Seizures and perinatal strokes 138  
59. Neural tube defects and hydrocephalus 140  
60. The hypotonic infant 142  
61. Bone and joint disorders 144  
62. Hearing and vision 146
