List of Tables and Figures

Tables
1.1 Document groups (ramos) consulted in the Archivo General de la Nación (AGN), Mexico City 17
1.2 Document groups consulted in the regional archives in Oaxaca, Guanajuato and Chihuahua 18
6.1 Chronology of recorded weather and weather related events and possible implications in colonial Mexico, 1690–1820 144

Figures
2.1 The Lower Conchos Valley, Chihuahua 22
2.2 Nueva Vizcaya and locations referred to in the text 26
2.3 Guanajuato and other locations in the Bajio referred to in the text 29
2.4 The Valley of Oaxaca (incorporating the Etna, Tlacolula and Zimatlán valleys) and locations referred to in the text 33
3.1 Land use and property in Santa Barbara, Chihuahua in 1604 51
3.2 Land use and property in San Bartolomé, Chihuahua in 1604 51
3.3 Indigenous population, Nueva Vizcaya, 1521–1821 54
3.4 Composition of population in the Guanajuato Intendancy, c. 1792 61
3.5 Recipients of Mercedes for water use in Oaxaca, sixteenth to eighteenth centuries 69
3.6 Drought, harvest crisis and recorded episodes of epidemic disease in Oaxaca, Guanajuato and Chihuahua, 1720–1820

4.1 Plan of the Alhóndiga, San Felipe el Real de Chihuahua (reproduced from original held in the Archivo General de la Nación, Mexico City)

5.1 Flooding and avulsion of the Rio Atoyac, 1775
5.2 Disputed territorial boundaries in 1785 following avulsion event
5.3 Further movement of the river channel and flooding in 1804
5.4 Droughts, famine, epidemic disease and unrest in Chihuahua, 1550–1820
Series Editors’ Preface

The RGS-IBG Book Series only publishes work of the highest international standing. Its emphasis is on distinctive new developments in human and physical geography, although it is also open to contributions from cognate disciplines whose interests overlap with those of geographers. The Series places strong emphasis on theoretically-informed and empirically-strong texts. Reflecting the vibrant and diverse theoretical and empirical agendas that characterize the contemporary discipline, contributions are expected to inform, challenge and stimulate the reader. Overall, the RGS-IBG Book Series seeks to promote scholarly publications that leave an intellectual mark and change the way readers think about particular issues, methods or theories.

Acknowledgements

The research for this volume was made possible by a research grant from the Arts and Humanities Research Council (B/RG/AN6160/APN10797) and a Philip Leverhulme Prize. The study would not have come to fruition without the help, advice and encouragement of a number of colleagues, friends and of course, my family.

I have been fortunate in working with Sarah O’Hara (who brought the Archivo General de la Nación and the regional archives of Mexico to my attention), first as an academic supervisor and latterly as a colleague and friend. I have also had the pleasure and privilege of working with Dra Isabel Fernández Tejedo over the last few years. Isabel’s advice and knowledge of Mexican history have been pivotal to the completion of this study.

I would like to acknowledge the tireless assistance and patience of the porteros in Galleria 4 of the Archivo General de la Nación during my regular visits over the last thirteen years, and for putting up with endless requests for volumes of Tierras and Mercedes, day after day. I would also like to express my gratitude to unique individuals like Don Luis de Castañeda for opening up his own private archive (and the front room of his house!) to myself and Isabel while we were working in Oaxaca in 2001.

The encouragement of a number of colleagues here in Nottingham, not least Mike Heffernan and Charles Watkins, provided me with the stimulus and confidence to embark on this study, while Chris Lewis kindly lent his cartographic skills to the production of the maps.

I particularly wish to thank my husband Stephen, and my family, Mum, Dad, brothers Richard and Jason and my Grandma, for all their encouragement, enthusiasm, patience and sense of humour.
