total inorganic carbon (TIC), 51–4, 131
total sulfide (sulphide) (TS), 134
diffusion, 135–6
trace metals, 304
trailing hoses, 312
trailing shoes, 220, 314
transport fuel, 242
trimethyl ammonium, 145
turbulent layer air resistance (Ra), 149
tyndalisation, 98

UASB (upward anaerobic sludge blanket) reactor, 264
ultrafiltration, 126–8, 274, 288

United Nations (UN), 30–31
  Convention on Long-Range Transboundary Air Pollution (CLRTAP), 31
United States of America, 34–5
urea, 69, 83, 100, 102
uric acid, 69, 83, 159, 160, 303
urine, 42
  composition, 41, 69
VAC (garden-pond-animal system), 14–15
  farming system, 91, 96
Van Soest characterisation, 72
van’t Hoff equation, 140
ventilation, 11
  forced, 11
  mechanical, 11
  rate effect, odour emission, 166
vermicomposting, 278
VFA (volatile fatty acids), 51–4, 182, 306
  inhibition, 256
virus, 74, 93–4, 96–7, 100
viscosity, 47, 136
volatile components, 55–8
volatile fatty acids (VFA), 51–4, 68
volatile organic compounds (VOC), 284
volatile solids (VS), 68, 260

water evaporation, energy consumption of, 243
water-holding capacity (WHC), 277
water-soluble P, 285
weed seed kill-off, 277
wind drift, 312

zeolite, 281
zeta potential, 49
zoonosis, zoonotic, 91–2
z value (electrochemical), 94
zymogen, zymogenous, 74
