Index

Page numbers in **bold** indicate tables and/or boxes; page numbers in *italics* indicate figures

abdominal compartment syndrome 280–281, 281
abdominal effusions 270–271
abdominal examination 269
abdominal and hindlimb counterpressure 167, 168
abdominal palpation 115
ABG see arterial blood gas
abnormal heart sounds 182, 182
ABP (arterial blood pressure) see blood pressure
A/C see assist/control
ACEI see angiotensin-converting enzyme inhibitors
acetaminophen 342
acid–base status 95–107
anesthesia 391
Cl disorders 102
clinical signs of acidosis/alkalosis 99
CO disorders 101
comprehensive formulas 99
concepts and definitions 95, 96
diagnostic imaging 100
diagnostic procedures 99–100
disorders of acid–base balance 100–106
drug selection and dosing regimens 326, 327
electrolytes 101–103, 105
gastrointestinal system 269
history and physical examination 99
lactate disorders 103
life-compatible range 96
methods of acid–base analysis 96–99
monitoring procedures 100
Na+ or free water disorders 101–102
non traditional formulas 96–98
pH, HCO3−, and BE disorders 100–101
phosphate disorders 102–103
point of care testing 100
protein or albumin disorders 103
semi-quantitative acid-base profile 99, 102, 104
supplemental tests 103–106
traditional formulas 96–99
traditional and non-traditional formulas 96–99
unmeasured cation and anion disorders 103
urine electrolytes 105
veterinary nursing care 359
ACT see activated clotting time
action potential 73, 74
activated clotting time (ACT) 142, 142
activated partial thromboplastin time (aPTT) 142, 142, 152–153, 306
activated protein C (APC) 146
acupuncture 346, 382
acute congestive heart failure 199–200, 199
Acute Dialysis Quality Initiative (ADQI) 235, 235
acute kidney injury (AKI) 37, 225, 235–239, 235
Acute Kidney Injury Network (AKIN) 235, 235
Acute Pain Scales 336–337
acute paraplegia/paraparesis 222
acute quadriplegia/quadriparaparesis 221–222
acute respiratory distress syndrome (ARDS) 101
acute trauma coagulopathy (ATC) 149–150
ACVIM see American College of Veterinary Internal Medicine
adenosine triphosphate (ATP) 9–10
ADH see antidiuretic hormone
adjunctive therapy 382
ADQI see Acute Dialysis Quality Initiative
advanced life support 202–205
adverse drug reactions 329
AKI see acute kidney injury
AKIN see Acute Kidney Injury Network
albumin and colloid osmotic pressure 43–53
clinical pathological testing 47, 47–48
concepts and definitions 43–44
diagnostic imaging 48
diagnostic procedures 46–48
disorders of albumin and colloid osmotic pressure 48–52
drugs and plasma albumin 46
fluid balance 9, 12, 15
history and physical examination 46–47, 47
hyperalbuminemia 52
hypoaalbuminemia 48, 47, 48–52
low COP 48–52
mechanisms of albumin exchange and distribution 43, 44
medical treatment 49–52, 49
monitoring procedures 48
normal plasma albumin 44
point of care testing 47
Starling equation and glycocalyx model 43–44, 44, 45, 45
veterinary nursing care 357–358
albumin and colloid osmotic pressure veterinary nursing care 357–358
alpha-2-agonists 342–343
AMBU see artificial manual breathing unit
American College of Veterinary Internal Medicine (ACVIM) 34
analgesia 342
acetaminophen/paracetamol 342
alpha-2-agonists 342–343
gabapentin 343
local anesthesia 342
NMRA receptor antagonists 343
nonsteroidal antiinflammatory drugs 341, 342
opioids 341, 341
pain management 338–346
pre-emptive and multimodal analgesia 338–340
route of administration 344–346, 345
selected drugs and dose 339–340
tramadol 344
tricyclic antidepressants 343
anemia 164–171
algorithm 165
blood smear 161–162
blood transfusion 166–170, 169
causes and characterization 171
changes in PCV and TP 160
clinical findings 159
clinical pathological testing 161–162
concepts and definitions 158
drugs and toxins associated with anemia 158
hypervolemic anemia 170–171
hypovolemic anemia 166, 167
immune mediated, criteria for 164
microscopic RBC changes and associated etiologies 161
nonregenerative anemia 163, 228, 243, 253, 256, 306
normovolemic anemia 171
red blood cell morphology 161, 161
regenerative anemia 161
renal system 243
reticulocyte 163, 163
saline agglutination 161, 162
treatment of hypervolemic anemia 170–171
treatment of hypovolemic anemia 166, 167
treatment of normovolemic anemia 171
anesthesia 389–399
assessment questions 395
cesarean section 399
clinical signs of acidosis/alkalosis 99
diagnostic imaging 391
diagnostic imaging 391
diagnostic procedures 389–391
diagnostic procedures 389–391
diagnostic testing 391
diagnostic testing 391
diagnostic testing 391
end-tidal CO2 396
five stages of anesthesia 395
history and physical examination 389–391
hypoxemia 396
induction 395
local anesthesia 342
maintenance 395–398, 395
monitoring procedures 396–398, 396–398
patient preparation 391–395, 393–394
point of care testing 391
preanesthetic evaluation 389–391
premedication 392, 395
recovery period 399
reducing time under anesthesia 394
angiotensin-converting enzyme inhibitors (ACEI) 306
anoxia 288, 292
antiarrhythmic drugs 195, 196
antibiotics 258, 262–263
anticoagulants 326
anticoagulant therapy monitors 146
disorders of natural anticoagulants 153
drugs commonly administered for coagulopathies 147
natural anticoagulants 146, 153
vitamin K antagonist rodenticide toxicity 146–147, 150

© 2017 John Wiley & Sons, Inc. Published 2017 by John Wiley & Sons, Inc.
anticonvulsants 312
antidiuretic hormone (ADH) 10, 73, 83–84
antiepileptics 217, 218
anti-factor Xa 146
antimicrobials
  antibiograms 258, 262–263
  antibiotic deescalation 264
  antibiotic selection 260–262
  antimicrobial stewardship 257–264
  bacterial resistance 263, 264
  body temperature 309
  clinically useful combinations 261

  Surviving Sepsis Campaign 264, 265
antimimetics 275
antisepsis 377, 377, 378
antithrombin 146
anxiety 371
ATC see activated protein C
aPTT see activated partial thromboplastin time
ARDS see acute respiratory distress syndrome
arginine 281
ARS see ascending reticular activating system
arterial blood gas (ABG) analysis 115–117, 116
arterial blood pressure (ABP) see blood pressure
arterial pressure waveform 14
arterial pressure waveform (APW) 14
artery 114, 182, 269
AV see atrioventricular
axillae 226
BMBT see buccal mucosal bleeding time
body condition score (BCS) 286–287,
body temperature 309
blood collection (three-syringe technique) 30
blood components 158–159
blood pressure 29–41
  additional monitoring tools 35
  anechoic triphosphate
  atrioventricular (AV) node 178, 200
  auscultation 114, 182, 269
  blood collection (three‐syringe technique) 30
  blood collection (three-syringe technique) 30
  blood pressure
  30
  decreased preload 36–37
  diagnostic imaging 31
  diagnostic procedures 29–31
  direct ABP monitoring 31–34
  diseases caused by hemoglobin 174
  disorders of blood pressure 36–39
  drugs and toxins affecting blood pressure 30
  equipment and materials 32
  gastrointestinal system 280–281
  heart rate, rhythm, and contractility 200–201
  history and physical examination 30
  indirect ABP monitoring 34–35
  medical treatment 39
  monitoring procedures 31–35
  neurological status 219
  nonresponsive hypertension 38
  pheochromocytoma 39
  physiological components 30
  point of care testing 30–31

ileus 274–279
medical treatment 275–280, 275, 278
minimum database 269
monitoring procedures 273
motility disorders 276–279
motility modifiers 274
mucosal integrity 279–280
mucosal ulceration 275, 280
nutritional status 268–269, 269, 275, 278–281, 285
point of care testing 269–271
veterinary nursing care 366–367
vomiting 267, 268, 273–275, 274–275
GDV see gastric dilatation volvulus syndrome
gelatins 52
GFR see glomerular filtration rate
GI see gastrointestinal
glargine 68–69

glomerular filtration rate (GFR) 225, 227–229,
231–232, 243
hypothermia 303
anesthesia 398
blood pressure 37
coagulation 149–150
diagnostic procedures 313–314
medical treatment 314–315, 314
prevention in the ICU 315
therapeutic hypothermia 315
veterinary nursing care 368
hypotonic fluids 18–19, 80–81
hypotonic hypertremia 81–82
hypovolemia 33–34, 33, 314–315
hypovolemic anemia 166, 167
hypovolemic erythrocythemia 172
hypovolemic shock 16–17, 19–21, 22
hypotension
anesthesia 397
fluid balance 12, 16
oxygenation and ventilation 109, 121–125, 122, 129, 132–133
treatment 122–125
hypoxic hypoxia 121–122, 122
hypoxia 17, 109, 121–122, 122
ICF see intracellular fluid
ICP see intracranial pressure
IHD see intermittent hemodialysis
ileus 278–279
immune-mediated hemolytic anemia (IMHA) 239–240
leukocyte counts
eosinophils and basophils 256
general patterns of leukocyte response 251, 253
lymphocytes 255–256
monocytes 256
neutrophils 253–255, 256
normal reference ranges 251, 253
performing a manual WBC differential 253
white blood cell lines 251–253, 254, 256
white blood cells and immune status 251–256, 252
limb strength and sensation 214–215
LLLT see low-level impulse laser therapy
LMN see lower motor neurons
local anesthesia 342
lower motor neurons (LMN) 215
low-level impulse laser therapy (LLLT) 382
low-level laser therapy 347
lung parenchymal disorders 312
manostat 236
MAP see mean arterial pressure
massage 347
mechanism of action 170
MAT see microscopic agglutination test
MBC see minimum bactericidal concentration
MCHC see mean corpuscular Hgb concentration
MCS see muscle condition score
MCV see mean cell volume
MDSC see myeloid-derived suppressor cells
mean arterial pressure (MAP) 29, 33–35
mean cell volume (MCV) 159, 161
mean corpuscular Hgb concentration (MCHC) 161
mechanical ventilation 33–34, 33, 129–134, 130, 361
measles 287
mentation 208, 212, 218–220, 360
methemoglobinemia 174
MIC see minimum inhibitory concentration
microscopic agglutination test (MAT) 239
minimum bactericidal concentration (MBC) 260
minimum inhibitory concentration (MIC) 260–261, 328
minute ventilation 109
MM see mucous membrane
modified Glasgow Coma Scale 212, 220, 360
MODS see multiple organ dysfunction syndrome
MOP see multiple organ failure
monocytes 256
motility disorders 276–279
MPC see mutant prevention concentration
MR see magnetic resonance imaging
musculoskeletal integrity 279–280
muscular ulceration 280
mucous membrane (MM) color 390–391
multimodal analgesia 338–340
multiple organ dysfunction syndrome (MODS) 1, 3–5, 37–38, 267
multiple organ failure (MOF) 1
muscle condition score (MCS) 286–287, 290–291
mutant prevention concentration (MPC) 260–261
myeloid-derived suppressor cells (MDSC) 1
nasosseopaline intubation 281–282
necrotic tissue 376
necrotizing fasciitis (NF) 381–382
nephrons 227
nephrotoxins 236, 236, 239
neuroimaging 216
neurological status 207–223
anesthesia 391
basic body posture and involuntary movements 212–214
blood flow 216
brain edema 220–221, 220
central blood flow 220
cerebrospinal fluid 207, 216
clinical signs 208, 211, 219
diagnostic procedures 207–216
decision making algorithms 208, 218
delirium, stupor or coma 218–220
diagnostic procedures 207–216
disorders of the neurological system 216–222
disorders of spinal cord and peripheral nerves 221–222
diagnostic imaging 216
gait, limb strength and sensation, and postural reactions 214–215
head and body tremors 218
history and physical examination 207–208
intercranial pressure 207–208, 216–221, 219
management of critical problems of the brain 216–221
medical treatment 217–218, 217
mentation and level of consciousness 208, 212, 212, 218–220, 360
monitoring procedures 216
neck and back pain 222
neuroimaging 216
neurological examination 208–215, 338, 362, 391
orthopedic examination 207–208
oxygenation and ventilation 115
pain management 215, 222, 338
point of care testing 215
seizures 208, 211, 217–218, 217, 218
side effects of drugs used in ICU 211
spinal reflexes and cutaneous truncal reactions 215, 215
systemic disorders influencing CNS function 209–210
vestibular disease 218
veterinary nursing care 360–361
neuromuscular breathing disorders 135
neutrophils 253–255, 256
NF see necrotizing fasciitis
NIBP see noninvasive blood pressure
NMDA receptor antagonists 343
nociceptors 333
noninvasive blood pressure (NIBP) monitoring 34–35
noninvasive oxygen delivery 122–123, 123
nonpyrogenic hyperthermia 307, 308
nonregenerative anemia 163, 228, 243, 253, 256, 306
nonsuppressive hypotension 38
nonresponsive shock 22–23, 23
nonsteroidal antiinflammatory drugs (NSAID) 309, 341, 342
normovolemic anemia 171
normovolemic erythrocythiosis 172–174
nosocomial infections 263, 264
NSAID see nonsteroidal antiinflammatory drugs
nursing care see veterinary nursing care
nursing notes sheet 355
nutritional status 285–301
body condition score 286–287, 289
clinopathological testing 288
concepts and definitions 285
decision-making algorithms 288, 292
diagnostic imaging 288–289
white blood cells (WBC) (cont’d)
patient-, drug-, and organism-specific considerations 247, 249, 257
perioperative antibiotics 262
point of care testing 249
Surviving Sepsis Campaign 264, 265
veterinary nursing care 366, 366
wound diffuser/soaker catheters 344, 345
wounds and bandages 373–387
adjunctive therapy 382
antisepsis 377, 377, 378
bandage changes 383–386
burns 370, 380–381
clinicopathological testing 375
compartment syndrome 382
concepts and definitions 373–374
debridement and congestion 376, 381
definitive management 376
diagnostic imaging 375
diagnostic procedures 374–375
drains 377
evaluation of external coaptation 383
external coaptation 382–385, 382, 383, 384, 385–386
frostbite 381
general wound care 375–378
hemostasis 376
history and physical examination 374–375
hospital-acquired wounds 373, 375, 378–379
initial wound management 376
irrigation 376–377
management of different wound types 380–382, 380
monitoring procedures 375
necrotizing fasciitis 381–382
point of care testing 375
Rule of 9s 373, 380, 381
surgical wound classification 373, 374
traumatic wound classification 373, 374
vacuum-assisted closure 379, 379
veterinary nursing care 369, 369, 370
wound closure 377–379, 379
xenotransfusion 170
