**Contributors**  ix  
**Preface**  x  

1. Initial assessment: subjective  2  
2. History taking  4  
3. Principles of systematic assessment  6  
4. Communication  8  
5. Developmental considerations  10  
6. Informed consent  12  
7. Safeguarding  14  
8. Family-centred care  16  
9. Record keeping  18  
10. Planning care  20  

## Part 2: Assessment of the child: Objective data

11. Airway and breathing  22  
12. Circulatory assessment  24  
13. Measuring blood pressure  26  
14. Assessment of pain  28  
15. Moving and handling  30  
16. Measuring temperature  32  
17. Weight, BMI, height/length and head circumference  34  
18. Blood glucose monitoring  36  
19. Skin integrity  38  
20. Pulse oximetry  40  

## Part 3: Drug administration

21. Principles of drug administration  42  
22. Drug calculations  44  
23. Administration of medication  46  
24. Inhaled drug administration  48  
25. Intranasal diamorphine  50  
26. Intravenous fluid administration  52  

## Part 4: Respiratory

27. Spirometry  54  
28. Peak expiratory flow  56  
29. Arterial blood gas sampling  58  
30. Oxygen administration  60  
31. Suctioning  62
Part 5  
**Gastrointestinal**
- Tracheostomy care  64
- Non-invasive ventilation  66
- Underwater seal drain  68

Part 6  
**Renal**
- Urine collection  82
- Catheter insertion  84
- Catheter care  86

Part 7  
**Neurological**
- Neurological assessment in children  88
- Preparation for lumbar puncture  90

Part 8  
**Musculoskeletal**
- Neurovascular assessment  92
- Care of a cast  94
- Skin traction  96

Part 9  
**Skin**
- SteriStrip™ application  98
- Wet wrapping in atopic eczema  100

Part 10  
**Cardiac**
- 12-lead electrocardiography  102
- 3-lead electrocardiography  104

Part 11  
**Pre- and post-operative care**
- Pre-operative care and transfer to theatre  106
- Post-operative recovery  108

Part 12  
**Emergency Care**
- Basic life support (BLS)  110
- Advanced resuscitation of the infant and child  112
- Transfer of the critically ill child  114

Part 13  
**Newborn**
- Phototherapy  116
- Care of the umbilicus  118
### Part 14  Infection control
- 60 Hand washing  120
- 61 Aseptic non-touch technique  122

### Part 15  Haematology
- 62 Obtaining blood samples  124
- 63 Transfusion of blood and blood components  126
- 64 Cannulation  129

### Part 16  End-of-life care
- 65 Care of the dying child  132
- 66 Care after death  134
