SUBJECT INDEX

Note: Page numbers in italics refer to illustrations

A–B (single-case) design 135–136
A–B–A (single-case) design 136
A–B–A–B (single-case) design 136–137
abduction 67–68
abductive (retroductive) reasoning 37, 67–68
academic dishonesty 230–231
access
  checklist on negotiating 398
  issues in insider research 399–400
  negotiating 396–400
accountability 188, 247
  literature review 90
accretion measures 347–348
action perspective 39–40
action research 187, 199–203
  cycle 201–202
  links between evaluation research and 201
  and realism 202–203
  stages of 201
activity board approach 226
administrative records, using for research purposes 360–361
alternating treatment design 138
ambiguity about causal direction, threat to internal validity 108
AMOS 438
Analyse-it (software package) 410
analysing differences 438–452
analysis
  cluster 436
  of differences 438–452
  elaboration 433–434
  factor 436–437
  interpretation vs. 408
  of interrupted time series design 453–454
  literature review 91
  multivariate 436–437
  path 141, 437
  power 441–442
  preparing for 406–407
  of pre-test post-test non-equivalent groups design 453
principal-components 436–437
of qualitative data 459–486
of quantitative data 409–458
of quasi-experiments 452–454
realist 405–407
of regression discontinuity design 454
secondary 359–361
of single-case experiments 454–455
of surveys 455–457
analysis of variance (ANOVA)
  interaction between variables 449
  multivariate (MANOVA) 451
  simple two-way independent samples 449, 450
  single factor independent samples 446–448, 447
  single factor repeated measures 448, 448–449
  two-variable (or factor) with repeated measures 449
  two-way independent samples 449, 450
analytic codes 473
analytic induction 329
androcentricity 239, 240
anonymity 219–220
anonymization, and ethical practice 219
anti-quantitative fashion 104
application approval, obtaining 234
arbitrary scales 308
arithmetic mean 419
assent 223
asynchronous groups 304
attainment tests 316
attitudes, measurement of 307–308
audit trail 172
authenticity of response 380–381
autobiographical research 373
axial coding 163
  in grounded theory study 463–464
background research 50–51
bar chart 416–417, 417, 421
behavioural by-products 347
beta weight 435
bias
  due to demand characteristics 114
  due to experimenter expectancy 114–115
  in experiments 114–115
  in flexible design research 171–173
  observational 331
observer, in fixed design research 106

DeltaGraph 418
demand characteristics (of experimental situation) 114
dependability, in flexible design research 169
dependent samples t-test 44, 445
dependent variable (DV) 113
depth interview 286
description threat to validity, in flexible designs 170
descriptive codes 473
descriptive observation 328
dimensions of 328
descriptive (summary) statistics 418–420
design 5–6, 71–81
of case studies 152
desk-based research 82–100
literature review 88–93
realist review 97–99
systematic review 93–97
types of 83–88
detached researcher, in fixed designs 103–104
development, standard 419, 420
diaries 273–276
developing a diary form 274
example of instructions 275
literature review 89
as a research method 273
differences, analysis of 438–452
diffusion of treatments, threat to internal validity 108
dimensional sampling 279, 280
direct demonstration 111
direct observation 320
discourse analysis 371–372, 373
discrepancies in findings, in multi-strategy designs 184–186
dishonesty, academic 230–231
dispersion 418
disproportionate sampling 278
disseminating literature reviews 91, 93

dissemination strategy 487–488
distribution free (non-parametric) tests 424
documentary analysis 241, 349–359
document sheets 467
double standards 239, 240
double-transfer coding of data 412

descriptive observation 328
dimensional 328
descriptive (summary) statistics 418–420
design 5–6, 71–81
of case studies 152
desk-based research 82–100
literature review 88–93
realist review 97–99
systematic review 93–97
types of 83–88
detached researcher, in fixed designs 103–104
development, standard 419, 420
diaries 273–276
developing a diary form 274
example of instructions 275
literature review 89
as a research method 273
differences, analysis of 438–452
diffusion of treatments, threat to internal validity 108
dimensional sampling 279, 280
direct demonstration 111
direct observation 320
discourse analysis 371–372, 373
discrepancies in findings, in multi-strategy designs 184–186
dishonesty, academic 230–231
dispersion 418
disproportionate sampling 278
disseminating literature reviews 91, 93

dissemination strategy 487–488
distribution free (non-parametric) tests 424
documentary analysis 241, 349–359
document sheets 467
double standards 239, 240
double-transfer coding of data 412

disciplinary purpose of research 39, 40
empowerment evaluation 201
empowerment purpose of research 39
EQS 438
equal appearing interval (or Thurstone) scale 311
erosion measures 347, 348–349
error bars, standard deviation 420, 421
ethical committees 231–234
ethical responsibilities
discovery of illegal behaviour 229
general 229–231
whistle blowing 229
ethical review
familiarity with national system 233–234
and social research 231–232
ethical review board 231–234
effects on research quality 214–216
getting an application approved 234
interacting with 232–233
ethics 205–220
academic dishonesty by students 230–231
anonymity 219–220
assent and consent, differences between 223
codes and guidelines 208–209
confidentiality 219–220
covert observation 217–218
deception in social research 206, 216–217
differing perceptions about 229
dilemmas 207
ethnographic research 158
literature review 90, 92
participants and data collection 211–212
and reporting 489–491
ethnographic approach 80, 156–160
design issues 160
difficulties in doing 157
features of 158
realism 159–160
use of 157–159
ethnomethodology 26, 373
ethological approach 332
