60/40 stock/bond asset allocation, appropriateness, 295
60/40 stock/bond mix, evaluation, 290e
65-year-olds, life expectancy (probability), 305e

A
Absolute priority rule, 576
Absolute return investing, 537–538
Absolute return objective, 15
Absolute return vehicles, 537–538
Accounting risk, 593–594
example, 594
Accrual accounting, 795
Accumulated benefit obligation (ABO), 66
Accumulated service, 66
Accumulation phase, 26
Active approaches, comparison, 411e
Active equity investment, 429–455
Active focused equity style, 416
Active/immunization combination, 369
Active investment, 297
approach, 7
Active investors, characteristics, 699–700
Active lives, 67
Active management, 410
passive management, contrast, 391–393
risk factor mismatches, 332
styles, 434–435
Active manager
activities, requirement, 344–345
analysis/information, usage, 699
Active/passive combination, 369
Active return, 411, 770
one-factor model, relationship, 755
Active risk, 411, 597, 770
Active strategies, 344–346
Actual extreme events, 614–615
Administrative fees, 830
Ad valorem fees, 467
Adverse selection risk, 650
Advertise-to-draw-liquidity trading, focus, 669
After-tax performance presentation, data (illustration), 851e
After-tax portfolio, calculation, 850
After-tax return/calculation methodology, 847–855
Aggressive Balanced Account Composite, 821
Algorithmic execution systems, classification, 673–676
Algorithmic revolution, 670–673
Algorithmic trading, 670
classification, 674e
Allocation/selection interaction return, 759
Alpha, 7, 451
determination, 537–538
research, 130
separation, 465
Alternative investments, 253–254
client communication, 482
core-satellite investing, relationship, 484
decision risk, 483
definitions/similarities/contrasts, 478–484
evaluation, example, 481–482
flowchart, 479e
portfolio management, introduction, 477–478
suitability, determination, 482
Analysts, forecasts, 209–210
Anchoring trap, 144
Angel investor, 503
Annualized return, 730
example, 730
Annual rebalancing results, 703e
Anticipated income tax rate, 849
Appraisal (smoothed) data, 137
Arithmetic mean historical equity risk premium, range, 163
Arrival price, 656
Arrival price strategy, 674
ASEC defined-benefit pension plan, asset allocation (example), 310–312
Asian equity, outperformance, 280
Ask, 641
Ask price, 641
Ask size, 641
Asset allocation
alternatives, proposal, 55e
approach, critique (example), 306–307
behavioral biases, example, 246–248
behavioral influences, 245–248
concepts, 50–58
example, 51–53, 56–58
definition, 231–236
determination, 54
elimination, 54–55
example, 279
horse race, 233
human capital, relationship, 301–304
importance, empirical debate, 234–236
introduction, 50–62, 230–231
instructor risk, relationship, 236–248
life-cycle investment guide, 296e
major steps, 255e
recommendations, example, 306e
return objectives, relationship, 236–248
reviews, 254
Roy’s safety-first criterion, application, 243–245
steps, 254–257
tolerance bands, example, 708–709
Asset classes
addition decision, example, 252
diversification, 248–249
inflation/deflation, impact, 183e
investor absorption capacity, 249
mutual exclusivity, 248
returns, 210–227
selection, 57–58, 248–254
specification, criteria, 248–251
total return expectations, 325e
world investable wealth, 249
Asset/liability management (ALM), 69
applications, number, 352
approach, 236–237
drug, 288–293
example, 286–295
practices, 108
swap, application, 383
tools, 377
Asset/liability modeling, simulation (inclusion), 293–295
Asset marketability risk, 107
Asset-only (AO) approach, 236–239
Asset risk, 118n
attributes, changes, 695–696
Assets
category, 750–751
covariance matrix, 152
duration/convexity, 358–359
duration/exposure, 248
integration, 28
segregation, 29
volatility, 597
Asset under management (AUM), 536
fee, 533
Asset-weighting, 807
Association for Investment Management and Research (AIMR), 787
Baseline forecasts, 221e
Baseline forecasts, 221e
Benchmark, 7, 436, 731–744
appropriateness, 811
Black-Litterman (BL) approach, 278–284
Black-Litterman (BL) equilibrium, 282e
Black-Litterman (BL) model, 277
Black-Litterman (BL) model, 277
example, 278e
Block order, 648
Bond market index, funds management, 331–346
selection, 392
Bonds
allocation, 295
number, calculation, 376
strategies, classification, 331–332
total return, 345
variance, bond duration (contrast), 376
Bond-yield-plus-risk-premium method, 162
Bottom-up approaches choice, 475
contrast, 474–475
Brazil industrial production, 206
Breakeven spread analysis, 398–399
example, 398–399
Bridge liquidity, providing, 641
British Retail Consortium (BRC), 185
Broadly based bond index portfolio, 333
Broadly based market index, outperforming, 333
Broad market indexes, 734
Brokers
markets, 648
roles, 649–650
Broughton Asset Management, 765
Broadly based bond index
portfolio, 333
Bundled fees, 807
Index

Business
- impact, 184
- pulse, taking, 185–186
- risk, 586n

Business cycle
- 176–179 analysis, 174–190 factors, evaluation, 184–190 inflation/deflation, 179–183 phases, 178e

Business cycle-related
- supply/demand, 524

Buy-and-hold attribution, 756

Buy-and-hold strategies, 711–712

Buy-side analysis, 3–4

Buy-side research, contrast, 475
