About the companion website viii

1 Introduction 2
  James Field
2 The function of removable prostheses 4
  James Field
3 Stability and retention 6
  James Field
4 Patient assessment for complete dentures 8
  James Field
5 Edentulous ridge presentations 10
  James Field
6 Patient assessment for partial dentures 12
  James Field
7 Factors complicating success 14
  James Field
8 Accessibility and operator position 16
  James Field
9 Pre-prosthetic treatment 18
  Claire Storey and James Field
10 Revisiting the anatomy 20
  James Field
11 Making a primary impression—complete dentures 22
  James Field
12 Making a primary impression—partial dentures 24
  James Field
13 Special trays 26
  James Field
14 Compound and putty materials—handling and manipulation 28
  James Field
15 Recording an upper functional impression 30
  James Field
16 Recording a lower functional impression 32
  James Field
17 Managing fibrous ridges 34
  James Field
18 Denture bases 36
  James Field
19 Recording the maxillo-mandibular relationship 38
  James Field
20 Prescribing the upper wax contour  40
   James Field
21 Prescribing the lower wax contour  42
   James Field
22 Tooth selection and arrangement  44
   James Field
23 Occlusal dimensions and occlusal schemes  46
   James Field
24 Respecting the neutral zone  48
   James Field
25 Assessing trial prostheses  50
   James Field
26 Fitting and reviewing finished prostheses  52
   James Field
27 Copying features from existing prostheses  54
   James Field
28 Classifying partial prostheses and material choices  56
   James Field
29 Designing partial prostheses  58
   James Field
30 Saddles, rests and clasps  60
   James Field
31 Connectors and bracing  62
   James Field
32 Surveying and preparing guide planes  64
   James Field
33 Designing frameworks—case examples  66
   James Field
34 Precision attachments—the fixed–removable interface  68
   James Field
35 Dealing with frameworks and substructures  70
   James Field
36 The altered cast technique and the RPI system  72
   James Field
37 Swing-lock prostheses  74
   James Field
38 Gingival veneers  76
   James Field
39 Immediate and training prostheses  78
   Claire Storey and James Field
40 Occlusal splints  80
   James Field
41 Implant-supported mandibular overdentures  82
   Claire Storey and James Field
42 Principles of restoring maxillary defects  84
   James Field
43 Tissue conditioners, liners and re-basing  86
   Claire Storey and James Field
44 Maintaining adequate oral hygiene  88
