  in vector form, 414
  for almost regular sets, 409
  for regular sets, 405
  general, 409
  on manifolds, 412
subspaces, 63
  intersection of, 64
  spans and, 64
  sums of, 64
  volumes on, 343
sums
  lower, 306
  upper, 306
supremum, 39
surface-area
  upper, 407
surfaces, 244, 357
  orientations of, 357
symmetric difference of sets, 5
tangent planes
  orientations of, 358
tangent spaces
  and derivatives, 346
equations of, 238
of graphs, 238
of manifolds, 249
properties of, 250
tangent vector, 187
tangent vectors
of curves, 250
on a manifold, 250
Taylor polynomials, 182, 183, 279
approximation by, 184
derivatives of, 184
series of, 279
Taylor series, 183, 279
approximation by, 185
tensor fields, 366
integrals of, 366
computations of, 367
pullbacks of, 370
related to vector fields, 368
term-by-term differentiation, 275
tertiary expansions, 54
tetrahedra, 302
volumes of, 318
topological concepts, 158
topological spaces, 158
 topology, 156
in $\mathbb{R}$, 58
in normed spaces, 156
of a vector space, 158
of Jordan sets, 298
torsion, 188
total differentials, 215
trace
of a transformation, 448
of linear transformations, 382
translations
of Jordan sets, 324
volumes under, 324
transpositions
and permutations, 436
triangle inequality
between real numbers, 34
in Euclidean Spaces, 96
in normed spaces, 126
the reversed, 126
uniform continuity, 150, 167
uniform convergence, 150
and continuity, 150
unions of sets, 5
upper approximations
supports of, 307
upper bounds, 36
least, 36
uniqueness of, 37
upper integrals, 306
upper sums, 306
variables
change of, 328
variations
of cross-sections, 301
vector
binormal, 187
gradient, 208
principal normal, 187
vector field
curl of a, 415
vector fields, 361
flux of, 392
integrals of, 361
line integrals of, 361
computations of, 362
on manifolds, 412
related to tensor fields, 368
surface integrals of, 363
computations of, 363
vector spaces
bases in, 64
bilinear functions on, 82
Cartesian products of, 67
complementary subspaces in, 66
complementary projections in, 73
coordinate systems in, 74
dimension of, 65
dimension theorem in, 65
dimensions of, 431, 434
direct sums of, 66
finite dimensional, 65
images of subspaces in, 69
inner products on, 95
bilinear functions and, 95
isomorphisms between, 75
linear combinations in, 62
linear functions between, 68
linear maps between, 68
the space of, 68
linear transformations between, 68
linearly independent sets in, 64
projections in, 71
scalar multiplication in, 62
span of a finite set in, 63
subspaces in, 63
vector addition in, 62
velocities, 186
  in flows, 386
    in motions of Euclidean spaces, 186
initial
  in flows, 387
velocity fields, 386
volume multipliers, 117, 325
  and outer normals, 359
determinants as, 326
general, 345
of isometries, 325
of isomorphisms, 325
of linear maps, 344
  of scaling transformations, 325
volumes, 290
  additivity of, 292
change of, 352
Euclidean, 340
in Cartesian products, 294
inner, 295
lower-dimensional, 343
monotonicity of, 293
of cones, 318
of cubes, 292
of cylinders, 318
of ellipsoids, 319
of Euclidean balls, 317
of tetrahedra, 318
of unions of cubes, 293
on subspaces, 343
outer, 295
well-ordering axiom, 13

\mathbb{Z}, 10
