About the IFST Advances in Food Science Book Series xi
List of Contributors xiii

1 Current and Emerging Trends in the Formulation and Manufacture of Nutraceuticals and Functional Food Products 1
Alberta N. A. Aryee and Joyce Irene Boye

1.1 Introduction 1

1.2 Overview, Classification, and Benefits of Nutraceuticals and Functional Foods 2
1.2.1 Characteristics and Properties of Selected Bioactive Ingredients 8
1.2.2 Bioactive Proteins and Peptides 11
1.2.3 PUFAs 14
1.2.4 Phytochemicals and Phytoestrogens 22
1.2.5 Fiber 28
1.2.6 Prebiotics and Probiotics 30

1.3 Production of Nutraceuticals and Functional Foods 31

1.4 Current Formulation Trends and the Modern Marketplace 44

1.5 Conclusion 52
References 52

2 Functional and Sustainable Food – Biophysical Implications of a “Healthy” Food System 65
Meidad Kissinger

2.1 Introduction 65

2.2 Background 66
2.2.1 Land, Water, and Energy – The Biophysical Footprint of “Functional Food” 68

2.3 Functional Food Footprint – The Case of Tomatoes 69
2.3.1 The Carbon Footprint of Tomatoes 70
2.3.2 The Ecological Footprint of Tomatoes 71
2.3.3 Toward a Sustainable System – The Case of Canada’s Tomato Supply System 71
3 Key Considerations in the Selection of Ingredients and Processing Technologies for Functional Foods and Nutraceutical Products 79
   Ashutosh Singh and Valérie Orsat
   3.1 Introduction 79
   3.2 Processing Technologies for Functional Food Bioactive Components and Nutraceutical Products 81
      3.2.1 Soxhlet Extraction 83
      3.2.2 Microwave-Assisted Extraction (MAE) 84
      3.2.3 Supercritical Fluid Extraction 90
      3.2.4 Combined Extraction Process 95
   3.3 Delivery of Nutraceuticals in Food and Its Limitations 98
   3.4 Conclusion 101
   References 101

4 Quality Evaluation and Safety of Commercially Available Nutraceutical and Formulated Products 113
   George Brian Lockwood
   4.1 Introduction 113
   4.2 Contents of Single Components in Formulated Products 115
   4.3 Contents of Active Constituents of Ranges of Nutraceuticals of Complex Composition 131
      4.3.1 Bilberry 131
      4.3.2 Branched-Chain Amino Acids (BCAAs) 131
      4.3.3 Conjugated Linoleic Acid (CLA) 132
      4.3.4 Flaxseed 132
      4.3.5 Grapeseed 132
      4.3.6 Green Tea 133
      4.3.7 Pycnogenol 134
      4.3.8 Resveratrol 134
      4.3.9 Soy Isoflavones 134
   4.4 Bioavailability 135
   4.5 Other Indicators of Quality 137
   4.6 Possible Contaminants in Nutraceuticals 137
   4.7 Safety 138
   4.8 Adverse Effects 138
   4.9 Drug Interactions 140
   4.10 Conclusions 142
   References 142

5 Novel Health Ingredients and Their Applications in Salad Dressings and Other Food Emulsions 151
   Zhen Ma and Joyce Irene Boye
   5.1 Current Developments and Emerging Trends in Food Emulsion Products 151
## CONTENTS

5.2 Emerging and Novel Ingredients in Food Emulsion Products 153  
5.2.1 Fat Replacers and Mimetics 153  
5.2.2 Egg Yolk Replacers 157  
5.2.3 Health Ingredients 163  
5.3 Factors Influencing Physical Characteristics of Salad Dressings and Other Food Emulsions 166  
5.3.1 Rheological Properties 166  
5.3.2 Emulsion Stability 167  
5.3.3 Flavor 170  
5.4 Novel Food Regulations of Salad Dressing and Mayonnaise Products 171  
5.5 Processing of Salad Dressings and Other Food Emulsion Products 171  
5.5.1 Homogenization Device Selection 172  
5.5.2 Desired Attributes of Food Emulsion Products 178  
References 180  

### 6 Processing of Beverages for the Health Food Market Consumer 189  
Garima Goel Lal  

6.1 Introduction 189  
6.2 Consumer Trends in Beverage Consumption and Functional Beverages 190  
6.2.1 Functional Beverage Segments 191  
6.3 Taste Is the Prime Factor in Choosing Food and Beverages 193  
6.3.1 Sweeteners: Finding the Right Balance between Calories and Taste 194  
6.3.2 Stevia-Based Sweeteners Could Hold the Key to Growth in All-Natural, Low-Calorie Functional Beverages 195  
6.3.3 Flavors Need to Offer More than Just Taste 196  
6.4 Regulatory Considerations with Respect to Ingredients and Claims 197  
6.4.1 Beverage Efficacy and Complete Transparency Is Essential 198  
6.5 Desired Functional Benefits and Bioactive Ingredients 198  
6.5.1 Antioxidants 198  
6.5.2 Vitamins and Minerals 199  
6.5.3 Protein 199  
6.5.4 Omega-3 200  
6.5.5 Probiotics 201  
6.5.6 Fiber 201  
6.5.7 Green Tea Extract 201  
6.5.8 Caffeine 202  
6.5.9 Ginseng 202  
6.6 Health Issues Addressable through Functional Beverages 203  
6.6.1 Weight Loss and Management 203  
6.6.2 Diabetes (Type 2) and Heart Health 204  
6.6.3 Energy Boost 204  
6.6.4 Stress Relief 205  
6.6.5 Beauty-Enhancing Claims 205  
6.7 Beverage Processing Technology 205  
6.7.1 Encapsulation 205  
6.7.2 High-Pressure Processing 206
CONTENTS

6.8 Packaging 206
   6.8.1 Package Labeling as a Marketing Tool 206
   6.8.2 Bringing Functional Innovation through Packaging 207
6.9 Other Marketing Considerations 207
6.10 Conclusion 208
References 208

7 Incorporation of Nutraceutical Ingredients in Baked Goods 211
   Mehmet Hayta and Büşra Polat

   7.1 Introduction 211
   7.2 Bakery Products 212
   7.3 Nutraceuticals and Nutraceutical–Incorporated Baked Goods 213
      7.3.1 Polyphenols 213
      7.3.2 Lycopene 214
      7.3.3 Beta-carotene 214
      7.3.4 Dietary Fibre 214
      7.3.5 Resistant Starch 215
      7.3.6 Beta-glucan 216
      7.3.7 Omega-3 217
      7.3.8 Spices and Herbs 217
      7.3.9 Conjugated Linoleic Acids 218
      7.3.10 Olive Oil 219
      7.3.11 Probiotics 219
      7.3.12 Exopolysaccharides 220
      7.3.13 Vitamins 220
      7.3.14 Minerals 221
      7.3.15 Tocopherols 222
      7.3.16 Folic Acid 222
      7.3.17 Proteins, Amino Acids, and Enzymes 222
      7.3.18 Lignans 223
      7.3.19 Legumes 223
      7.3.20 Okara, Honey, and Sesame 224
   7.4 Conclusion 224
   References 225

8 New Technologies in the Processing of Functional and Nutraceutical Cereals and Extruded Products 235
   Yixiang Wang, Fatemeh Bamdad, and Lingyun Chen

   8.1 Introduction 235
   8.2 Cereals and Their Food Applications 236
      8.2.1 Wheat 237
      8.2.2 Rice 237
      8.2.3 Corn 237
      8.2.4 Barley 238
      8.2.5 Oats 238
      8.2.6 Cereal By-products 239
   References 239
CONTENTS

8.3 Novel Technologies in the Processing of Cereal-Based Products 239
  8.3.1 Dry Milling 240
  8.3.2 Extrusion 243
  8.3.3 Enzymatic Treatment 246
  8.3.4 Fermentation 250
  8.3.5 Microparticles and Nanoparticles Based on Cereal Proteins for Nutraceutical Delivery 253
8.4 Future Prospects 258
  References 259

9 Novel Approaches to Enhance the Functionality of Fermented Foods 269
  Emmanuel Y. Anom and Chibuike C. Udenigwe

  9.1 Introduction 269
  9.2 Starter Culture for Fermented Food Production 270
    9.2.1 Bacterial Fermentation of Foods 270
    9.2.2 Fungal Fermentation of Foods 272
  9.3 Functionality of Fermented Foods 272
    9.3.1 Shelf-life Extension 274
    9.3.2 Health Functions 275
    9.3.3 Enhancement of Organoleptic Properties 276
    9.3.4 Nutritional Modification 279
  9.4 Novel Approaches to Enhancing the Functionality of Fermented Foods 280
    9.4.1 Genomics 280
    9.4.2 Metabolic Engineering 281
    9.4.3 Microencapsulation 283
    9.4.4 Optimization of Substrate and Fermentation Conditions 284
  9.5 Conclusion 286
    References 286

10 Impact of Processing on the Bioactivity of Functional and Nutraceutical Ingredients in Foods 295
  Alexandra Dauz and Chang Yong Lee

  10.1 Introduction 295
  10.2 Thermal Processing 296
    10.2.1 Boiling 297
    10.2.2 Steaming 297
    10.2.3 Microwaving 297
    10.2.4 Drying 299
    10.2.5 Roasting 299
  10.3 Non-Thermal Processing 299
    10.3.1 Freezing 300
    10.3.2 High Pressure 300
    10.3.3 Irradiation 300
    10.3.4 Fermentation 301
x CONTENTS

10.3.5 Pulsed Electric Field 302
10.3.6 Reverse Osmosis 302
10.4 Conclusion 302
References 304

11 Encapsulation and Controlled Release Techniques for Administration and Delivery of Bioactive Components in the Health Food Sector 307
Kasipathy Kailasapathy

11.1 Introduction: Health Food Sector 307
11.2 Microencapsulation Technologies Applicable to Bioactive Functional Ingredients and Foods 309
  11.2.1 Encapsulation Procedures 309
  11.2.2 Encapsulation and Controlled Release of Non-microbial Functional Foods 316
  11.2.3 Encapsulation and Controlled Release of Microbial Functional Foods – Probiotics 330
11.3 Future Trends and Marketing Perspectives 335
References 336

12 Role and Importance of Health Claims in the Nutraceutical and Functional Food Markets 347
Alberta N. A. Aryee and Joyce Irene Boye

12.1 Introduction 347
12.2 Nutraceuticals and Functional Foods 348
12.3 Health claims 349
12.4 Conclusion 371
References 371

Index 375
