Introduction 1

Case studies
1: Diagnosis and early management of type 1 diabetes in a young child 29
2: Management of an elderly patient, housebound and living alone 30
3: Gestational diabetes 31
4: Weight loss and improved glycaemic control 32
5: Type 2 diabetes in a child 33
6: Weight reduction 34
7: Improved glycaemic control 35
8: Risk of hypoglycaemia in a patient in a unit for the elderly mentally ill in a nursing home 36
9: Structured education for type 1 diabetes 37
10: Woman with family history of raised cholesterol and diabetes 38
11: Type 1 diabetes in a child 39
12: Poor glucose control with microvascular complications 40
13: Renal failure and cardiovascular disease in an Asian patient 41
14: Type 1 diabetes in a teenage girl concerned about weight 42
15: Glycaemic control through patient empowerment 43
16: Diagnosis and early management of type 2 diabetes in patient with acute coronary syndrome 44
17: Incretin or insulin? 45
18: Type 2 diabetes and pregnancy 46
19: Deterioration of pre-existing diabetes in a patient on low dose quetiapine 47
20: Low HbA₁c and risk of hypoglycaemia 48
21: Rapid changes in glycaemic control and retinopathy 49
22: Type 1 diabetes in a young man moving from paediatric to young adult services  
23: Monitoring glycaemic control: HbA\textsubscript{1c} or fructosamine  
24: Prepregnancy and pregnancy in type 1 diabetes  
25: Maturity onset diabetes of the young, subtype \textit{HNF1A} (\textit{HNF1A}-MODY)  
26: ‘Overtreating’ type 2 diabetes  
27: Diabetes and an elevated triglyceride concentration  
28: Multiple therapies leading to bariatric surgery  
29: Optic neuropathy  
30: Uncertainty around the estimate of average plasma glucose from HbA\textsubscript{1c}  
31: Antipsychotics  
32: Abnormal liver function in a patient with type 2 diabetes  
33: Fructosamine in diabetic nephropathy  
34: Recurrent hypoglycaemia caused by secondary adrenal insufficiency  
35: A patient with diabetes taking niacin  
36: Tight glycaemic control leading to nocturnal hypoglycaemia  
37: Diabetes and iron-deficiency anaemia  
38: Deterioration in vision after commencing insulin treatment: the early worsening phenomenon  
39: Type 1 diabetes – worsening glycaemic control on introduction of a pump?  
40: Monitoring glycaemic control in a patient with sickle cell trait  
41: Balancing fear of hypoglycaemia with optimal control in pregnancy  
42: Asian patient with high-risk feet and suboptimal glycaemic control  
43: Type 2 diabetes and polycystic ovarian syndrome  
44: Impact of variant haemoglobin AC on HbA\textsubscript{1c} determination  
45: Diabetic nephropathy
