INDEX

A
ACBs (air circuit breakers), 37
Acceleration-deceleration times, 86
AC (alternating current) power:
  formulas, 215
  for transformers, 22–23
  widespread use of, 1
Actual speed, theoretical vs., 66–67
Actual voltage, 2
ACV (alternating current voltage), 146–147
AFCI (arc fault circuit interrupters), 53–54, 59–60
Air circuit breakers (ACBs), 37
Alarms, 263. See also Fire alarm systems
ALCA (appliance leakage current interrupter), 54
Alphanumeric keypads, 163
Alternating current power, see AC power
Alternating current voltage (ACV), 146–147
Aluminum, 251
Ambient temperature, 67
American National Standards Institute (ANSI):
  ballasts, 119
  switchgear, 31, 38
American Wire gauge (AWG), 8
Ammeter (amp-meter), 3, 6, 151–152
Ampacity, 8
Amperage-current formulas, 191–193, 201
Amperes (amps), 2
Ampere ratings, 44
ANSI, see American National Standards Institute
Appliance leakage current interrupter (ALCA), 54
Arc fault circuit interrupters (AFCI), 53–54, 59–60
Arc-resistant switchgear, 39–40
ATS (automatic transfer switches), 16, 17
Audio speakers, 177–179
Automatic transfer switches (ATS), 16, 17
Auto ranging meters, 147–148
AWG (American Wire gauge), 8

B
Ballasts, 111, 119–122
Bandwidth, 186
BAS (building automation systems), 113
Basic insulation level (BIL), 24
Bearing lubrication frequency, 274
BIL (basic insulation level), 24
Biometric data, 164
Black box concept, 89–92
Black-start operation, 16
Bolt torque, 284
Bonding, grounding vs., 103
Box fill, 257
Breakaway torque, 81
Brick programmable logic controllers, 92
Building automation systems (BAS), 113
Bullers, 1
Bus bars, 34–37
Byte, 97

C
Cable insulation types, 337–343
Capacitance formulas, 194
Capacitive circuits, 5
Capacitive reactance, 4–6
Capacitors, 121, 149
Carbon brushes, 193
Cast coil (molded epoxy sealing) transformers, 29
Cause:
  determination of, 161
  effect vs., 158
CFLs (compact fluorescent lamps), 119
CI (circuit integrity) cables, 170
Circuit breakers, 263. See also Overcurrent protective devices
Circuiting, 269
Circuit integrity (CI) cables, 170
Circuit protective devices, 3, 9, 37–38
Circular mil (CMIL), 195, 291, 292
Clamp-on amp meters, 151–152
Class A fire alarm circuits, 166
Class B fire alarm circuits, 167
CMIL, see Circular mil
Coaxial cables, 177
Coils:
  as outputs, 95
  symbols, 265
  in transformers, 21–23
COM (variable frequency drive), 83
Compact fluorescent lamps (CFLs), 119
Computer voice and data wiring systems, 171–189
computer as island, 172–182
computer on a wired network, 183–184
computer on a wireless network, 184–186
hot swapping signal cables, 171–172
overview, 171
telephone voice communications systems, 187–189
types of networks, 186–187
Conductivity, 262
Conductors, 3, 253–261
  circular mil values, 291, 292
  color codes, 293
  dynamic friction, 289
  for fire alarm systems, 170
  grounding of, 107–108
impedance of, in a conduit, 200
insulation resistance
  mega-ohm reading, 287
insulation types, 337–343
jamming ratio, 289
mega-ohm value temperature
correction, 287
minimum bend radius, 290–291
Conductor ampacity, 251, 260–261
Conductor capacitance leakage, 103
Conductor cross-sectional area, 195
Conductor resistance, 195, 260
Conduits, 103, 200
Consumer units (CUs), 45
Contactors, 263
Continuous current ratings, 38–39
Control devices, 136, 138–140
Controlled contacts, 131
Copper, 258, 286–290
Cost of power due to voltage drop, 213
Count-down counters, 96
Counters, 96
Count-up counters, 96
Crossover cables, 183
CTs (current transformers), 101
CUs (consumer units), 45
Current, 3
  decreasing, 62–63
  formulas, 191–193, 201, 203–204, 210
Current ratings, 38–39
Current transformers (CTs), 101

D
DC bus (variable frequency drive), 83
DC (direct current) motors, 266
DC (direct current) power:
  formulas, 195–198, 215
  measuring voltage of, 146–147
  voltage, 1
Delta-connected transformers, 246–247
Desktop computers:
  island setup for, 172–182
  on wired networks, 183–184
  on a wireless network, 184–186
Diagrams, see Electrical diagrams
Dictation software, 179, 181
Dielectric strength, 68
Digital multimeters (DMMs), 145, 147. See also specific types
Digital video interface (DVI) connectors, 172
Distributed generation, 19
Dragon NaturallySpeaking, 179
Driven load requirements, 237
Driven pitch diameter, 211
Driven RPM, 211
Driver RPM, 211
“Dry contacts,” 130
Dry-type single-phase control
circuit transformers, 29
“Earthing,” 101
Edison base, 117–118
EEMAC (Electrical Equipment Manufacturers Association of Canada), 39
Effect, cause vs., 158
EGC (equipment grounding conductor), 56, 107
802.11 standard, 185–186
ELCI (equipment leakage circuit interrupter), 55
Electrical diagrams, 135–143
examples, 238–245, 249–251, 336
ladder diagrams, 135–141
one-line diagrams, 142–143, 336
symbols, 263
Electrical Equipment Manufacturers Association of Canada (EEMAC), 39
Electrical power, 24–25
Electrical power generators, 17
Electrical services, 99–109
bonding vs. grounding, 103
fault current path, conduits, and locknuts, 103
grounding of conductors, 107–108
grounding overview, 101–103
low and high impedance grounded systems, 104
metering equipment, 101
second ground fault, 106
separately derived systems, 108
separating grounded system conductor and equipment grounding conductor, 106–107
standard voltages, 108–109
ungrounded electrical systems, 104–106
Electrical service drop clearance, 272
Electrical switchgear, 31–40
arc-resistant, 39–40
bus bar and circuit breaker arrangements, 34–37
continuous current ratings, 38–39
low-voltage power distribution, 33–34
metal-clad, 38
motor control center, 31–34
optional protective devices, 37–38
primary functions, 32–33
Electrical symbols, 235–236, 263–270, 336
Electrical system variables, 226
Electrical test instruments, 3, 145–152
auto function features, 148–149
auto ranging meters, 147–148
clamp-on amp meters, 151–152
meg-ohmmeters, 151
multimeters, 146–147
ohmmeters, 149–150
terminology, 145–146
three-step method, 148
Electrical values, 197–198
Electricity:
circuit protective devices, 3, 9
defined, 1
power factor, 3–7
three-phase power, 6–8
Electromotive force (EMF), 2
Emergency power generation systems, 18
Emergency source wiring and switching, 248
EMT, 286
Encapsulated (sealed) transformers, 28
Enclosure (variable frequency drive), 82
Energy, 113
Equipment grounding conductor (EGC), 56, 107
Equipment leakage circuit interrupter (ELCI), 55
Ethernet cables, 183–185, 293
External audio speakers, 177–179
External inputs (variable frequency drive), 83

F
Facilities access control, 163–164
Fans, ventilation, 63
Fault current path, 103
Final distribution boards, 33
Fire alarm systems, 164–170
alarm signals, 165–166
conductors for, 170
human machine interfaces, 167–168
notification circuit voltage drop, 169
symbols, 266
system monitoring, 166–167
Fixture wire DC resistance, 343
FLA, see Full load amperage
Flexible cords, 294–335
Floor plans, 167, 168
Fluorescent ballast, 119–120
Fluorescent lamps, 111, 119
Foot candle (fc) measurement, 112
Frequency, 1, 86
Frequency avoidance, 86
Full load amperage (FLA), 73, 77–78, 151
Fuses, 9, 48–50, 198

G
Gas discharge lamps, 118–119
Gas-insulated circuit breakers, 37, 48
Gen-sets, 17
GFCI (ground fault circuit interrupter) devices:
classes, 55
history and nomenclature, 56–57
troubleshooting, 57–58
GFCs (ground fault circuits), 54
GFPE (ground fault protective equipment), 55, 56
Glare, 116
Gloves, 149
Graphic layouts, 167, 168
Ground fault circuit interrupters devices, *see* GFCI devices

Ground fault circuits (GFCs), 54

Ground fault protective equipment (GFPE), 55, 56

Grounding:
- bonding vs., 103
- of conductors, 107–108
- conductor size, 252
- low and high impedance grounded systems, 104
- overview, 101–103
- second ground fault, 106
- separating grounded system conductor and equipment grounding conductor, 106–107
- transformers, 26

Ground rod, 103

**H**

Hand-Off-Auto (H-O-A), 139, 141

Heat produced in conductor per watt, 199

Heat transfer, 8

High impedance grounded systems, 104

High-intensity discharge (HID) ballasts, 120

High-intensity discharge (HID) lamps, 120

High-pressure sodium lamps, 120

HIT (human intelligence task), 158, 175

HMI (human machine interfaces), 167–168, 172

H-O-A (Hand-Off-Auto), 139, 141

Horsepower, 2, 205–207, 210

Hot swapping, 171–172

Hubs, network, 186

Human intelligence task (HIT), 158, 175

Human machine interfaces, 172

Human machine interfaces (HMIs), 167–168, 172

**I**

ICCBs (insulated case circuit breakers), 47

IC (internal combustion) engines, 17

IC (integrated circuit) microcontrollers, 127

IEC, *see* International Electrotechnical Commission

IEE, 38

IEEE, 31

IES (Illuminating Engineers Society), 111, 116

IGBTs (insulated gate bi-polar transistors), 83–84

Igniters, 121

Illuminance, 114–115. *See also* Light fixtures

Illuminating Engineers Society (IES), 111, 116

Immersion detection circuit, 55

Impedance, 5, 104

formulas, 199–200
transformer, 226
Incandescent lamps, 117, 118
Indoor lighting, 112
Inductive, 23
Inductive reactance, 4–6
Inputs and outputs:
programmable logic controllers, 89–90, 92–95, 97
on timers, 123, 124
Inrush current, 81
Institute of Electrical and Electronics Engineers, 185
Insulated case circuit breakers (ICCBs), 47
Insulated gate bi-polar transistors (IGBTs), 83–84
Insulation classes, 68
Insulation material, 8, 25–26, 103
Insulators, 3
Integrated circuit (IC) microcontrollers, 127
Interconnected production systems, 19–20
Internal combustion (IC) engines, 17
International Electrical Testing Association (NETA):
circuit protective devices, 51
meg-ohmmeters, 151
International Electro Technical Commission (IEC), 9, 31, 36, 61
Internet, 187
Interrupters, 55
Interval on mode timers, 129
Interval timers, 125
Inverter (variable frequency drive), 83–84
Inverter-converter (variable frequency drive), 83
Ionization-type smoke detectors, 164
Island operation, 16

J
Jogging frequency, 86

K
Keyboards, computer, 172, 175
Key pad (variable frequency drive), 83
Kilowatt-hours (KWH), 2
Klein’s pliers, 188
KVA to amps formula, 201
KW to amps formula, 201

L
Ladder diagrams, 135–141
Lamps, see Light fixtures
LANs (local area networks), 186–187
LCDs (liquid crystal displays), 167, 168
Leakage current detection interrupters (LCDI), 55
Leather work gloves, 149
LED (variable frequency drive), 83
LEDs (light emitting diodes), 167, 168
Legally required standby systems, 18–19
Light emitting diodes (LEDs), 167, 168
Light fixtures, 111–122
  applications of, 112
  ballasts, 111, 119–122
  in commercial and industrial facilities, 113
  design, 112–113
  electric light distribution curve, 278
  fluorescent lamps, 111, 119
  gas discharge lamps, 118–119
  glare, 116
  high-intensity discharge lamps, 111, 120
  high-pressure sodium lamps, 120

  incandescent lamps, 117, 118
  lamp selection, 116–117
  light reflected from wall and ceilings, 279
  mercury vapor lamps, 120, 285
  metal halide lamps, 120
  operating controls, 117
  pattern of illuminance, 114–115
  performance, 113–114
  photocells, 117, 118
  symbols, 270
  wiring diagrams, 281–283
Lightmeter, 113, 114
Lightning surges, 102
Liquid crystal displays (LCDs), 167, 168
Loads, 17–18, 138–139, 237
Load centers, 33
Local area networks (LANs), 186–187
Locked rotor amp (LRA), 84
Locknuts, 103
Low impedance grounded systems, 104
Low-voltage power circuit breakers (LVPCBs), 47
Low-voltage power distribution, 33–34
LRA (locked rotor amp), 84
Lux (lx) measurement, 112
LVPCBs (low-voltage power circuit breakers), 47

M
Magnetic ballasts, 119
Magnetic element, 9
Magnetic fields, 62, 151
Magnetic only circuit breakers (MCP), 37
Magnetic-stripe card systems, 163
Main switchboard, 33
Maintenance, 51, 52
Mass notification system (MNS), 169
MCBs (miniature circuit breakers), 45
MCCs (motor control centers), 11, 31–33
MCCBs (molded case circuit breakers), 9, 43–45
MCP (magnetic only circuit breakers), 37
MCPs (motor circuit protectors), 43
Mega-ohm value temperature correction, 287
Meg-ohmmeters, 151
Memory (programmable logic controllers), 97
Mercury vapor lamps, 120, 285
Metal box:
  bonding, 273
  maximum conductor fill, 255–256
Metal-clad switchgear, 11, 38
Metal halide lamps, 120
Meters, 101. See also specific types
Meters raceways, 265
Microphones, 179–181
Microscopes, 181, 182
Miniature circuit breakers (MCBs), 45
MNS (mass notification system), 169
Modular inputs and outputs, 93
Modular programmable logic controllers, 92
Mogul base, 120
Molded case circuit breakers (MCCBs), 9, 43–45
Molded epoxy sealing (cast coil) transformers, 29
Motors:
  formulas, 201–215
  lubrication for ball-type bearings, 275
  requirements, 237
  single-phase, 203, 205
  three-phase, see Three-phase motors
Motor amps, 204
Motor circuit protectors, 47
Motor circuit protectors (MCPs), 43, 47
Motor control centers (MCCs), 11, 31–33
Motor-driven load speed, 211
Motor-generators, 17
Motor starters:
  components, 71–72
  full voltage, 73
  methods, 73
  operations, 73–76
  sizes, 72–73
  three-wire control circuit controlling, 76–77
Mouse, computer, 175, 177
Multimeters, 146–147. See also specific types
Multipole circuit breakers, 44

N
NAC (notification appliance circuit), 167
National Electrical Manufacturers Association (NEMA):
  meg-ohmmeters, 151
  motor frame dimension designations, 275
  motor starter standards, 72, 78
  motor T-frame dimensions, 276–277
  switchgear, 31, 34, 36
National Electrical (continued)
three-phase motors, 61
transformers, 26, 29
National Electric Code (NEC),
8, 9
conduits, 103, 200
electrical services, 99
emergency power generation
systems, 18
fire alarm systems, 170
motor sizing, 77
personnel protective devices,
53, 55, 56, 59–60
switchgear, 35
transformers, 26, 29
National Fire Protection Associa-
tion (NFPA):
circuit protective devices, 51
fire alarm systems, 164, 167,
170
mass notification systems,
169
NC (normally closed)
connections, 14
NEC, see National Electric Code
NEMA, see National Electrical
Manufacturers Association
NETA (International Electrical
Testing Association):
circuit protective devices, 51
meg-ohmmeters, 151
Network hubs and switches, 186
Network interface cards (NICs),
183
NFPA, see National Fire
Protection Association
Nominal torque rating, 205
Nominal voltage ratings, 2
Nonplenum cables, 170
Normally closed (NC)
connections, 14
Notification appliance circuit
(NAC), 167
No voltage release circuit, 77

O
Observation (troubleshooting),
159
OCPDs, see Overcurrent
protective devices
Off-delay timers, 95–96,
125–126, 128–129
Ohms, 3
Ohmmeters, 149–151
Ohm’s law, 6, 7, 24
Oil circuit breakers, 37, 48
On-delay timers, 95–96, 125–126,
128
