Contents

Preface vii

1 Basic Design Considerations 1
2 Further Design Considerations 29
3 Binary Outcomes 41
4 Ordered Categorical Outcomes 55
5 Continuous Outcomes 67
6 Rate Outcomes 83
7 Survival Time Outcomes 99
8 Paired Binary, Ordered Categorical and Continuous Outcomes 117
9 Confidence Intervals 137
10 Repeated Outcome Measures 157
11 Non-Inferiority and Equivalence 169
12 Cluster Designs 195
13 Stepped Wedge Designs 215
14 More than Two Groups Designs 229
15 Genomic Targets and Dose-Finding 239
16  Feasibility and Pilot Studies  

17  Therapeutic Exploratory Trials: Single Arm with Binary Outcomes  

18  Therapeutic Exploratory Trials: Survival, Dual Endpoints, Randomised and Genomic Targets  

19  The Correlation Coefficient  

20  Observer Agreement Studies  

21  Reference Intervals and Receiver Operating Curves  

22  Sample Size Software  

Cumulative References
