Index

A

ABB (Sweden), 94–95
Accelerators, 188
Account manager role: "bow-tie" problem of, 53–54; facilitating interaction, 54; four problems of, 52–53; structure of, 51ff
Active leadership design principle, 24
Agrawal, N., 35
Agrawal, V., 35
AIDS virus research (1980s), 169
Alignment: of rewards to lead managers, 136; segment and product line spreadsheet for goal, 65–66ff; as Star Model fundamental, 3–4
Ambidextrous organizations, 181
AOL, 148
Are You Ready for a Matrix? tool, 140
Ashby, W. R., 5, 23
Assessing Your Innovation Capabilities tool, 181
B

Bartlett, C., 73, 102, 138
Beech, 7
Behaviors: desired competencies and, 22–23; matrix rewards tied to, 136; as reward system consideration, 22
Bennis, M. J., 181
“Best practices” determination, 114–115
Black & Decker, 90–91ff
BMW, 144
Bondi, R., 174, 196
"Bow-tie" problem, 53–54ff
Breakthrough growth, 173–174
Breakthrough innovation: MeadWestvaco Specialty Chemicals Division (SCD), 181–201; Star Model used for designing, 181ff
Breakthrough innovation people practices: competencies of, 199–200; insiders versus outsiders, 199; SCD approach to, 200–201
Breakthrough innovation processes: executive sponsor of, 194; networks to generate ideas, 190–192; project selection, 192; project teams, 192–194; SCD process changes, 194–196

Breakthrough innovation reward system: measuring results, 197; motivation and compensation, 197–198; SCD reward mechanisms, 198; tolerating balance, 196
Breakthrough innovation structure: accelerators of, 188; erring on side of separation, 185–187; leveraging assets of, 187–188; matching strategy to, 184–185ff; reporting level of, 188–189; SCD growth, 189ff
Bright, J. K., 175, 185
British Petroleum, 87
Bryan, J. J., 20
Burgelman, R. A., 185
Burns, K., 36
Business life cycle, 80
Business model, 6
Business portfolio: definition of, 6; diversity of, 145–147; valuing diversity of, 147ff; innovation capabilities applied to, 180; understanding the, 144–145
Business unit (or profit center): co-creation processes of, 170–171; definition of, 6; distributing power between geographic and, 95ff; front-end structures as, 82

Campbell Soup Company, 7
Capabilities: characteristics of, 7; customer-centric, 41–42ff; definition of, 6; identification of, 8; innovation, 176–181; translating strategy into, 8–9, 95ff
Caterpillar, 12, 157–158
Cemex (Mexico): background information on, 69, 76; coordination model of, 84–85ff; geographic division with matrixed functions, 76–77ff; people practices of, 87–89; postmerger integration (PMI) of, 83; processes of, 83–87; reward system of, 87; simplified diagram of structure, 77ff; structure of, 76–83; transportability of products by, 93–94
Centralization—decentralization balance: approach for creating, 163–164; distributed model of, 166–167ff; people practices of, 171–172; processes of, 187–171; reward system of, 171; Star Model used for, 164ff; structure of, 165–167ff

Face-to-face meetings, 130
Fidelity Investment, 37–38
Flexibility: avoiding stress through personal; 115–116; as matrix benefit, 112
Ford “world car” goal, 115
Fortune, J. H., 70
Front-back structure: customer-centric intensive, 95ff; description and characteristics of, 16, 63–64; organized around multiple dimensions, 63ff; people practices in, 67–68; processes in, 64–67; reward systems in, 87. See also Structure
Front-end structure, 64–65
Functional manager, 103
Functional structure: different types of, 10–11; scale element of, 10
Geographic international organization: Cemex (Mexico) example of, 76–89; international strategy level of, 72ff, 73; Star Model application to, 74–75ff
Geographic people practices: expatriates, 87–88; local nationals, 86–87; rotational assignments and development, 89
Geographic processes: gaining benefits of size by leveraging the home country, 84–86; leveraging regional groups, 86–87; listening and learning by the home country, 83–84; transferring advantages to the geographies, 83
Geographic reward systems, 87
Geographic structure: benefits of, 77–78; Cemex’s, 76–77ff; country autonomy issue of, 83–85; definition of, 13–14; determining rationale for clusters within, 79–80; distributing power between business units and, 92ff–93; division and regional management roles in, 80–81; examples and applications of, 14ff; as international organization design consideration, 74–89; as international strategy level, 73; standardization of structures across geographies, 78–79

L
Organization design: areas directly impacting, 203–205; for breakthrough innovation, 181–201; centralization—decentralization dilemma of, 141–172; customer-centric intensive, 57–68; customer-centric light, 43–48; customer-centric medium, 49–56; definition of, 1–2; geographic, 74–89; multinational network, 89–103; principles of, 23–25; project of changing the, 203; transnational, 105–108. See also Star Model.

Organizational change: “breaking down the silos” theme of, 16–17; design process and management of, 204–205; Strategy Locator to determine level of, 68

Organizational culture: centralization and after acquisition, 156; cultural distance issue, 92; described, 3; organizational decision making: centralization impact on, 154–155; 160; centralization—decentralization balance and, 166; complementary systems theory on, 4; contingency theory on, 4; corporate center building infrastructure supporting, 150; decentralization and speed, 157–158; design and framework used for, 203–204; matrix resulting in decision strangulation, 115; RAVCI of, 122–123; Star Model framework for, 2–5, 25

Organizational design principles: active leadership, 24; coherence and not uniformity, 24; complementary sets of choices, 23; evolve, do not install, 24–25; managing interfaces clear, 25; organize rather than reorganize, 25; reconfigurability, 24; requisite complexity, 23; start with the lightest coordinating mechanism, 25

Organizations: ambidextrous, 181; functional structures of, 10–113; misalignments between strategy and, 148–149; multidimensional, 10; networks within, 17–18; organic growth of, 173–174; processes of, 16–21; product structure of, 31–135; regulatory compliance by, 150–155.
