TROUBLESHOOTING
If you have difficulty using any of the materials on the companion DVD, try the following solutions:

- Turn off any anti-virus software that you may have running. HTML files sometime mimic virus activity and can make your computer incorrectly believe that it is being infected by a virus. (Be sure to turn the anti-virus software back on later.)
- Close all running programs. The more programs you’re running, the less memory is available to other programs.
- Reboot if necessary. If all else fails, rebooting your machine can often clear any conflicts in the system.

CUSTOMER CARE
If you have trouble with the DVD-ROM, please call the Wiley Product Technical Support phone number at (800) 762-2974. Outside the United States, call 1(317) 572-3994. You can also contact Wiley Product Technical Support at http://support.wiley.com. John Wiley & Sons will provide technical support only for installation and other general quality control items. For technical support of the applications themselves, consult the program’s vendor or author.
