Foreword by Giuliano Digilio xi
Preface xiii
Acknowledgements xv

**Chapter A – BS 7671:2008 Amd No. 1:2011 Requirements for Electrical Installations – Introduction and Overview**  1
A 1 Introduction to BS 7671:2008 1
A 2 Plan and layout of BS 7671:2008 2
A 3 Overview of major changes 5
A 4 Amendment No. 1:2011 9

**Chapter B – Legal Relationship and General Requirements of BS 7671:2008 Amd No. 1:2011**  11
B 1 Legal requirements and relationship 11
B 1.1 Key legal UK legislation 11
B 1.2 The Electricity at Work Regulations 1989 (EWR 1989) 12
B 1.3 The Electricity Safety, Quality and Continuity Regulations 2002 (as amended) 13
B 1.4 The Electricity Act 1984 (as amended) 14
B 1.5 The Building Act 1984, The Building Regulations and Part P 14
B 1.6 The Electromagnetic Compatibility Regulations 2006 15
B 1.7 Tort and negligence 15
B 2 The role of Standards 17
B 3 Part 3 of BS 7671:2008 – assessment of general characteristics 18

**Chapter C – Circuitry and Related Parts of BS 7671:2008 Amd No. 1:2011**  21
C 1 Introduction 21
C 2 Design procedure overview 21
Contents

C 3 Load assessment
  C 3.1 Principles and definitions
  C 3.2 Maximum demand assessment
  C 3.3 Diversity

C 4 Circuitry design
  C 4.1 Introduction
  C 4.2 Protection against overcurrent in general
  C 4.3 Overload protection
  C 4.4 Fault protection
  C 4.5 Voltage drop
  C 4.6 Disconnection and electric shock protection

C 5 Sub-mains
  C 5.1 Diversity
  C 5.2 Distribution circuit (sub-main) selection
  C 5.3 Armouring as a CPC
  C 5.4 Automatic disconnection for sub-mains

C 6 Discrimination co-ordination
  C 6.1 Principles and system co-ordination
  C 6.2 Fuse-to-fuse discrimination
  C 6.3 Circuit breaker to circuit breaker discrimination
  C 6.4 Circuit breaker to fuse discrimination

C 7 Parallel cables
  C 7.1 General and BS 7671 requirements
  C 7.2 Unequal current sharing

C 8 Harmonics
  C 8.1 Requirements
  C 8.2 Harmonic assessment

C 9 Standard final circuit designs
  C 9.1 Introduction and scope
  C 9.2 Standard domestic circuits
  C 9.3 All purpose standard final circuits

C 10 RCDs and circuitry
  C 10.1 Introduction – increased use of RCDs
  C 10.2 Consumer unit arrangements for RCDs

C 11 Ring and radial final circuits
  C 11.1 Introduction
  C 11.2 Ring final circuits
  C 11.3 Radial final circuits

Chapter D – Selection and Erection – Equipment

D 1 Introduction and fundamentals
D 2 Compliance with Standards
D 3 Identification of conductors – introduction
  D 3.1 Principle of required identification (Regulation 514.3.1)
  D 3.2 Identification by colour
Contents

D 3.3 Identification by marking 85
D 3.4 Alterations and additions – identification 85
D 3.5 Interface marking 85
D 3.6 DC identification 86
D 4 Protection against voltage and electromagnetic disturbance 86
D 4.1 General 86
D 4.2 Electromagnetic compatibility and prevention of mutual detrimental influences 88
D 5 Wiring systems 95
D 5.1 The choice of wiring systems 95
D 5.2 Circulating currents and eddy currents in single-core installations 98
D 5.3 Electrical connections and joints 100
D 5.4 Wiring systems – minimizing spread of fire 104
D 5.5 Proximity to other services 106
D 6 Circuit breakers 106
D 6.1 General 106
D 6.2 Operation and characteristics 107
D 6.3 Ambient temperature de-rating 110
D 7 Residual current devices 111
D 7.1 BS 7671 applications 111
D 7.2 Operation and BS 7671 requirements 112
D 7.3 Unwanted RCD tripping and discrimination 113
D 7.4 d.c. issues for RCDs 115
D 7.5 TT installations and RCDs 115
D 8 Other equipment 116
D 8.1 Isolation and switching 116
D 8.2 Consumer units for domestic installations 116
D 8.3 Overvoltage, undervoltage and electromagnetic disturbances 116
D 8.4 Surge protective devices 118
D 8.5 Insulation monitoring devices (IMDs) 118
D 8.6 Residual current monitors (RCMs) 119
D 9 Generating sets 121
D 10 Rotating machines 121
D 11 Plugs and socket-outlets 122
D 12 Electrode water heaters and electrode boilers 123
D 13 Heating conductors 124
D 14 Lighting and luminaires 124
D 15 Safety services 127
D 15.1 Introduction 127
D 15.2 Classification of break times 127
D 15.3 Safety sources 127
D 15.4 Circuits for safety services 127
D 16 Ingress protection (IP), external influences 129
D 16.1 General 129
D 16.2 Equipment applications and examples 131

Chapter G – Special Locations

G 1 Introduction purpose and principles
   G 1.1 Introduction
   G 1.2 Purpose and principles
   G 1.3 Particular requirements and numbering

G 2 Locations containing a bath or shower (701)
   G 2.1 Introduction and risks
   G 2.2 Zone concept
   G 2.3 Electric shock requirements
   G 2.4 Equipment selection and erection

G 3 Swimming pools and other basins (702)
   G 3.1 Introduction and risks
   G 3.2 Zone concept
   G 3.3 Requirements and guidance

G 4 Agricultural and horticultural premises (705)
   G 4.1 Introduction, purpose and principles
   G 4.2 Requirements and guidance

G 5 Caravan parks and camping parks (708)
   G 5.1 Introduction purpose and principles
   G 5.2 Requirements and guidance

G 6 Medical locations (710)
   G 6.1 Introduction and risks
   G 6.2 Medical groups and class of safety service supply
   G 6.3 Requirements

G 7 Exhibitions, shows and stands (711)
   G 7.1 Introduction and risks
   G 7.2 Requirements and guidance

G 8 Solar photovoltaic (PV) power supply systems (712)
   G 8.1 Introduction principles and terminology
   G 8.2 Requirements
   G 8.3 Notes and guidance

G 9 Mobile or transportable units (717)
   G 9.1 Scope and application
   G 9.2 Requirements
   G 9.3 Notes and guidance

G 10 Floor and ceiling heating systems (753)
   G 10.1 Introduction
   G 10.2 Requirements
   G 10.3 Notes and guidance
