## Contents

*Foreword*  
*Introduction*  

**Part I: Measuring Success**  
**Chapter 1** Why Understanding Your Web Traffic Is Important to Your Business  
Website Measurement—Why Do This?  
Information Web Analytics Can Provide  
Where to Start  
Decisions Web Analytics Can Help You Make  
The ROI of Web Analytics  
How Much Should I Invest in This?  
How Web Analytics Helps You Understand Your Web Traffic  
Where Web Analytics Fits In  
How Is Google Analytics Different?  
Targeting Digital Marketers Rather Than IT Departments  
Where to Get Help  
Resources Provided by Google (Free)  
Non-Google Resources (Free)  
Official Google Analytics Certified Partners (Paid)  
Summary  

**Chapter 2** Available Methodologies and Their Accuracy  
Page Tags and Logfiles  
Cookies in Web Analytics  
Understanding Web Analytics Data Accuracy  
Issues Affecting Visitor Data Accuracy for Logfiles  
Issues Affecting Visitor Data from Page Tags  
Issues Affecting Visitor Data When Using Cookies  
Comparing Data from Different Vendors  
Why PPC Vendor Numbers Do Not Match Web Analytics Reports  
Data Misinterpretation: Lies, Damned Lies, and Statistics  
Improving the Accuracy of Web Analytics Data  
Privacy Considerations for the Web Analytics Industry  
Types of Private Information  
The EU Privacy Law  
Summary  

COPYRIGHTED MATERIAL
Chapter 3  Google Analytics Features, Benefits, and Limitations

Key Features and Capabilities of Google Analytics .......................... 54
Standard Features 54
Advanced Features 59

How Google Analytics Works.................................................. 63
The Google Analytics Tracking Code 63
What Is Not Tracked by Default 65
The Default Attribution Model 67
Google Analytics Limits 68

What Google Analytics Does Not Do ....................................... 70
Service-Level Agreement 70
Indefinite Data Retention 70
Provide Professional Services 71
Data Reprocessing 71
Bid Management 72
Import Third-Party Data 72
Per-Visitor Tracking (against Google Policies) 72

What Is Google Analytics Premium? ......................................... 73
Comparing Google Analytics Premium versus Free 75

Google Analytics and Privacy ............................................... 77
Common Privacy Questions 79

What Is Urchin? ................................................................. 82
Differences between Google Analytics and Urchin 83
Urchin Advantages 84
Criteria for Choosing between Google Analytics and Urchin 85

Summary ................................................................................. 86

Part II  Using Google Analytics Reports

Chapter 4  Using the Google Analytics Interface

Discoverability and Initial Report Access ................................. 90
Navigating Your Way Around: Report Layout ......................... 92
Dimensions and Metrics 94
The Data Table 94
Date Range Selector 96
Aggregate Summary Metrics 97
Chart Options 98
Changing Table Views 101
Plotting Multiple Rows 105
Secondary Dimensions 105
Changing the Displayed Dimension 106
Table Sorting 106
Table Search 108
Table Filters (Advanced) 109
Chart Display and Annotation 110
Report Sections 112
Tabbed Views 112
### Table of Contents

**Chapter 5  Reports Explained**  
117

- The Home Overview .................................................. 118
- Real-Time Reporting .............................................. 118
- Intelligence Events ................................................. 119
- Flow Visualization ................................................. 126
- Dashboards ............................................................. 129

- Top Standard Reports ................................................. 132
- Multi-Channel Funnels ............................................. 132
- Social Interactions .................................................. 138
- Visitors: Location ...................................................... 138
- E-commerce: Overview Report .................................. 140
- Motion Charts ......................................................... 141
- Goal and Funnel Reports ........................................... 144
- Visitor: Mobile Report .............................................. 146
- Traffic Sources: Search Engine Optimization .................. 147
- AdWords: Campaigns ............................................... 149
- AdWords: Keyword Report ......................................... 151
- AdWords: Matched Queries Report ............................... 152
- AdWords: Keyword Positions Report ............................ 153
- Content: Navigation Summary .................................... 154
- Content: Site Speed .................................................. 156
- Site Search: Usage Report .......................................... 157
- Content: In-Page Analytics .......................................... 158

Understanding Report Sampling .................................. 160

Summary ........................................................................ 162

**Part III  Implementing Google Analytics**  
163

**Chapter 6  Getting Started: Initial Setup**  
165

- Creating Your Google Analytics Account ....................... 166
- General Account Information ..................................... 168
- Configuring Data-Sharing Settings ............................... 169
- Accepting the Terms of Service .................................. 169

Tagging Your Pages ..................................................... 170

Understanding the Google Analytics Tracking Code .......... 170

Deploying the GATC—Tagging Pages ............................... 173

Back Up: Keeping a Local Copy of Your Data ................... 176

Using Accounts, Web Properties, and Profiles ................. 179

Creating a New Profile ................................................ 180

Creating a New Web Property ....................................... 182

Creating a New Account .............................................. 183
Roll-up Reporting 184
Choosing between Roll-up Reporting and Multiple Profiles or Multiple Web Properties 186
Agencies and Hosting Providers: Setting Up Client Accounts 186
Integrating with Your AdWords Data 188
Testing after Enabling Auto-Tagging 191
Integrating with Your AdSense Data 192
Integrating with Your Webmaster Tools Data 194
Integrating with Feedburner 195
Tracking Mobile Visitors 198
Server-Side Tracking for Mobile Sites 199
Common Pre-implementation Questions 200
Summary 205

Chapter 7 Advanced Implementation 207

_trackPageview: the Google Analytics Workhorse 208
Tracking Unreadable URLs with Virtual Pageviews 209
Tracking File Downloads with Virtual Pageviews 211
Tracking Partially Completed Forms with Virtual Pageviews 212
Virtual Pageviews versus Event Tracking 213
Tracking E-commerce Transactions 213
Capturing Secure E-commerce Transactions 214
Transactions via a Third-Party Payment Gateway 218
What to Do When a Third-Party Gateway Does Not Allow Tracking 220
Tracking Negative Transactions 222
Campaign Tracking 223
Adding Campaign Parameters to Your Landing Page URLs 225
Creating Custom Campaign Fields 234
Event Tracking 236
Setting Up Event Tracking 237
The _trackEvent Function 237
Defining Your Event Reporting Structure 239
Tracking Flash Video and Animation as Events 243
Tracking Banners and Other Outgoing Links as Events 248
Tracking Mailto: Clicks as Events 249
Tracking Embedded Video from YouTube 249
Customizing the GATC 251
Subdomain Tracking 252
Multiple Domain Tracking 255
Controlling Time-Outs 260
Setting Ignore Referrer Preferences 261
Site Speed Sample Rate 262
Anonymize IP Addresses 263
Sampling: Controlling Data Collection 264
Summary 265
Chapter 8  Best Practices Configuration Guide

Initial Configuration ...................................................... 268
Setting the Default Page ............................................. 268
Excluding Unnecessary Parameters ............................... 269
Currency Setting .......................................................... 270
Enabling E-commerce Reporting ................................... 270
AdWords Cost Source Settings ...................................... 271
Enabling Site Search ...................................................... 271

Goal Conversions and Funnels ........................................ 273
The Importance of Defining Goals .................................. 274
What Funnel Shapes Can Tell You ................................. 276
The Goal Setup Process ............................................... 277
The Funnel Setup Process .............................................. 282
Tracking Funnels for Which Every Step Has the Same URL 285

Why Segmentation Is Important ...................................... 286
Choosing Advanced Segments versus Profile Filters .......... 288

Profile Segments: Segmenting Visitors Using Filters ........ 289
Creating a Profile Filter .................................................. 290
Understanding Filter Logic ............................................ 292
Custom Filters: Available Fields .................................... 293
Five Common Profile Filters ......................................... 295
Assigning a Filter Order ................................................ 303

Report Segments: Segmenting Visitors Using Advanced Segments . 303
Default Advanced Segments ......................................... 304
Custom Advanced Segments ........................................ 306
Example Custom Segments .......................................... 307

Creating Custom Intelligence Alerts ............................... 311
Summary ................................................................. 313

Chapter 9  Google Analytics Customizations

Why Customize an Existing Product? ............................... 316

Custom Reports .......................................................... 317
Day-on-Day Custom Report ........................................... 317
Unique Visitors by Page ............................................... 320
Affiliate Performance ................................................... 321
Better AdWords .......................................................... 323
Managing Custom Reports .......................................... 323

Customizing the List of Recognized Search Engines .......... 326
Making Search Engines Region-Specific ......................... 327
Adding New Search Engines for SEO ............................ 329

Labeling Visitors, Sessions, and Pages ......................... 330
Implementing Custom Variables ................................... 333

Tracking Error Pages and Broken Links .......................... 336
Differentiating Pay-Per-Click Network Partners ............... 340
In-Page Analytics: Differentiating Identical Links ................. 344
Matching Transactions to Specific Referral Data .................. 345
Tracking Campaign Links to File Downloads ....................... 348
Changing the Referrer Credited for a Goal Conversion .......... 351
Ignoring a Referrer for a Conversion ............................... 352
Roll-up Reporting ....................................................... 353
Tracking Roll-up Transactions ........................................ 353
Implications of the Roll-up Technique ............................... 353
Improvement Tip: Simplify with Pageview Roll-up ................ 354
Summary ................................................................. 355

Part IV Using Visitor Data to Drive Website Improvement 357

Chapter 10 Focusing on Key Performance Indicators 359
Setting Objectives and Key Results .................................. 360
Selecting and Preparing KPIs ......................................... 363
What Is a KPI? .................................................................. 363
Preparing KPIs .............................................................. 365
Presenting Your KPIs ....................................................... 367
Presenting Hierarchical KPIs via Segmentation ..................... 370
Benchmark Considerations ............................................. 372
KPI Examples by Job Role ............................................... 373
E-commerce Manager KPI Examples ................................. 374
Marketer and Communication KPI Examples ....................... 381
Social Media KPI Examples ............................................. 389
Content Creator KPI Examples ........................................ 391
Webmaster KPI Examples ............................................... 402
Using KPIs for Web 2.0 ................................................... 412
Why the Fuss about Web 2.0? ......................................... 413
Summary ........................................................................ 415

Chapter 11 Real-World Tasks 417
Identify and Optimize Poor-Performing Pages ..................... 418
Using Landing Pages (Bounce Rates) ................................ 418
Funnel Optimization Case Study ..................................... 424
Measuring the Impact of Site Search .................................. 431
The Revenue Impact of Site Search .................................... 432
Summary of Site Search Impact ....................................... 436
Optimizing Your Search Engine Marketing ......................... 437
Keyword Discovery ......................................................... 437
Campaign Optimization (AdWords) ................................. 440
Attribution Optimization ................................................ 445
Landing Page Optimization and SEO ............................... 449
AdWords Day Parting Optimization 455
AdWords Ad Content Optimization 457

Monetizing a Non-E-commerce Website .......................... 462
Approach 1: Assign Goal Values Method 463
Approach 2: Pseudo E-commerce Method 464

Tracking Offline Marketing ........................................... 470
Using Vanity URLs to Track Offline Visitors 471
Using Coded URLs to Track Offline Visitors 475
Combining with Search to Track Offline Visitors 478
Combining with URL Shorteners 480
Combining with Quick Response Codes 480
Summary and Case Study 481

An Introduction to Google Website Optimizer .................. 482
Common Misconceptions 483
AMAT: Where Does Testing Fit? 484
Choosing a Test Type 485
Getting Started: Implementing a Multivariate Experiment 488
Calyx Flowers: A Retail Multivariate Case Study 495
YouTube: A Content-Publishing Multivariate Case Study 499
Summary ................................................................. 502

Chapter 12 Integrating Google Analytics with Third-Party Applications 503

Extracting Google Analytics Information ....................... 504
Importing Data into Your CRM Using JavaScript 504
Importing Data into Your CRM Using PHP 506

Working with the Google Analytics Core Reporting API ........ 509
How to Use the Core Reporting API—the Basics 511
Example Apps 518

Example App Case Studies ........................................... 522
Excel and Spreadsheet Integration 522
Survey Tools: Voice of Customer Integration 526

Demographics within Google Analytics .......................... 527

Call Tracking with Google Analytics .............................. 529

Video on Demand Tracking with Google Analytics ............. 531

Mobile App Tracking with Google Analytics ..................... 534

Integrating Website Optimizer with Google Analytics .......... 538
The Integration Method 539
Summary ................................................................. 542

Appendix A Regular Expression Overview 543

Understanding the Fundamentals ................................. 544

Regex Examples ......................................................... 545
Appendix B  Useful Tools  551

Tools to Help Audit Your GATC Deployment ................. 552
Browser Add-ons .................................................. 553
GATC Plug-ins ...................................................... 555
Desktop Helper Applications .................................... 555

Appendix C  Recommended Further Reading  557

Books on Web Analytics and Related Areas ................. 558
Web Resources ....................................................... 558
Blog Roll for Web Analytics .................................... 559

Index  561
