INDEX

‘A‘ā lava, 11, 13
Absolute velocity profiles, 24, 26–30
Achneliths, 353, 354f
Advanced National Seismic System (ANSS), 217
Coulomb stress function and, 222
earthquake catalog data, 220
Al₂O₃, Mauna Loa magma, 62f, 63
Airborne laser swath mapping (ALSM), 483
lava flow, 486
Airborne LiDAR topography, 483–503
Alae Crater, 374
Alkaline magmas, 5
Alkali-silica diagram of rejuvenated-stage volcanism, 112, 112f
Aloi Crater, 374
ALSM. See Airborne laser swath mapping
Analogue volcanoes, PdF and Kīlauea as, 507–24
ANSS. See Advanced National Seismic System
⁴⁰Ar/³⁹Ar analysis, 111, 111t
ARs. See Aspect ratios
Ash, 353. See also Pāhala ash
Kīlauea summit basaltic explosive eruption, 425–26, 426f, 427f
PdF, 191, 197
Aspect ratios (ARs)
⁴⁰Ar/³⁹Ar analysis, 111, 111t
fissure fountain, 375, 376f
vent geometry, 380
Asthenosphere, MORB-related, 97, 99
Augite
in ERZ lava, 166–73, 168f, 171f, 172f
MG# variability, 170–71
in Pu‘u ‘Ō‘ō lava, 171–72
Backscatter electron (BSE), 449
Basaltic eruptions
bubbles in, 289–313
degassing during nonpermanent activity, 310–11
description, 290–91
dynamics of, 290–92
large columns, 310–11
physical processes during, 312–13
subaerial, 289
submarine, 289
two-phase flows in volcanic conduits and, 291–92, 292f
types of classic, 289
Basaltic explosive eruption from Kīlauea summit, 2008, 421–36
ash componentry and abundance, 425–26, 426f, 427f
chronology of, 422–23, 423t
data and, 425–32
degassing dynamics of, 435
interpretation of, 432–35
juvenile ejecta analysis and, 423–25, 424f, 425t
juvenile lapilli and
clast microtextures, 428–32, 430f, 431f
juvenile clast density, 428, 429f, 429t
juvenile sample morphology, 426–27, 427f
vesicle volume distributions and number densities, 432, 432t, 433f
vesicularity quantitative data and, 432
lithic ejecta analysis and, 423–25, 424f, 425t
time series of
continued production of dominantly juvenile tephra
and, 434
dense magma evacuation and appearance of vesicular magma in, 434–35
first appearance of juvenile tephra and, 433–34
Basaltic fissure eruptions, 369
Basaltic fountains
dynamics of, 369
fissure width for models of weak, 388
Basaltic hotspot volcanoes, 507
Basaltic shield volcanoes, magma-tectonic interactions
and, 269
Basaltic volcanoes, 289, 290f
column height, 291
magmatic eruptions, 291
studying, 313
BHVO-1, 449
BHVO-2, 84–85
Bilateral geochemical asymmetry of Hawaiian volcanism, 35, 36f
Body wave tomography, 37
BSE. See Backscatter electron
Bubbles
in basaltic eruptions, 289–313
CO₂, 299
coalescence, 299–300
in foams, 300
formation, 297–99
sites of, 298
surface tension and, 298–99
gas composition and, 300–301
growth, 299
Strombolian explosions and stability of large, 305–6, 306f
Bungo Channel, Japan, 273
Caldera collapses
causes of, 189–90
Kilauea, 351
PdF volcano, 189–210, 522
proof of, 208
sampling and analytical procedures for, 191–94
Calderas. See also specific calderas
Hawaiian, 209
plumbing systems associated with, 209
CaO in Kīlauea tephra glasses, 135–36, 136f
Kīlauea Volcano glass composition and, 127
Mauna Kea lava, 74
Mauna Loa magma, 62f, 63, 68, 75
Carrier liquids, melt inclusions and, 341
Channel-contained lava, thermoregional simulations of, 457–79
Characteristics of Volcanoes with Contributions of Facts and Principles from the Hawaiian Islands (Dana), 3, 533
Chromite, PdF magma composition and, 202t
CI/S degassing, Kīlauea summit, 451, 451f
Citcom, 37
Clay-cake experiments, 119, 120f
Clinopyroxene
lithium isotopic signatures in, 85–88, 87f
PdF magma composition and, 202t, 203f
Cloos, Hans, 119
CO2 in bubbles, 299
degassing, 546
emissions, 547
in melt inclusions, 337
Coad, T., 3
Coeval melts from Kīlauea's summit reservoir
compositional limits on, 141
evidence for large compositional ranges in, 125–43
temporal and spatial constraints on compositions of, 141–42
Coulomb stress changes, Kīlauea summit and, 222–23
Coulomb stress function, 219–20
ANSS catalog data and, 222
Pu‘u ‘Ō‘ō eruptions and rates of, 222, 223f
seismic rate and, 221f
Crack orientations
ERZ, 260
Kīlauea Volcano, 257, 257f, 260
Cr-spinel in ERZ lava, 166, 167f, 168f
Crust, oceanic, 80
Crustal assimilation, early 2008 Kīlauea summit eruptive activity and, 439–53
Crustal stress and structure at Kīlauea Volcano, 251–66
Crystals
clots, Kīlauea summit eruptive activity and, early 2008, 447–50, 449f
fractionation, lithium isotopic signature and, 85–88
mush clots, 441
olivine, glasses and, 139, 140f
PdF, 196–97
Curvilinear structural features, 121
Daly, Reginald, 3
Dana, James D., 2–3, 8
Characteristics of Volcanoes with Contributions of Facts and Principles from the Hawaiian Islands, 3, 533
Hawaiian volcanism and, 533
Day, A., 3
Deep eclogite pool (DEP), 19, 35, 42
NE side of, 45
plume, 30, 45
SW side of, 45
thermochemical plume, 47–48
Deflation-inflation-deflation (DID) events, 233
Deflation-inflation (DI) events
DID type, 232
ERZ
deformation of, 234–35
effusion of, 235
GPS, 231
HVO classification of, 232
InSAR, 231
Kīlauea summit
decomposition and, 233, 234f
lava lake and, 234
reservoir volume and, 243–44, 244f
tilt and, 232, 232f, 247
Kīlauea Volcano, 230f, 231f, 235f
characteristics of, 233–38
data and processing of, 231–33
ERZ relation to, 246–47
HMMR and, 244–45
inversions and, 240–43, 240f, 241f, 242f, 243f
noise model of, 239–40
observations of, 230
occurrence rate and pauses in, 235–37, 236f, 237f
seismicity and, 237–38
shallow magma system and, 229–48
source inversions and, 238–43
source mechanism and, 245–46
Pu‘u ‘Ō‘ō, 235, 247, 401
temporal evolution, 233
tiltmeters, 231–32
V type, 232, 233, 243
U type, 232, 233, 243
UWE, 237, 238f
Deformation
ERZ, DI events and, 234–35
Kamoamoa fissure eruption, 413–14, 414f, 415f
Kīlauea summit
DI events and, 233, 234f
SSEs and, 279–82, 281f
Degassing
basaltic eruption, 310–11
CI/S, Kīlauea summit, 451, 451f
CO2, 546
constraining, through multidisciplinary methods, 292–97
Ertas ‘Ale lava lake, 301, 302f, 303f
eruption style and, 546
ERZ, 450–52
gas volume
from gas composition, 293–94, 295f
from gas velocity, 293
indirect measurements of, 294–95, 296f, 297f
methods estimating, comparison between, 296–97, 298f
quasi-direct measurements of, 293–94
Kīlauea summit, 450–52
basaltic explosive eruption dynamics of, 435
early 2008 eruptive activity of, 435
magmatic, 439–53
melt, fractionation and, 342
nonpermanent activity, dynamics of
high-level lava fountains and, 311, 312f
large basaltic eruptive columns and, 310–11
Stromboli paroxysmal activity and, 311
at open vents, dynamics of, 301–10
gas piston activity and, 302–3
lava lake activity and, 301–2, 302f
Strombolian explosions and, 303–8
of primitive melts at Kīlauea Volcano, 323–45
summit and rift zones, 325, 326f
Strombolian activity, 292–93
time scales of, 421
types of, 292–93
DEM. See Digital elevation model
Denser clasts, reticulite, 353, 354f
Dense-rock-equivalent (DRE), 148, 353
