About the Companion Website  xxix

1 Probability Survey-Based Experimentation and the Balancing of Internal and External Validity Concerns  1
Paul J. Lavrakas, Courtney Kennedy, Edith D. de Leeuw, Brady T. West, Allyson L. Holbrook, and Michael W. Traugott
1.1 Validity Concerns in Survey Research  3
1.2 Survey Validity and Survey Error  5
1.3 Internal Validity  6
1.4 Threats to Internal Validity  8
1.4.1 Selection  8
1.4.2 History  9
1.4.3 Instrumentation  10
1.4.4 Mortality  10
1.5 External Validity  11
1.6 Pairing Experimental Designs with Probability Sampling  12
1.7 Some Thoughts on Conducting Experiments with Online Convenience Samples  12
1.8 The Contents of this Book  15
References  15

Part I Introduction to Section on Within-Unit Coverage  19
Paul J. Lavrakas and Edith D. de Leeuw

2 Within-Household Selection Methods: A Critical Review and Experimental Examination  23
Jolene D. Smyth, Kristen Olson, and Mathew Stange
2.1 Introduction  23
2.2 Within-Household Selection and Total Survey Error  24
2.3 Types of Within-Household Selection Techniques  24
2.4 Within-Household Selection in Telephone Surveys  25
2.5 Within-Household Selection in Self-Administered Surveys  26
2.6 Methodological Requirements of Experimentally Studying Within-Household Selection Methods 27
2.7 Empirical Example 30
2.8 Data and Methods 31
2.9 Analysis Plan 34
2.10 Results 35
2.10.1 Response Rates 35
2.10.2 Sample Composition 35
2.10.3 Accuracy 37
2.11 Discussion and Conclusions 40
References 42

3 Measuring Within-Household Contamination: The Challenge of Interviewing More Than One Member of a Household 47
Colm O’Muircheartaigh, Stephen Smith, and Jaclyn S. Wong
3.1 Literature Review 47
3.2 Data and Methods 50
3.2.1 The Partner Study Experimental Design and Evaluation 52
Field/Project Directors 53
3.2.1.1 Effects on Response Rates and Coverage 54
3.3 The Sequence of Analyses 55
3.4 Results 55
3.4.1 Results of Experimental Group Assignment 55
3.5 Effect on Standard Errors of the Estimates 57
3.6 Effect on Response Rates 58
3.6.1 Response Rates Among Primes 58
3.6.2 Response Rates Among Partners 60
3.7 Effect on Responses 61
3.7.1 Cases Considered in the Analyses 61
3.7.2 Sequence of Analyses 61
3.7.3 Dependent Variables of Interest 61
3.7.4 Effect of Experimental Treatment on Responses of Primes 61
3.7.4.1 Missingness 61
3.7.4.2 Substantive Answers 62
3.7.5 Changes in Response Patterns Over Time Among Primes 62
3.7.5.1 Missingness 62
3.7.5.2 Substantive Answers 62
3.7.5.3 Social Desirability 62
3.7.5.4 Negative Questions 62
3.7.5.5 Positive Questions 63
3.7.5.6 Effect on Responses of Partners 63
3.7.6 Conclusion 63
3.7.6.1 Design 63
3.7.6.2 Statistical Considerations 64
3.8 Substantive Results 64
References 64
Part II    Survey Experiments with Techniques to Reduce Nonresponse  67

Edith D. de Leeuw and Paul J. Lavrakas

4    Survey Experiments on Interactions and Nonresponse: A Case Study of Incentives and Modes  69

A. Bianchi and S. Biffignandi

4.1    Introduction  69
4.2    Literature Overview  70
4.3    Case Study: Examining the Interaction Between Incentives and Mode  73
4.3.1    The Survey  73
4.3.2    The Experiment  73
4.3.3    Data and Methods  75
4.3.4    Results of the Experiment: Incentives and Mode Effects  77
4.3.4.1    Effects on Participation  77
4.3.4.2    Effects on Subgroups  78
4.3.4.3    Effects on Data Quality  80
4.3.4.4    Effects on Costs  81
4.4    Concluding Remarks  83

Acknowledgments  85
References  86

5    Experiments on the Effects of Advance Letters in Surveys  89

Susanne Vogl, Jennifer A. Parsons, Linda K. Owens, and Paul J. Lavrakas

5.1    Introduction  89
5.1.1    Why Advance Letters?  89
5.1.2    What We Know About Effects of Advance Letters?  90
5.1.2.1    Outcome Rates  90
5.1.2.2    Nonresponse Bias  91
5.1.2.3    Cost Effectiveness  91
5.1.2.4    Properties of Advance Letters  93
5.2    State of the Art on Experimentation on the Effect of Advance Letters  93
5.3    Case Studies: Experimental Research on the Effect of Advance Letters  95
5.4    Case Study I: Violence Against Men in Intimate Relationships  96
5.4.1    Sample Design  96
5.4.2    Fieldwork  97
5.4.3    Sampling Bias  97
5.4.4    Analytical Strategies  97
5.4.5    Results  98
5.4.5.1    Effect of Advance Letters on Outcome Rates and Reasons for Refusals  98
5.4.5.2    Recruitment Effort  98
5.4.5.3    Effect of Advance Letters on Reporting on Sensitive Topics  98
5.4.6    Discussion  99
5.5    Case Study II: The Neighborhood Crime and Justice Study  100
5.5.1    Study Design  100
5.5.2    Experimental Design  100
5.5.3    Fieldwork  101
5.5.4    Analytical Strategies  102
5.5.5    Results  103
8.2 Experiments and Probability-Based Online Panels 153
8.2.1 Online Experiments in Probability-Based Panels: Advantages 153
8.2.2 Examples of Experiments in the LISS Panel 154
8.3 Mixed-Mode Question Format Experiments 154
8.3.1 Theoretical Background 154
8.3.2 Method 156
8.3.2.1 Respondents 156
8.3.2.2 Experimental Design 156
8.3.2.3 Questionnaire 157
8.3.3 Analyses and Results 157
8.3.3.1 Response and Weighting 157
8.3.3.2 Reliability 157
8.3.3.3 Response Styles 158
8.3.4 Summary and Discussion 161
Acknowledgments 162
References 162

9 Conflicting Cues: Item Nonresponse and Experimental Mortality 167
David J. Ciuk and Berwood A. Yost
9.1 Introduction 167
9.2 Survey Experiments and Item Nonresponse 167
9.3 Case Study: Conflicting Cues and Item Nonresponse 170
9.4 Methods 170
9.5 Issue Selection 171
9.6 Experimental Conditions and Measures 172
9.7 Results 173
9.8 Addressing Item Nonresponse in Survey Experiments 174
9.9 Summary 178
References 179

10 Application of a List Experiment at the Population Level: The Case of Opposition to Immigration in the Netherlands 181
Mathew J. Creighton, Philip S. Brenner, Peter Schmidt, and Diana Zavala-Rojas
10.1 Fielding the Item Count Technique (ICT) 183
10.2 Analyzing the Item Count Technique (ICT) 185
10.3 An Application of ICT: Attitudes Toward Immigrants in the Netherlands 186
10.3.1 Data – The Longitudinal Internet Studies for the Social Sciences Panel 186
10.3.2 Implicit and Explicit Agreement 187
10.3.3 Social Desirability Bias (SDB) 188
10.4 Limitations of ICT 190
References 192

Part IV Introduction to Section on Interviewers 195
Brady T. West and Edith D. de Leeuw

11 Race- and Ethnicity-of-Interviewer Effects 197
Allyson L. Holbrook, Timothy P. Johnson, and Maria Krysan
11.1 Introduction 197
11.1.1 The Problem 197

Part VI  Introduction to Section on Special Surveys  291
Michael W. Traugott and Edith D. de Leeuw

15  Mounting Multiple Experiments on Longitudinal Social Surveys: Design and Implementation Considerations  293
Peter Lynn and Annette Jäckle

15.1  Introduction and Overview  293
15.2  Types of Experiments that Can Be Mounted in a Longitudinal Survey  294
15.3  Longitudinal Experiments and Experiments in Longitudinal Surveys  295
15.4  Longitudinal Surveys that Serve as Platforms for Experimentation  296
15.5  The Understanding Society Innovation Panel  298
15.6  Avoiding Confounding of Experiments  299
15.7  Allocation Procedures  301
15.7.1  Assignment Within or Between Households and Interviewers?  302
15.7.2  Switching Treatments Between Waves  303
15.8  Refreshment Samples  304
15.9  Discussion  305
15.A  Appendix: Stata Syntax to Produce Table 15.3 Treatment Allocations  306

16  Obstacles and Opportunities for Experiments in Establishment Surveys
Supporting Official Statistics  309
Diane K. Willimack and Jaki S. McCarthy

16.1  Introduction  309
16.2  Some Key Differences Between Household and Establishment Surveys  310
16.2.1  Unit of Analysis  310
16.2.2  Statistical Products  310
16.2.3  Highly Skewed or Small Specialized Target Populations  310
16.2.4  Sample Designs and Response Burden  311
16.2.5  Question Complexity and Availability of Data in Records  311
16.2.6  Labor-intensive Response Process  311
16.2.7  Mandatory Reporting  312
16.2.8  Availability of Administrative and Auxiliary Data  312
16.3  Existing Literature Featuring Establishment Survey Experiments  312
16.3.1  Target Populations  312
16.3.2  Research Purpose  313
16.3.3  Complexity and Context  313
16.4  Key Considerations for Experimentation in Establishment Surveys  314
16.4.1  Embed the Experiment Within Production  314
16.4.2  Conduct Standalone Experiments  315
16.4.3  Use Nonsample Cases  315
16.4.4  Exclude Large Establishments  315
16.4.5  Employ Risk Mitigation Strategies and Alternatives  316
16.5  Examples of Experimentation in Establishment Surveys  318
16.5.1  Example 1: Adaptive Design in the Agricultural Resource Management Survey  318
16.5.1.1  Experimental Strategy: Embed the Experiment Within the Production Survey  318
16.5.1.2  Experimental Strategy: Exclude Large Units from Experimental Design  319
16.5.2  Example 2: Questionnaire Testing for the Census of Agriculture  319
16.5.2.1 Experimental Strategy: Conduct a Standalone Experiment 319
16.5.2.2 Experimental Strategy: Exclude Large Establishments 320
16.5.3 Example 3: Testing Contact Strategies for the Economic Census 320
16.5.3.1 Experimental Strategy: Embed Experiments in Production Surveys 321
16.5.4 Example 4: Testing Alternative Question Styles for the Economic Census 321
16.5.4.1 Experimental Strategy: Use Nonproduction Cases Alongside a Production Survey 321
16.5.5 Example 5: Testing Adaptive Design Alternatives in the Annual Survey of Manufactures 322
16.5.5.1 Experimental Strategy: Exclude Large Units 322
16.5.5.2 Experimental Strategy: Embed the Experiment Within the Production Survey 322
16.6 Discussion and Concluding Remarks 323
Acknowledgments 324
References 324

Part VII Introduction to Section on Trend Data 327
Michael W. Traugott and Paul J. Lavrakas

Tom W. Smith and Jaesok Son
17.1 Introduction 329
17.2 GSS Question-Wording Experiment on Spending Priorities 330
17.3 Experimental Analysis 330
17.4 Summary and Conclusion 338
17.A National Spending Priority Items 339
References 340

18 Survey Experiments and Changes in Question Wording in Repeated Cross-Sectional Surveys 343
Allyson L. Holbrook, David Sterrett, Andrew W. Crosby, Marina Stavvakantonaki, Xiaoheng Wang, Tianshu Zhao, and Timothy P. Johnson
18.1 Introduction 343
18.2 Background 344
18.2.1 Repeated Cross-Sectional Surveys 344
18.2.2 Reasons to Change Question Wording in Repeated Cross-Sectional Surveys 345
18.2.2.1 Methodological Advances 345
18.2.2.2 Changes in Language and Meaning 346
18.2.3 Current Practices and Expert Insight 346
18.3 Two Case Studies 347
18.3.1 ANES 347
18.3.1.1 Description of Question Wording Experiment 347
18.3.1.2 Data Collection 348
18.3.1.3 Measures 349
18.3.1.4 Analysis 352
18.3.1.5 Results 352
18.3.1.6 Implications for Trend Analysis 355
18.3.2 General Social Survey (GSS) 356
18.3.2.1 Purpose of Experiment 356
18.3.2.2 Data Collection 356
18.3.2.3 Measures 356
18.3.2.4 Analysis 357
18.3.2.5 Results 360
18.4 Implications and Conclusions 362
18.4.1 Limitations and Suggestions for Future Research 363
Acknowledgments 364
References 364

Part VIII Vignette Experiments in Surveys 369
Allyson Holbrook and Paul J. Lavrakas

19 Are Factorial Survey Experiments Prone to Survey Mode Effects? 371
Katrin Auspurg, Thomas Hinz, and Sandra Walzenbach
19.1 Introduction 371
19.2 Idea and Scope of Factorial Survey Experiments 372
19.3 Mode Effects 373
19.3.1 Typical Respondent Samples and Modes in Factorial Survey Experiments 373
19.3.2 Design Features and Mode Effects 374
19.3.2.1 Selection of Dimensions and Levels 374
19.3.2.2 Generation of Questionnaire Versions and Allocation to Respondents 375
19.3.2.3 Number of Vignettes per Respondent and Response Scales 376
19.3.2.4 Interviewer Effects and Social Desirability Bias 377
19.3.3 Summing Up: Mode Effects 378
19.4 Case Study 378
19.4.1 Data and Methods 378
19.4.1.1 Survey Details 378
19.4.1.2 Analysis Techniques 380
19.4.2 Mode Effects Regarding Nonresponse and Measurement Errors 380
19.4.2.1 Nonresponse 380
19.4.2.2 Response Quality 382
19.4.3 Do Data Collection Mode Effects Impact Substantive Results? 385
19.4.3.1 Point Estimates and Significance Levels 385
19.4.3.2 Measurement Efficiency and Sources of Unexplained Variance 387
19.5 Conclusion 388
References 390

20 Validity Aspects of Vignette Experiments: Expected “What-if” Differences Between Reports of Behavioral Intentions and Actual Behavior 393
Stefanie Eifler and Knut Petzold
20.1 Outline of the Problem 393
20.1.1 Problem 393
20.1.2 Vignettes, the Total Survey Error Framework, and Cognitive Response Process Perspectives 394
20.1.3 State of the Art 395
20.1.4 Research Strategy for Evaluating the External Validity of Vignette Experiments 397
20.2 Research Findings from Our Experimental Work 399
20.2.1 Experimental Design for Both Parts of the Study 399
20.2.2 Data Collection for Both Parts of the Study 400
20.2.2.1 Field Experiment 400
20.2.2.2 Vignette Experiment 402
20.2.3 Results for Each Part of the Study 405
20.2.3.1 Field Experiment 405
20.2.3.2 Vignette Experiment 405
20.2.4 Systematic Comparison of the Two Experiments 406
20.2.4.1 Assumptions and Precautions About the Comparability of Settings, Treatments, and Outcomes 406
20.2.4.2 Assumptions and Precautions About the Comparability of Units 407
20.2.4.3 Results 408
20.3 Discussion 411
References 413

Part IX Introduction to Section on Analysis 417
Brady T. West and Courtney Kennedy

21 Identities and Intersectionality: A Case for Purposive Sampling in Survey-Experimental Research 419
Samara Klar and Thomas J. Leeper
21.1 Introduction 419
21.2 Common Techniques for Survey Experiments on Identity 420
21.2.1 Purposive Samples 422
21.2.2 The Question of Representativeness: An Answer in Replication 423
21.2.3 Response Biases and Determination of Eligibility 425
21.3 How Limited Are Representative Samples for Intersectionality Research? 426
21.3.1 Example from TESS 426
21.3.2 Example from a Community Association-Based LGBTQ Sample 427
21.3.3 Example from Hispanic Women Sample in Tucson, AZ 430
21.4 Conclusions and Discussion 430
Author Biographies 431

22 Designing Probability Samples to Study Treatment Effect Heterogeneity 435
Elizabeth Tipton, David S. Yeager, Ronaldo Iachan, and Barbara Schneider
22.1 Introduction 435
22.1.1 Probability Samples Facilitate Estimation of Average Treatment Effects 437
22.1.2 Treatment Effect Heterogeneity in Experiments 438
22.1.3 Estimation of Subgroup Treatment Effects 440
22.1.3.1 Problems with Sample Selection Bias 440
22.1.3.2 Problems with Small Sample Sizes 440
22.1.4 Moderator Analyses for Understanding Causal Mechanisms 441
22.1.4.1 Problems of Confounder Bias in Probability Samples 442
22.1.4.2 Additional Confounder Bias Problems with Nonprobability Samples 442
22.1.4.3 Problems with Statistical Power 443
### 22.1.5 Stratification for Studying Heterogeneity 444
- **22.1.5.1 Overview** 444
- **22.1.5.2 Operationalizing Moderators** 445
- **22.1.5.3 Orthogonalizing Moderators** 445
- **22.1.5.4 Stratum Creation and Allocation** 445

### 22.2 Nesting a Randomized Treatment in a National Probability Sample: The NSLM 446
- **22.2.1 Design of the NSLM** 446
  - **22.2.1.1 Population Frame** 446
  - **22.2.1.2 Two-Stage Design** 447
  - **22.2.1.3 Nonresponse** 447
  - **22.2.1.4 Experimental Design** 447
  - **22.2.1.5 Treatment** 447
- **22.2.1.6 Outcomes** 447
- **22.2.2 Developing a Theory of Treatment Effect Heterogeneity** 447
  - **22.2.2.1 Goals** 447
  - **22.2.2.2 Potential Moderators** 447
  - **22.2.2.3 Operationalizing School Achievement Level** 448
  - **22.2.2.4 Orthogonalizing for Minority Composition** 449
- **22.2.3 Developing the Final Design** 449
  - **22.2.3.1 Stratum Creation** 449
  - **22.2.3.2 Stratum Allocation** 449
  - **22.2.3.3 Implementing Sample Selection** 451
  - **22.2.3.4 Final Sample** 451
- **22.3 Discussion and Conclusions** 451
  - **22.3.1 Estimands** 452
  - **22.3.2 Contextual Effects Matter** 452
  - **22.3.3 Plan for Moderators** 452
  - **22.3.4 Designing Strata** 452
  - **22.3.5 Power Concerns** 453
  - Acknowledgments 453

### 23 Design-Based Analysis of Experiments Embedded in Probability Samples 457
*Jan A. van den Brakel*
- **23.1 Introduction** 457
- **23.2 Design of Embedded Experiments** 458
- **23.3 Design-Based Inference for Embedded Experiments with One Treatment Factor** 460
  - **23.3.1 Measurement Error Model and Hypothesis Testing** 460
  - **23.3.2 Point and Variance Estimation** 462
  - **23.3.3 Wald Test** 464
  - **23.3.4 Special Cases** 464
  - **23.3.5 Hypotheses About Ratios and Totals** 465
- **23.4 Analysis of Experiments with Clusters of Sampling Units as Experimental Units** 466
- **23.5 Factorial Designs** 468
  - **23.5.1 Designing Embedded $K \times L$ Factorial Designs** 468
23.5.2 Testing Hypotheses About Main Effects and Interactions in $K \times L$ Embedded Factorial Designs 469
23.5.3 Special Cases 471
23.5.4 Generalizations 471
23.6 A Mixed-Mode Experiment in the Dutch Crime Victimization Survey 472
23.6.1 Introduction 472
23.6.2 Survey Design and Experimental Design 472
23.6.3 Software 474
23.6.4 Results 474
23.7 Discussion 477
Acknowledgments 478

24 Extending the Within-Persons Experimental Design: The Multitrait-Multierror (MTME) Approach 481
Alexandru Cernat and Daniel L. Oberski
24.1 Introduction 481
24.2 The Multitrait-Multierror (MTME) Framework 482
24.2.1 A Simple but Defective Design: The Interview–Reinterview from the MTME Perspective 483
24.2.2 Designs Estimating Stochastic Survey Errors 485
24.3 Designing the MTME Experiment 487
24.3.1 What are the main types of measurement errors that should be estimated? 487
24.3.2 How can the questions be manipulated in order to estimate these types of error? 487
24.3.3 Is it possible to manipulate the form pair order? 488
24.3.4 Is there enough power to estimate the model? 488
24.3.5 How can data collection minimize memory effects? 489
24.4 Statistical Estimation for the MTME Approach 489
24.5 Measurement Error in Attitudes Toward Migrants in the UK 491
24.5.1 Estimating Four Stochastic Error Variances Using MTME 491
24.5.1.1 What are the main types of measurement errors that should be estimated? 491
24.5.1.2 How can the questions be manipulated in order to estimate these types of errors? 492
24.5.1.3 Is it possible to manipulate the form pair order? 492
24.5.1.4 Is there enough power to estimate the model? 492
24.5.1.5 How can data collection minimize memory effects? 493
24.5.2 Estimating MTME with four stochastic errors 493
24.6 Results 494
24.7 Conclusions and Future Research Directions 497
