Index

Note: Page numbers in italic indicate Figures and those in bold indicate Tables.

d
abdominal disease, arrhythmias associated with 326–328
accelerated idioventricular rhythm (AIVR) 175, 177, 177
accessory pathways (APs) 154–159, 155, 159
radiofrequency ablation treatment 278
accrochage 149
ACE inhibitors 289, 290, 293
acepromazine 273–274
arrhythmias and acid–base disturbances, arrhythmias associated with 321, 324
acidaemia 321, 324
acidosis 12
action potential of cardiac cells 9–14
differences between areas of the heart 15
generation in cardiac cells 12–14
adenosine 242, 251, 252
interactions with anaesthetic agents 342
adhesive patch ECG devices 224, 224
adrenal dysfunction, arrhythmias associated with 325–326
adrenaline 273
Airedale Terrier, breed predisposition 285
alfaxalone 273
arrhythmias and 341, 343
alkalosis 12
α2-adrenoreceptor agonist drugs, arrhythmias and 338–341, 338, 340, 343
ambulatory ECG recording 219–229
adhesive patch ECG devices 224, 224
analysis of Holter recordings 224–226, 225
assessment of anti-arrhythmic treatment efficacy 228–229
cats 223, 223
continuous recorders 222–224
description 219
diurnal variation in heart rate 227
event recorders 219–220
heart rate monitors (wearable) 222
Holter monitors 222–223, 222, 223
implantable loop recorders 220–221, 221
indications for 219
loop recorders 219–222
normal Holter findings in cats 227, 228
normal Holter findings in dogs 226–227, 226
smart phone ECG devices 220, 220, 221
telemetry 223, 224
types of monitor 219–224
American Cocker Spaniel, breed predisposition 95
amiodarone 124, 142, 145, 183, 242, 247, 248–249, 273, 289, 290
adverse effects 388
dosage 388
interactions with anaesthetic agents 342
toxicity 289
use in cats 303
amitriptyline 329
amlodipine 249
amplitude 38
anaesthesia
arrhythmias and atrial fibrillation 344–345
clinical approach to the patient 337–338
determining the cause and significance of arrhythmias 339
drugs and arrhythmias 338–341, 343
evidence of subsidiary pacemakers 16
for EP study and catheter ablation 272–273
heart rate variability as marker of nociception 238
interactions between anaesthetic agents and anti-arrhythmic drugs 342
key points 346
predisposing conditions 337, 338
risk factors for anaesthetic agent-induced arrhythmias 341–342
sinus bradycardia 342, 344
sinus tachycardia 344
supraventricular tachycardia (SVT) 344
types of intra-operative arrhythmia 342–346
ventricular tachycardia 345–346
anisotropic conduction 12
anterolateral internodal pathway 2, 2, 3

anti-arrhythmic drugs 241–252
adenosine 242, 251, 252
adverse effects 387, 388
anticholinergic drugs 252
β2-agonist drugs 252
bradarrhythmia drugs 252
cardiac glycosides 251
Class I 241–244, 242
Class IA 241–242, 242
Class IB 242–244, 242
Class IC 242, 244
Class II 242, 244–247
Class III 242, 247–249
Class IV 242, 249–251
classification 241–252
digoxin 251
dosages 387, 388
informed consent from owners 241, 311
interactions with anaesthetic agents 342
lack of evidence-based guidelines 241
magnesium 252
omega-3 fatty acids 251
sympathomimetic drugs 252
use in veterinary medicine 241
anti-arrhythmic treatment, in dilated cardiomyopathy (DCM) 289–290
anticholinergic drugs 252
toxicity 329, 330
anticholinesterase toxicity 329
antidepressant toxicity 329
antidromic atrioventricular reciprocating tachycardia (AAVRT) 159, 159, 161–162, 162
arrhythmias
breeds predisposed 189
cardiac cell physiology and clinical approach 189–199
ECG interpretation 351–379
arrhythmogenic right ventricular cardiomyopathy (ARVC) 290–293, 291, 292, 294
feline 304, 309–310, 310
Ashman's phenomenon 70, 89, 90
atenolol 124, 145, 183, 245, 289, 293, 303, 305, 311
adverse effects 388
dosage 388
atherosclerosis 320
athletic heart, changes associated with 63–64, 63
atipamezole 340
atrial dissociation 115, 116
atrial ectopic beats (AEBs) 109
bigeminy 109, 112
blocked or non-transmitted 109, 113, 113
classification 109
couples 109, 112
determining the origin of 109, 110
escape beat 109
'hidden' 113, 113
interpolated beat 109, 111–112
premature 109
quadrigeminy 109
trigeminy 109
triplets 109, 112
ventricular activation and the PR interval 109, 113, 113
atrial fibrillation (AF) 127–143
ambulatory ECGs 131–133, 136
atrial myocyte ultrastructural changes 129
atrial pathology 128
atrial stretch 128
autonomic nervous system influence 129
cardiac asynchrony 137
case example 195–197, 196
clinical features 139
dispersion of refractoriness 128
drugs used to treat 140–142
ECG interpretation 372
electrical cardioversion 140, 141
electrical remodelling 129
electrocardiographic findings 129–131, 132–136
f (fibrillatory) waves 129–131
factors predisposing to initiation and maintenance 128–129
feline 303, 304–305, 305
focal model 127, 128
heterogeneous electrophysiological state 128
intra-operative 344–345
lone atrial fibrillation 132, 137, 137–138
mechanisms 127, 128
multiple-wavelet model 127, 128
myocyte fibre orientation and critical mass 128
pacemaker therapy 143
paroxysmal atrial fibrillation 138, 138
pathophysiology 135–137
radiocatheter ablation 143
reduction in cardiac output 135–136
secondary to structural heart disease 137
situations when it may occur 137–139
tachycardia 136–137
targets for ventricular rate control 142–143
thromboembolic disease 137
treating AF in cats 142–143
treating patients with congestive heart failure 142
treatment 140–143
vagally induced atrial fibrillation 139
ventricular response 129, 130
wavelength 129
without structural heart disease (lone AF) 132, 137, 137–138
atrial fibrillo-flutter 121, 123
atrial flutter 119–124
classification 119, 121
ECG interpretation 373
electrocardiographic features 121–124
EP study and RF ablation 279, 282–283, 283
feline 303
monitoring 124
radiofrequency ablation treatment 278
treatment 124
atrial kick (atrioventricular synchronisation) 75
atrial parasytone 116, 114, 116
atrial premature beat (APB) 109
ECG interpretation 357
atrial premature contraction or complex (APC) 109, 111
feline 303
atrial rhythms 109–124
atrial ectopic beats (AEBs) 109, 113, 110
atrial flutter 119–124
atrial tachycardia 116–118
ectopic atrial rhythms 113–116, 114, 115
atrial tachycardia 116–119
atrioventricular block (AVB) 80–81, 83, 84–87
feline 306–307, 306
atrioventricular junction (AV) see atrioventricular node (AVN)
atrioventricular nodal reciprocating tachycardia (AVNRT) 164
atrioventricular node (AVN) 1, 2, 3–5, 3
blood supply 6
innervation 6
see also junctional rhythms
atrioventricular node cells
electrophysiology 17
parasympathetic stimulation 17
sympathetic stimulation 17
atrioventricular reciprocating tachycardia (AVRT) 154–164
radiofrequency ablation
treatment 278
atrioventricular synchronisation ('atrial kick') 75
atropine 252, 273, 317, 330, 340, 345
atropine response test
in 2AVB 84
in 3AVB 87
procedure 85
in sick sinus syndrome 96
in sinus node dysfunction (SND) 96
atypical atrial flutter 121
automatic junctional tachycardia (AJT) 149
autonomic disturbances, arrhythmias
caus ed by 319
autonomic nervous system 6
control of the pacemaker cells 16
influence on the AVN cells 17
autosomal recessive centronuclear myopathy (CNM) in Labrador Retrievers 330

b
Bachmann's bundle 2, 2–3
bandpass filter 39
Bartonella myocarditis 100, 102
benzodiazepines, arrhythmias and 343
β-adrenergic antagonists see β-blockers
β-blockers 100, 124, 142, 242, 244–247, 289, 290, 303, 311
interactions with anaesthetic agents 342
β2-agonist drugs 252
Bezold Jarisch reflex 99, 330
bidirectional ventricular tachycardia (BVT) 181, 181
bifascicular blocks 88, 88
affecting LAFB and RBBB 91
affecting LPFB and RBBB 91
bites and stings 330
block of impulse conduction 70
blood pressure (BP), effects of arrhythmias 75
blood supply to the heart 5–6
blunt chest injury, arrhythmias caused by 328–329
Border Collie Collapse (BCC) 331, 332
Border Terrier CECS (Spike's disease) 331
Boxer cardiomyopathy (ARVC) 290–293, 291, 292, 294
Boxer
breed predispositions 84, 95, 189, 192, 228–229, 247, 285
Boxer cardiomyopathy (ARVC) 290–293, 291, 292, 294
Boykin Spaniel, breed predisposition 332
brachycephalic obstructive airway syndrome 319
bradyarrhythmias and conduction disturbances 71, 74, 79–102
atrioventricular block (AVB) 80–81, 83, 84–87
case example 198, 198
conditions resulting in 98–102
drug treatments 252
feline 306–307
intraventricular conduction disturbances 87–94
sick sinus syndrome (SSS) 94–98, 97, 99
sinoatrial block 79–80, 80, 81
sinoatrial node abnormalities 79–80
sinus node arrest 80
sinus pause 79, 80
bradycardia
definition 79
feline 102
breed predispositions
Airedale Terrier 285
American Cocker Spaniel 95
Border Collie Collapse (BCC) 331, 332
Border Terrier CECS (Spike's disease) 331
Boxer 84, 95, 189, 192, 228–229, 247, 285
Boxer cardiomyopathy (ARVC) 290–293, 291, 292, 294
Boykin Spaniel 332
Bull Mastiff 290
Bull Terrier 95
Cairn Terrier 255
Chesapeake Bay Retriever 332
Chow Chow 84
Cocker Spaniel 84, 95, 255, 285
Curly-Coated Retriever 332
Dachshund 95, 290
Dalmatian 290
Doberman Pinscher 99, 137, 189, 237
English Bulldog 290
German Shepherd 86
German Shepherd inherited ventricular arrhythmias 181, 228, 229, 247, 315–317
Golden Retriever 84
Golden Retriever DMD 330
Great Dane 132, 137, 189, 285
Great Dane dilated cardiomyopathy 295
Irish Wolfhound 137, 285
Irish Wolfhound cardiomyopathy 293, 295, 295
Labrador Retriever 84, 86, 255, 290
Labrador Retriever autosomal recessive CNM 330
Labrador Retriever exercise-induced collapse (EIC) 331–332
Labrador Retriever hereditary myopathy (HMLR) 330
Maine Coon cat 301, 302
Mastiff 137
Miniature Schnauzer 95, 255
Newfoundland 137, 285
Newfoundland dilated cardiomyopathy 295
Pembroke Welsh Corgi 332
Pointer 137
Poodle 84
Portuguese Water Dog 285
Pug 95, 102
Ragdoll cat 301
Rottweiler 137
Saint Bernard 285
Shetland Sheepdog 290
breed predispositions (cont’d)
Shih Tzu 84
Siberian Husky 290
Springer Spaniel 51, 86, 102, 255
Staffordshire Bull Terrier 84
Staffordshire Bull Terrier L-2-HGA 330–331
Weimaraner 290
West Highland White Terrier 95, 255

breed-specific cardiomyopathies 285–295
bretyllium 249
Brugada’s sign 216
Bull Terrier, breed predisposition 95
Bullmastiff, breed predisposition 290
bundle branches 1, 2, 4–5
bundle of His 2, 4
stenosis in Pugs 102
bundles of Kent 154
butorphanol 273

C
caffeine toxicity 329
Cairn Terrier, breed predisposition 255
calcium channel blockers 124, 140
interactions with anaesthetic agents 342
calcium clock 15–16
cAMP 16
cAMP-dependent protein kinase A (PKA) 16
canine epileptoid cramping syndrome (CECS, Spike’s disease) 331
canine index of parasympathetic activity (CIPA) 235
cardiac action potential 9–14

cardiac cells
action potential 12–14
depolarisation 12–14, 21, 22
excitability 14–15
refractoriness 14–15
resting membrane potential (RMP) 9, 10
structure and function 12
types of 9
cardiac disease prognosis, heart rate variability and 238
cardiac electrophysiology 9–17

cardiac glycosides 251
cardiac output (CO), effects of arrhythmias 75
cardiac structure and function 57
cardiac troponin biomarker 192–193, 193
cardiac vectors 21–22, 23
cardiomyopathies
arrhythmias in cats 301–311
arrhythmias in dogs 285–295
carvedilol 289
catecholaminergic polymorphic ventricular tachycardia (CPVT) 181
catheter ablation see electrophysiology (EP) study and catheter ablation 271–283
cavotricuspid isthmus-dependent atrial flutter 120, 121
Chagas myocarditis (trypanosomiasis) 102, 328
Chesapeake Bay Retriever, breed predisposition 332
chocolate, methylxanthine toxicity 329
Chow Chow, breed predisposition 84
chronic valvular degenerative disease (CVDD), arrhythmias associated with 295–296
classification of arrhythmias 71, 73, 74
bradyarrhythmias 71, 74
clinical criteria 73
ectopic rhythms and beats 71, 74
electrocardiographic criteria 73, 74
tachyarrhythmias 71, 74
clinical approach to arrhythmias 189–199
case examples 194–199
clinical examination 189
logical approach to evaluation of the ECG 194
physical interventions 194
physiological versus pathological rhythms 194
primary versus secondary arrhythmias 194
clinical approach to intermittent collapse 189–199
clinical signs of cardiac arrhythmias 75–76
clozapine 329
Clostridium tetani infection 328
CNS disorders, arrhythmias associated with 319
cocaine toxicity 329
Cocker Spaniel, breed predispositions 84, 95, 255, 285
complete atrioventricular block, variable PR interval 48
conduction abnormalities
ECG interpretation 365–372
see also bradyarrhythmias and conduction disturbances
conduction system of the heart, anatomy of 1–6
congestive heart failure 75–76
dilated cardiomyopathy and 285
heart rate variability 237
treatment 289
Conn’s syndrome 326
continuous ECG recorders 222–224
coronary sinus ostium (CSO) 2, 3
corrected QT interval (QTc) 51, 350
Curly-Coated Retriever, breed predisposition 332
Cushing’s reflex 319
cycle length alternans 207
cyclic antidepressant toxicity 329
d
Dachshund, breed predispositions 95, 290
Dalmatian, breed predisposition 290
decremental conduction 57
delayed after depolarisation (DAD) 68, 69, 69
depolarisation of cardiac cells 21, 22
desflurane, arrhythmias and 341, 343
desmosomes 12, 12
dexamethasone, arrhythmias and 338–341, 338, 343
diabetes mellitus 320
heart rate variability 238
diagnosis, making a rhythm diagnosis from the ECG 53–54, 54
diagnostic resting ECG trace in a cat 35, 36
in a dog 35, 36
diazepam, arrhythmias and 343
differential diagnosis
narrow-QRS complex tachycardias 201–209, 202, 204, 205, 207
supraventricular tachycardias (SVTs) 201–209, 202, 204–206
wide-QRS complex tachycardias 211–217, 212–216
digoxin 140–142, 145, 251, 305
adverse effects 388
dosage 388
interactions with anaesthetic agents 342
use in cats 311
dilated cardiomyopathy (DCM) 137
arrhythmias associated with 285
breeds predisposed to 285
feline 304, 310–311
hypothyroidism and 325
Great Danes 285, 295
Irish Wolfhounds 285, 293, 295, 295
Newfoundlands 285, 295
stages of development 285
treatment 289–290
diltiazem 17, 124, 140, 141–142, 242, 249, 249–250, 273, 305
adverse effects 388
use in cats 311
disopyramide 241
distal atroventricular bundle (DAVB) 3, 3, 4
diuretics 289, 293, 311
diurnal variation in heart rate 227
Doberman Pinscher
breed predispositions 99, 189
dobutamine, interactions with anaesthetic agents 342
dofetilide 249
dronedarone 249
drugs
anaesthetic drugs and arrhythmias 338–341, 343
arrhythmias caused by 329–330
bradycardia caused by 102
see also anti-arrhythmic drugs
Duchenne muscular dystrophy (DMD) 330
duration of arrhythmias, influence on haemodynamic consequences 75
dynamin-1 (DNM1) mutation 331–332
dysautonomia, arrhythmias associated with 319
early afterdepolarisation (EAD) 68–69, 69
ectopic atrial rhythms 113–116, 114, 115
ectopic atrial tachycardia 116–119
ectopic beats 71, 74 see also atrial ectopic beats; junctional ectopic beats; ventricular ectopic beats
ectopic foci, ECG interpretation 357–364
ectopic rhythms 71, 74
Einthoven's triangle 23, 24
electric dipole 21, 22
electrical alternans 49, 206
electrical cardioversion for atrial fibrillation 140, 141
for atrial flutter 124
for ventricular fibrillation (VF) 184
electrical defibrillation, for ventricular fibrillation (VF) 183–184
electrocardiogram (ECG)
interpretation 42–54, 351–379
assessing the heart rhythm 43–45
calculating heart rate 43, 44, 44, 45
ectopic foci 357–364
electrical alternans 49
making a rhythm diagnosis 53–54, 54
mean electrical axis (MEA) 52–53
P-QRS 45
P-QRS-T measurements 45–49
P wave 45–48
paper speeds 43, 43, 43, 44
PR interval 48
QRS complex 45, 48–49
QT interval 51
sample form for ECG report 54, 389–391
self-assessment 393–423
ST segment 50
T wave 52
variation in R wave amplitude 49
ventricular enlargement 49–50, 50
electrocardiographic leads 22–27
hexaxial system 22, 23–25
precordial system 22, 25–27
electrocardiographic report
sample canine form 391
sample feline form 390
electrocardiography 35–54
artefacts 35, 40–42
basic principles 21, 22
chest leads 38
choice of one, three or six leads 36–38, 37
electrical interference artefacts 40, 41, 42
movement artefacts 40, 40–41
muscle activity (EMG) artefacts 40, 40–41
non-standard ECG positioning 35–36
normal ECG 42, 42
normal measurements for cats and dogs 349
obtaining a diagnostic resting ECG trace in a cat 35, 36
obtaining a diagnostic resting ECG trace in a dog 35, 36
paper speeds 43, 43, 43, 44
poor electrode contact artefacts 42, 42
positioning and colour of leads 36–38, 37
procedures 35–38
purring artefact in cats 35, 40
removal of interference frequencies 38–40
signal averaged electrocardiograms (SAECGs) 40
types of ECG electrodes 36
what to record 38

electrocardiography machine settings 38–40
calibration 38
calibration spike 38, 39
use of filters 38–40
vertical axis (sensitivity or gain) 38, 38

electrolyte disturbances, arrhythmias associated with 320–321, 322, 323–324

electrophysiology (EP) laboratory equipment 271–272, 272

electrophysiology (EP) study and catheter ablation 271–283
advantages and disadvantages 271
anaesthesia 272–273
atrial flutter example 279, 282–283, 283
basic EP study protocol 275–277, 275, 276
cardiac arrhythmias in which it may be beneficial 271
definition 271
emergency drugs and equipment 273
EP catheters and their placement 273–275, 273–274
EP laboratory equipment 271–272, 272
examples 278–283
focal atrial tachycardia
example 279, 282–283, 283
indications for 271
intracardiac ECGs 271
monitoring tools 273
OAVRT example 278–279, 279, 280–282
overview of a standard EP study 272–278

patient preparation 272–275
radiofrequency catheter ablation 277–278
vascular access 273

electrophysiology of the heart 9–17
encainide 244
endocrinopathies, arrhythmias caused by 321–322, 325–326
English Bulldog, breed predisposition 290
enhanced normal automaticity 67, 68
entrance block 116
envenomation 330
escape beat 109
esmolol 183, 246–247, 273, 303
adverse effects 388
dosage 388
event ECG recorders 219–220
excitability of cardiac cells 14–15
exercise intolerance 75–76

focal junctional tachycardia (FJT) 149–154, 152
Fourier analysis 38
Frank–Starling's law of the heart 75
frequency 39
furosemide 290

fibrillatory (f) waves 121–123
first-degree atrioventricular block (1AVB) 81, 83, 84
feline 306
long PR interval 48
ECG interpretation 367
first-degree sinoatrial block (1SAB) 79
fish oil supplementation 293
fits 190, 192
seizure case example 198, 198
see also intermittent collapse; syncope

fascia adherens 12, 12
fentanyl, arrhythmias and 343
fibrillatory conduction 121, 123
fibrillatory (f) waves 129–131
first-degree atrioventricular block
(1AVB) 81, 83, 84
feline 306
long PR interval 48
ECG interpretation 367
first-degree sinoatrial block (1SAB) 79
fish oil supplementation 293
fits 190, 192
seizure case example 198, 198
see also intermittent collapse; syncope

fixed parasystole 116
flecainide 124, 145, 242, 244
fludrocortisone 100
flutter (F) waves 121–122, 122
focal atrial fibrillation 121
focal atrial tachycardia (FAT) 116, 116, 121

ECG interpretation 374
EP study and RF ablation 279, 282–283, 283
radiofrequency ablation treatment 278

German Shepherd, breed predispositions 86
German Shepherd inherited ventricular arrhythmias 181, 228, 229, 247, 315–317
clinical presentation 315
diagnosis 315–317, 316
eyear research 315
epidemiology 315

gap junctions 12, 12
gastric dilation and volvulus, arrhythmias associated with 326–327
gastrointestinal disease, arrhythmias associated with 319

Golden Retriever breed predisposition 84
Golden Retriever Duchenne muscular dystrophy (DMD) 330

haemodynamic consequences of arrhythmias 73–75
atrioventricular synchronisation (‘atrial kick’) 75
duration of the arrhythmias 75
effects of high or low heart rate 75
effects on blood pressure (BP) 75
effects on cardiac output (CO) 75
ventricular activation pattern 75
halothane, arrhythmias and 341
harmonics 38–39
heart rate
  calculation from the ECG 43, 44, 44, 45
definition 231
heart rate monitors (wearable) 222
heart rate turbulence (HRT) 234–235
heart rate variability (HRV) 231–238
  analysis of Holter recordings 226
  calculation methods 232–237
  canine heart disease and 237–238
  heart rate turbulence (HRT) 234–235
  normal findings in cats 227, 228
  normal findings in dogs 226–227, 226
  tachogram 225, 225
  total beat count 225
  hyperadrenocorticism 325–326
  hypercalcaemia 320, 323
  hyperkalaemia, ECG changes 320–321, 321, 322
  hyperlipidaemia 320
  hypermagnesaemia 320, 321, 323
  hyperthyroidism 325
  hypertrophic cardiomyopathy (HCM), feline 301–307, 302–308
  hypoadrenocorticism 325
  hypocalcaemia 320, 321, 323
  hypochloridaemia 321
  hypokalaemia, ECG changes 320, 321, 323
  hypomagnesaemia 320, 324
  hypoponataemia 321
  hypothyroidism 320, 322, 325
  hypoxia, arrhythmias associated with 320
i
ibutilide 249
idiopathic polymorphic ventricular tachycardia 180
idiioventricular rhythm 175, 176
imipramine 329
implantable cardiac defibrillator 268
implantable cardioverter-defibrillator (ICD) 183, 184, 317
implantable loop recorders 220–221, 221
impulse conduction, abnormal 70–71
inappropriate sinus bradycardia, feline 307, 307
inappropriate sinus tachycardia 64, 65
incomplete right bundle branch block (IRBBB) 91
infectious disease, arrhythmias associated with 328
inferior inter-atrial pathway 3
informed owner consent, use of anti-arrhythmic drugs 241, 311
inhaled anaesthetic gases, arrhythmias and 341, 343
inherited conditions see breed predispositions
innervation
  atrioventricular node 6
  sinoatrial node 6
inter-atrial band 2, 2–3
inter-atrial pathways 1, 2, 2–3
intercalated disks 12, 12
interference on the ECG 39
intermittent collapse
  clinical examination 192
  cardiac biomarkers 192–193, 193
  case examples 194–199
  clinical approach 189–199
  comparison to human syncope 190
  diagnostic testing 192–193, 193
  differential diagnosis 190, 193
  faints 190, 192
  falling over 190, 192
  fits 190, 192, 198, 198
  logical approach to evaluation of the ECG 194
  managing owner expectations 190, 192
  non-cardiac causes 330–332
  patient history 189–190
  physical interventions for arrhythmias 194
  physiological versus pathological rhythms 194
  primary versus secondary arrhythmias 194
  resting and ambulatory ECGs 193, 193
  see also syncope
intermittent left or right bundle branch block 93–94, 94
internodal pathways 1, 2, 2, 3
intervals (electrocardiogram) 27, 27
intraventricular conduction disturbances 87–94
ion channels 10
ion currents 10, 11
ion exchangers 10
ion pumps 10
Irish Wolfhound
breed predispositions 137
Irish Wolfhound cardiomyopathy
285, 293, 295, 295
ischaemic heart disease, arrhythmias
associated with 320
isoflurane, arrhythmias and
341, 343
isoproterenol 252, 317
isorhythmic atrioventricular
dissociation (IAVD) 149, 152, 152, 153
Type I ECG interpretation 375
Type II ECG interpretation 376
iterative monomorphic ventricular
tachycardia 177, 178
iterative polymorphic ventricular
tachycardia 181
ivabradine 145
J point 27, 29, 32
J wave 32
Josephson's sign 216, 216
junctional ectopic beats 147, 148, 149
classification 147
junctional ectopic tachycardia
(JET) 148
junctional escape beats 147, 150
ECG interpretation 362
junctional escape rhythm
148, 151
ECG interpretation 363
junctional premature
beats see junctional
premature complexes or
contractions (JPCs)
junctional premature complexes or
contractions (JPCs)
147, 150
bigeminy 147
compensatory pauses 147
couplets 147
interpolated beat 147
non-compensatory pauses 147
quadrigeminy 147
trigeminy 147
triplets 147
junctional rhythms 147–164
junctional tachycardia 148–154
definition 148
ECG interpretation 377
k
ketamine 340–341
arrhythmias and 341, 343
L-2-hydroxyglutaric aciduria (L-2-HGA) in Staffordshire Bull
Terriers 330–331
L-carnitine supplementation 293
Labrador Retriever breed
predispositions 84, 86, 255, 290
autosomal recessive CNM 330
exercise-induced collapse
(EIC) 331–332
hereditary myopathy of the
Labrador Retriever
(HMLR) 330
idiopathic epilepsy 331
Lannek’s precordial system modified
by Detweiler and
Patterson 25, 26
left anterior fascicular block
(LAFB) 91, 93
left bundle branch 2, 3, 4, 5
left bundle branch block (LBBB)
91, 92
ECG interpretation 369–370
intermittent 93–94, 94
lidocaine 139, 142, 183, 242, 243, 243, 243, 243–244, 245, 289, 290, 293, 311, 317
adverse effects 388
dosage 388
interactions with anaesthetic
agents 342
long QT syndrome
(LQTS) 180–181
loop ECG recorders 219–222
Lorenz plot 234, 234
Lown–Ganong–Levine syndrome
157, 158
low-pass filter 39
m
macro re‐entrant atrial tachycardias
119, 121
macro re‐entry circuits in
AVRT 159–164, 159
magnesium therapy 145, 252, 303
interactions with anaesthetic
agents 342
Maine Coon cat, breed predisposition
301, 302
Mastiff, breed predisposition 137
mean electrical axis (MEA)
calculation 52–53, 381, 382–385
definition 52
diagnostic use 52
mean heart rate 225, 225
medetomidine, arrhythmias
and 338–341, 338, 340, 343
medications, toxicity 329, 330
methadone 273
arrhythmias and 343
methylxanthine toxicity 329
metoprolol 124, 145, 247
adverse effects 388
dosage 388
Mexiletine 183, 242, 243, 243–244, 245, 289, 290, 293, 311, 317
adverse effects 388
dosage 388
midazolam, arrhythmias and 343
middle internodal pathway 2, 2, 3
midodrine 100
Miniature Schnauzer, breed
predispositions 95, 255
mitral valve disease, heart rate
variability 237–238
modulated parasystole 116
monofascicular blocks 88, 88
monomorphic ventricular
tachycardia 177, 178
morphine, arrhythmias and 343
multifocal atrial tachycardia 116,
118–119, 119
myasthenia gravis 328
myocardial cells, action potential 15
myocardial hypoxia, arrhythmias
associated with 320
myocardial infarction 12, 320, 320
feline 307, 308
n
narrow‐QRS complex tachycardias,
stepwise approach to differential
diagnosis 201–209, 202, 204,
205, 207
neurocardiogenic (vasovagal)
syncope, pacemaker
therapy 255
Newfoundland breed
predispositions 137
dilated cardiomyopathy

couplets 173, 174
ECG interpretation 358
interpolated beat 171, 173
non-compensatory pauses 171, 172
quadrigeminy 173
single or organised forms of ventricular ectopy 171, 173, 173, 174
trigeminy 173, 174
triplets 173, 174
ventricular rhythms 169–184
accelerated idioventricular rhythm (AIVR) 175, 177, 177
aetiologies 169
definition 169, 175
idioventricular rhythm 175, 176
ventricular ectopic beats (VEBs) 169–175
ventricular escape rhythm 175, 176
ventricular fibrillation (VF) 182–184, 182
see also ventricular tachycardia (VT)
ventricular tachycardia (VT) 175, 177–184
differential diagnosis of wide-ORS complex tachycardias 211–217, 212–216
ECG interpretation 379
intra-operative 345–346
ventricular trigeminy, ECG interpretation 360
ventriculo-atrial conduction 152, 153
ventriculophasic sinus arrhythmia 61, 61
verapamil 17, 242, 249,
  250–251, 273
adverse effects 388
dosage 388
volatile agents, arrhythmias and 341, 343
wandering pacemaker 2, 48, 62, 62
ECG interpretation 354
waves (electrocardiogram) 27, 27
Weimaraner, breed predisposition 290
Wenckebach periodicity 112
Wenckebach phenomenon (2AVB Type 1) 306
West Highland White Terrier, breed predispositions 95, 255
wide-QRS complex tachycardias categories of 211
stepwise approach to differential diagnosis 211–217, 212–216
Wilson's central terminal (WCT) 24
Wilson's precordial system modified by Kraus et al. 26, 26–27
working myocardial cells 9
