INDEX

Note: Page numbers followed by f and t indicate figures and tables, respectively.

Aberration coefficients, 174–176
Abraham–Minkowski controversy, 295
Acousto-optic modulator (AOM), 316
Active plasmonics applications, 109
AFM, see Atomic force microscope (AFM)
All-optical synchronizer, 262
All-optical wavelength converters (AOWC), 263
All-pass filters (APF), 83, 84f
Amplifiers, FEL, 459–462
Amplitude scattering matrix, 319–320
Angular momentum of non-paraxial electromagnetic fields, 306–307
Anti-crossing, HCG resonance, 73–74, 74f
Antiresonant reflecting optical waveguides (ARROW), 350, 350f
AOM, see Acousto-optic modulator (AOM)
AOWC, see All-optical wavelength converters (AOWC)
APF, see All-pass filters (APF)
Approximate coupled wave model, 177–181, 178f
Arrayed-waveguide-grating-router (AWGR), 258
ARROW, see Antiresonant reflecting optical waveguides (ARROW)
Ashkin’s gradient force, 300
Atlas, 244
Atomic force microscope (AFM), 416, 418f
Automotive headlights, 7, 7f
AWGR, see Arrayed-waveguide-grating-router (AWGR)
Bartoli’s explanation of radiation pressure, 288–289, 289f
Beer–Lambert absorption law, 408
Benton, Steve, 183
Benton hologram, 183
Benzotriazole (BTAH), 388
BERT, see Bit error rate tester (BERT)
Bessel functions, 321–323
Birefringence of plasmonic crystals, 125–130, 126f, 127f
Bit error rate tester (BERT), 273
INDEX

Blue LEDs, 2f, 3–4
Brightness theorem, 287
Broadband high reflection, 60, 61f
Broadband high transmission, 60, 61f
Broadcast-and-select switch, 263f
Brownian motion, 310, 316
BTAH, see Benzotriazole (BTAH)

Cabrera–Mott theory, metal oxidation, 388
Calcite crystals, 313
Calorimetry, 376
Carpet cloak, 226–232, 227f, 228f, 229f
calcite cloak, 231f, 232f
and natural materials, 230–232, 230f
Cartesian–Lorentz frame, 220
Catalysis applications, 393–396
CdMgZnSe alloy, 41, 42
Center high-mount stop light (CHMSL), 3
CFL, see Compact fluorescent lamps (CFL)
CGH, see Computer generated hologram (CGH)
Chip-scale HCWs, 91
Chirped plasmonic crystals, 138–146, 139f, 140f, 142f
CHMSL, see Center high-mount stop light (CHMSL)
CISCO CRS-1 router, 255, 256f
Clausius–Mossotti Equation, 345
Cobb–Douglas model, 19–20
CoL, see Cost of light (CoL)
Color quality scale (CQS), 11
Color rendering index (CRI), 11
Compact ERL, 465
Compact fluorescent lamps (CFL), 9
Compact optical switch, 94–95
Complementary-metal–oxide–semiconductor (CMOS), 258, 259, 350
hybrid photonic buffers, 275–277, 276f–277f
Computer generated hologram (CGH)
formation, 197–198
wavefront computation and sampling, 193–197
wavefront encoding schemes, 197–198
Computing, photonic data buffers in, 254–255, 254f
Conformal cloaking, 232–234, 234f
Conservative forces, 300–301
Contacting particle lens array patterning (CPLA), 414–415, 415f
Coordinate system, 244
Coordinate transformation, 216, 217, 219, 221, 222f, 244–245, 244f
Corner frequency, 309, 310f
Corpuscular ray model, 298–300
Cost of light (CoL), 19–20
CPLA, see Contacting particle lens array patterning (CPLA)
CQS, see Color quality scale (CQS)
CRI, see Color rendering index (CRI)
Crossing, HCG resonance, 73–74, 74f
Cuboctahedras, 358
Cu nanoparticle corrosion, 388, 389f
Dannard’s law, 258
DARPA, see Defence Advanced Research Projects Agency (DARPA)
DBR, see Distributed Bragg reflectors (DBR)
DCF, see Dispersion-compensated-fiber (DCF)
DC Fourier coefficient, 71
DCG, see Dichromated gelatin (DCG)
Defence Advanced Research Projects Agency (DARPA), 342
Depolarization factor, 128
Detour phase, 197
DFT, see Discrete Fourier transform (DFT)
Dichromated gelatin (DCG), 184–185
Diffeomorphism, 245, 245f
Differential scanning calorimetry (DSC), 376
Diffractive optical element (DOE), 414
Digital holography, 188–193
image enhancement techniques, 192–193
background subtraction, 192
phase shifting correction methods, 192–193
numerical reconstruction methods, 189–192
recording and reconstruction geometry, 189f
Direct nanoplasmonic sensing, 373–374
Discrete Fourier transform (DFT), 194–195
Dispersion-compensated-fiber (DCF), 79
Displays, 8–9
backlighting, 8–9
Distributed Bragg reflectors (DBR), 57–58
Distributed-source lamp, 7–8
Dll, see Dynamic link library (DLL)
DOE, see Diffractive optical element (DOE)
Doped distributed Bragg reflectors (DBR), 28
Doppler shift, 307
Double-HCG VCSEL, 82–83, 82f, 83f
double resonator, 87–89, 88f, 89f
DSC, see Differential scanning calorimetry (DSC); Dye-sensitized solar cells (DSC)
“Dumb” retrofit SSL lamps, 9
dye-sensitized solar cells (DSC), 392
Dynamic holographic assembly, 207f, 208
Dynamic light scattering, 404
Dynamic link library (DLL), 176
EBCM, see Extended boundary condition method (EBCM)
ECG, see Electrical clock generator (ECG)
EDX, see Energy dispersive X-ray spectroscopy (EDX)
Efficiency droop, 23
ELBE, 465
Electrical clock generator (ECG), 276
Electromagnetic cloak, 216, 222–226, 222f, 225f, 226f
Electromagnetic theory, 177, 288, 293–294
Electronically controlled SPP dispersion, 146–151, 148f, 150f
Electrons, 255, 446
ELO, see Epitaxial lateral overgrowth (ELO)
Embossed holograms, 187–188
Emulsion based recording materials, 183–184
Energy dispersive X-ray spectroscopy (EDX), 420, 421f
Enhanced optical transmission (EOT), 116–117, 116f
Epitaxial lateral overgrowth (ELO), 33
Extended boundary condition method (EBCM), 320
Fabry–Perot cavity, 61, 63
Fabry–Pérot reflector, 350, 350f
Fabry–Perot resonance conditions, 69–70, 70f
Far infrared FELs, 463–466
Fast Fourier transform (FFT), 195
FBG, see Fiber Bragg gratings (FBG)
FDI, see Frequency domain interferometer (FDI)

### INDEX

**Plasmonic crystal (Continued)**
- basics of surface plasmon polaritonic crystals, 113–120
- Bloch mode structure, 114–115, 115f
- enhanced optical transmission (EOT), 116–117, 116f
- surface transparency of dielectrics with nanostructured metal, 117–120, 118f, 119f
- birefringence with elliptical basis, 125–130
- chirped plasmonic crystals, 138–146, 139f, 140f, 142f, 145f
- four-level polarization discriminator, 133–134, 133f
- introduction, 107–110
- in OLEDs/LEDs, 117–118
- polarization properties, 120–125
- polarization superprism effect, 130–133, 131f
- surface plasmon polaritons, 110–113
