on what we want our ethics and our ethics enforcement to be, 365–367
**Ethical decision making steps**

step 1: state the issue as clearly as possible, 161–162
step 2: anticipate who will be affected by the decision, 162
step 3: figure out who, IF ANYONE, is the client, 162
step 4: assess whether your competence fit the situation, 162
step 5: review relevant formal ethical standards, 163
step 6: review relevant legal standards, 163
step 7: review the relevant research and theory, 163
step 8: consider whether your personal biases shade your ethical judgment, 163
step 9: consider other factors affect the situation and search for the best response, 164
step 10: consider consultation, 164
step 11: develop alternative courses of action, 164
step 12: think thorough the alternative courses of action, 164–165
step 13: try to adopt the perspective of each person who will be affected, 165
step 14: decide what to do, review or reconsider it, and take action, 165
step 15: document the process and assess the results, 165–166
step 16: assume personal responsibility for the consequences, 166
step 17: consider implications for preparation, planning, and prevention, 166

“Ethical Dilemmas Encountered by Members of the American Psychological Association: A National Survey” (Pope & Vetter), 259–261

**Ethical Guidelines for Professional Care and Services in a Managed Care Environment**, 306

**Ethical intelligence assumptions**

ethical codes are crucial but must include a thoughtful and creative approach, 3
ethical intelligence is an active process of continuous awareness, 2–3
importance of self-assessment of our own ethics, 4
laws and legal standards should not be confused with ethical responsibilities, 3–4
no one is infallible, 4
remember to question ourselves about our casual certainties, 4–5
we and our clients do not live in a vacuum, 5–6
we will often encounter ethical dilemmas without clear and easy answers, 5

**Ethical judgment**

cognitive commitments to making, 27–29
consider whether your personal biases shade your, 163
ethics requires good, 26–27
groups used as resource in reaching an, 30–31
how authorities can influence our, 29
imaginative illusions bias in, 32–35
turning to authorities for, 29
what do we do to discover or screen out our strategies for, 367
on what we want our ethics and our ethics enforcement to be, 365–367
WYSIATI (What You See Is All There Is) mistake in making, 31–32

**Ethical mirror**, 364

**Ethical organizations**

dangers of dichotomous us/them thinking to, 372–373
courage speaking up, listening carefully, and acting with fairness in, 340–342
problematic dynamics that undermine, 373–374
respect the true costs of betrayal in an, 338–340
taking the steps to strengthen ethics in an, 342–343

Code of Conduct: Ethical Standard
2.01a (APA), 105

Ethical reasoning fallacies
1: ad hoc rationalization, 36–37
2: ad hominem or ad feminam, 37
3: affirming the consequent, 37–38, 217
4: appeal to ignorance (ad ignorantium), 38
5: argument to logic (argumentum ad
 logicam), 38
6: begging the question (petitio
 principii), 38–39
7: composition fallacy, 39
8: denying the antecedent, 39
9: disjunctive fallacy, 40
10: division fallacy, 40
11: existential fallacy, 40
12: False analogy, 41
13: false continuum, 41
14: false dilemma, 41
15: false equivalence, 41–42
16: genetic fallacy, 42
17: golden mean fallacy, 42
18: ignoratio elenchi, 42–43
19: mistaking deductive validity for
truth, 43
20: naturalistic fallacy, 43
21: nominal fallacy, 44
22: post hoc, ergo propter hoc (after this,
therefore on account of this), 44
23: red herring, 44–45
24: slippery slope (also known as the
camel’s nose fallacy), 45
25: straw person, 45
you too! (tu quoque), 46
