Hein, A., 6
Held, R., 6
Hinrichs, R., 57
HIVEs adoption strategies: 1. address learning goals, 116; 2. be part of a bigger strategy, 116; 3. clarify concepts to deans, 116–117; 4. stress the shift, 117; 5. present a tight
HIVEs adoption strategies (continued)
project plan, 117–118; 6. use the right terms, 118–119; 7. citing many classes have gotten great results, 119; 8. low risk/thin edge of the wedge, 119; 9. just try one, 120; 10. do something else well, earn credibility, and then spent it, 120
HIVEs components: context and emotional involvement as, 6; games as a learning tool, 5; participation as, 6
HIVEs culture: etiquette rules of, 39–40; frustration-anticipate resolution pairing of, 40–42; instructor’s learning to not interfere characteristic of, 42–43; interactivity of, 15–20; making emotional states explicit characteristic of, 40; synchronous conversations experience of, 39–40
HIVES (Highly Interactively Virtual Environments): building credibility of, 120; clarifying what is meant by, 6–14; components of, 5–6; correct terminology used to describe, 118; costs associated with using, 53–54, 61t, 62, 117–118; culture of interactivity of, 15–20; curriculum incorporation of already available, 53; examining the learning value of, 4; explaining why learning is facilitated by, 5; growing interest in and future applications of, 121–122; illustrated diagram of, 8fig; making curriculum decisions on, 48–53; off-the-shelf, 59–63; role of coaching in, 89–102; technology accessible by students issue, 63–65. See also Virtual environments

IBM, 48
Ice-breaker activity, 13
Infrastructure selection criteria: instructor controls, 65; Second Life classrooms, 65–66; technology accessible by most students, 63–65
Instant messaging, 56
Institutions: building support for HIVE use by, 116–120; HIVEs and associated costs for, 53–54t, 61t, 62; interactive curriculum used by, 49–54t; interactive environments used by, 3–4; internal development group of, 61
Instructional Design and Technology (University of North Dakota), 59
Instruction decisions: content selection criteria for, 66–69; on how to access content, 55–63; infrastructure selection criteria for, 63–66; on self-paced/single player, asynchronous, or synchronous, 69–71; trust as factor in, 71
Instructor prep work: accessing the content, 55–63; chunking content, 76–80fig; connecting with other interested professionals, 55; content selection criteria, 66–69; infrastructure selection criteria, 63–66; piloting, 81–83; self-paced/single player, asynchronous, or synchronous decisions, 69–71; technical support for students, 67, 75–76; trust as selection criterion, 71
Instructors: building support for HIVEs, 116–120; creating evaluation strategies, 103–112; learning to not interfere, 42–43; list of concerns about adopting simulations by, 115–116; necessary preparation required of, 43; support materials by, 66–68, 78–80fig; technical support provided by, 67, 75–76; virtual environment ability to control or gate, 65. See also After action reviews (AARs); Second Life coaching; Students
Interactive curriculum: accessing real-world communities, 50; using already available HIVEs for, 53; building credibility of, 120; building support for HIVEs and, 116–120; costs associated with HIVEs, 53–54t, 61fig–62, 117–118; creating sense of presence through virtual worlds, 49–50; using educational simulations for critical content, 53; using games, 50–51; increasing knowledge using, 51–53; providing access to labs and props, 51, 52fig. See also Content; Pedagogical elements
Interactive spreadsheets: description of, 32–34; originally created by professors, 62; screenshot of, 33fig
Interactivity: enabling, 15–16; game levels of, 17–19; leadership models and levels of, 19–20; learning goals of true, 15; pre-game levels of, 16–17; when to include curriculum, 49–53
Interface: piloting the communication, 82–83; between Second Life and other sims, 71–73; teaching students the, 93
