Preface ix
Acknowledgements xix
Introduction xxi

PART I SOCIAL AND POLITICAL ATTITUDE MODELLING 1
1 Attitudes: A Brief History of the Concept 3
2 Political Attitudes: Conceptual and Computational Modelling Backgrounds 31

PART II SOCIAL AND POLITICAL INFLUENCE MODELS OF ATTITUDE CHANGE 63
3 Voting Choice Computer Simulation Model 65
4 Community Referendum Model 83

PART III THE ROLE OF PHYSICAL SPACE IN POLITICAL ATTITUDE MODELLING 93
5 Social Impact Theory and Model 95
6 Dynamic Social Impact Theory and Model 107

PART IV POLITICAL ATTITUDE APPROACHES BASED ON SOCIAL INFLUENCE, CULTURE CHANGE AND COLLECTIVE ACTION MODELLING 139
7 Culture Dissemination Model 141
8 Diversity Survival Model 147
9 Collective Action Modelling 159
PART V  MULTIDIMENSIONAL SPATIAL MODELS  165
10  The System Dynamics Modelling Paradigm  169
11  Multidimensional Attitude Change Models. Galileo  179

PART VI  POLITICAL COGNITION MODELLING  189
12  The JQP Model  197
13  Political Attitude Strength Simulation Modelling  211

PART VII  COMPUTATIONAL AND SIMULATION MODELLING OF IDEOLOGY  219
14  Ideological Polarization Model  227
15  Ideological Landscapes Model  237
16  Complex Integrative Models of Political Ideology  241

PART VIII  POLITY MODELLING  245
17  Polity Instability Models Featuring Ethnic and Nationalist Insurgence  253
18  Polity Instability Model Featuring Reconstruction after State Failure  263
19  Polity Dynamics Model Featuring the Relationship between Public Issue Emergence and Public Policy Development  269
20  Polity Instability Model Featuring Revolution against Authoritarian Regime  277

PART IX  EPILOGUE  285
21  Shaping New Science  287
