### 1 Fundamentals

*Matthew Jones, Kirsten Mitchell-Wallace, Matthew Foote, and John Hillier*

1.1 Overview  
1.1.1 What Is Included  
1.1.2 What Is Not Included  
1.1.3 Why Read This Chapter?  

1.2 Catastrophes, Risk Management and Insurance  

1.3 What Are Catastrophe Models?  
1.4 Why Do We Need Catastrophe Models?  
1.5 History of Catastrophe Models  
1.6 Who Provides and Uses Catastrophe Models?  
1.7 What Are Catastrophe Models Used For?  
1.8 Anatomy of a Catastrophe Model  
1.8.1 Hazard  
1.8.2 Vulnerability  
1.8.3 Exposure  
1.8.4 Loss and Financial Perspectives  
1.8.5 Platform  

1.9 Model Input  
1.9.1 Exposure  
1.9.2 Financial Structure  
1.9.3 Portfolio Hierarchy  

1.10 Model Output: Metrics and Risk Measures  
1.10.1 Common Metrics  
1.10.2 Exceedance probability curve characteristics  
1.10.3 More Advanced Metrics  
1.10.4 Event Loss Tables and Year Loss Tables  
1.10.5 Event Loss Table (ELT)  
1.10.6 Year Loss Table (YLT)  

1.11 Statistical Basics for Catastrophe Modelling  
1.11.1 Discrete Distributions  
1.11.2 Continuous Distributions  
1.11.3 Coherent Risk Measures  

*Notes*  
*References*
## 2 Applications of Catastrophe Modelling

*Kirsten Mitchell-Wallace*

2.11 Regulation and Best Practice in Catastrophe Modelling

Junaid Seria, Claire Souch, and Paul Nunn

2.11.1 The Evolution of Catastrophe Modelling as a Profession and Best Practice

2.11.2 Rating Agencies

2.11.3 Regulation and Catastrophe Modelling

2.11.4 Case Study: Catastrophe Models and Solvency Regulation, Solvency II

2.11.5 Case Study: Regulation of Catastrophe Models for Ratemaking

2.12 Case Study: Catastrophe Modelling for Reinsurance and Retrocession Purchase

Juan England

2.12.1 Introduction

2.12.2 Determining the Total Limit Required

2.12.3 Layering of a CAT XL Programme

2.12.4 Price

2.12.5 Cost Allocation

2.12.6 Conclusion

2.13 Government Schemes and Insurance

Matthew Eagle

2.13.1 Introduction

2.13.2 Government Schemes with Standalone Products Managed by a Central Organization

2.13.3 Government Schemes Where Catastrophe Cover Is Provided as an Add-on to Fire

2.13.4 Government-Backed Reinsurance/Pooling Schemes

2.13.5 Private Insurance Company Pools Supported by Government Legislation

2.13.6 Case Study: UK Flood Re

2.14 Catastrophe Models and Applications in the Public Sector

Rashmin Gunasekera

2.14.1 Introduction

2.14.2 Public Sector Catastrophe Models

2.14.3 Applications of Public Sector Catastrophe Models

2.14.4 Case Study: Country Disaster Risk Profiles (CDRP)

2.15 Insurance Linked Securities

Arnab Chakrabati

2.15.1 What Are Insurance Linked Securities?

2.15.2 From Insurance to Reinsurance to ILS

2.15.3 Common ILS Instruments

2.15.4 Preliminaries of ILS Instrument: Measurement and Layering of Losses

2.15.5 Pricing an ILS Contract

2.15.6 Pricing Cat Bonds with the Thin Layer Model

2.15.7 Growth of the Market for ILS

2.15.8 Conclusion

2.16 Effective use of Catastrophe Models

Ian Cook, Matthew Jones, Adam Podlaha, and Kirsten Mitchell-Wallace

2.16.1 Treatment of Uncertainty in Catastrophe Models

2.16.2 Importance of Framework: A Tool, Not an Answer

4 Building Catastrophe Models  
*Matthew Foote, Kirsten Mitchell-Wallace, Matthew Jones, and John Hillier*  
4.1 Overview 297  
4.1.1 What Is Included 297  
4.1.2 What Is Not Included 298  
4.1.3 Why Read This Chapter? 298  
4.2 Introduction 298  
4.3 Hazard 301  
4.3.1 Deterministic Versus Probabilistic Hazard Models 302  
4.3.2 Representing the Hazard Severity 307  
4.3.3 Understanding the Historical Hazard 308  
4.3.4 Deterministic Hazard Models: Historical Reconstructions 315  
4.3.5 Site-Based Extrapolation: A Local Solution 316  
4.3.6 Building a Probabilistic Event-Set 319  
4.3.7 Secondary or Consequent Perils 331  
4.3.8 Time-Dependent Hazard Modelling and Clustering of Catastrophe Events 333  
4.4 Exposure Models and Databases 334  
4.4.1 Economic or Insured Exposure Data? 336  
4.4.2 Economic and Insurance Industry Exposure Database Development Approaches 337  
4.4.3 Bottom-Up Industry Exposure Database Development 339  
4.5 Vulnerability 341  
4.5.1 Vulnerability Function Development 343  
4.5.2 Empirical Vulnerability Approaches 348  
4.5.3 Analytical Vulnerability Approaches 355  
4.5.4 Use of Design Codes in Vulnerability Function Development 357  
4.5.5 Using Buildings Damage to Determine Other (Non-Structural) Types of Loss 362  
4.5.6 Vulnerabilities for Non-Standard Exposures 363  
4.5.7 Validating Vulnerability Models 365  
4.6 Integrating Model Components and the Geographical Framework 367  
4.6.1 Relative Spatial Resolution/Nominal Scale of Source Data 367  
4.6.2 Geodetic and Coordinate Bases of Data Sources 368  
4.6.3 Relative Vintage of Source Data 368  
4.6.4 Point Representation Versus Cell, Area Geographies 368  
4.6.5 Data Generalization, Interpolation and Smoothing 369
4.7 The Financial Model
4.7.1 Why We Need a Financial Model
4.7.2 Uncertainty
4.7.3 Case Study: Combining Distributions: Convolution
4.7.4 Applying Financial Structures
4.7.5 Case Study: Back-Allocation
4.7.6 Financial Model Output
4.8 Model Validation
4.9 Conclusion

5 Developing a View of Risk
Matthew Jones
5.1 Overview
5.1.1 What Is Included
5.1.2 What Is Not Included
5.1.3 Why Read This Chapter?
5.2 Introduction
5.2.1 Why Develop a View of Risk?
5.2.2 What Developing a View of Risk Involves
5.2.3 Practical Considerations in a Resource-Constrained World
5.2.4 Insurance Versus Reinsurance
5.3 Governance and Model Change Management
5.3.1 Governance
5.3.2 The View of the Risk Process
5.3.3 Prioritization
5.3.4 Vendor Selection and High-Level Model Evaluation
5.3.5 Detailed Model Evaluation
5.3.6 Non-Modelled Peril Evaluation
5.3.7 Sign-off
5.3.8 Implementation
5.3.9 Review Triggers and Frequency
5.3.10 Other Governance Aspects
5.4 How to Develop a View of Risk
5.4.1 Understanding What Is in the Model
5.4.2 Analysing Model Output (Including Sensitivity Testing)
5.4.3 Actual Versus Modelled, Comparing to Own Company Experience
5.4.4 Comparing Multiple Models
5.4.5 Using Industry Data
5.4.6 Considering the Time Period of Risk
5.4.7 Understanding What Is Not in the Model: Non-Modelled Risk
5.5 Implementing a View of Risk
5.5.1 Different Uses in a Company
5.5.2 Consistency in an Organization
5.5.3 Methods of Implementation: Single Model
5.5.4 Methods of Implementation: Multiple Models
5.6 Conclusion
