## Contents

**Introduction**  
 XXXVII

**Assessment Test**  
 LV

### Chapter 1  
**Installing Windows Server 2016**  
1

- Features and Advantages of Windows Server 2016  
2
- Planning the Windows Server 2016 Installation  
6
  - Server Roles in Windows Server 2016  
6
  - Migrating Roles and Features to Windows Server 2016  
10
- Deciding Which Windows Server 2016 Versions to Use  
11
- Deciding on the Type of Installation  
13
- NIC Teaming  
16
- Installing Windows Server 2016  
17
- Activating and Servicing Windows  
31
  - Key Management Service  
32
  - Automatic Virtual Machine Activation  
33
  - Active Directory-Based Activation  
34
  - Servicing Windows Server 2016  
34
- Using Windows Deployment Services  
35
  - Preparing the WDS Server  
36
  - WDS Server Requirements  
36
  - Network Services  
37
  - Installing the WDS Server Components  
37
  - Preparing the WDS Client  
39
- Understanding Features On Demand  
39
- Summary  
41
- Video Resources  
41
- Exam Essentials  
41
- Review Questions  
42

### Chapter 2  
**Installing in the Enterprise**  
45

- Understanding Automated Deployment Options  
46
  - An Overview of the Microsoft Deployment Toolkit 2013 Update 2  
47
  - An Overview of Unattended Installation  
55
  - An Overview of the System Preparation Tool and Disk Imaging  
57
  - Overview of the Windows Assessment and Deployment Kit  
61
  - Windows Imaging and Configuration Designer  
62
- Summary of Windows Server 2016 Deployment Options  
62
Deploying Unattended Installations 64
  Using the System Preparation Tool to Prepare an Installation for Imaging 65
  Using Windows Imaging and Configuration Designer (Windows ICD) to Create a Disk Image 67
  Installing from a Disk Image 69
  Using the Deployment Image Servicing and Management Tool 70
  Using Windows System Image Manager to Create Answer Files 73
  Microsoft Assessment and Planning (MAP) Toolkit 75
Understanding Hyper-V 77
  What Is Virtualization? 78
  Linux and FreeBSD Image Deployments 78
Summary 79
Video Resources 80
Exam Essentials 80
Review Questions 81

Chapter 3 Configuring Storage and Replication 85
Understanding File Systems 86
  Resilient File System (ReFS) 87
  NTFS 88
Storage in Windows Server 2016 91
  Initializing Disks 91
  Configuring Basic and Dynamic Disks 92
  Managing Volumes 94
  Storage Spaces in Windows Server 2016 95
  Redundant Array of Independent Disks 96
  Mount Points 99
  Microsoft MPIO 100
  Configuring iSCSI Target 102
  Internet Storage Name Service 103
  Implement Thin Provisioning and Trim 105
  Fibre Channel 106
  Network Attached Storage 106
  Virtual Disk Service 106
  Understanding Data Center Bridging 108
Configuring Permissions 109
  Understanding SMB 109
  Understanding NTFS 110
  Understanding Shared Permissions 112
  How NTFS Security and Shared Permissions Work Together 114
  Understanding NFS Shares 116
Chapter 4  Understanding Hyper-V  137

Hyper-V Overview  139
  What Is Virtualization?  139
  Hyper-V Features  140
  Hyper-V Architecture  145
  Hyper-V Requirements  147
Hyper-V Installation and Configuration  148
  Install the Hyper-V Role  148
  Hyper-V in Server Manager  151
  Using Hyper-V Manager  152
  Configure Hyper-V Settings  153
  Manage Virtual Switches  154
  Managing Virtual Hard Disks  157
Configuring Virtual Machines  162
  Creating and Managing Virtual Machines  162
  Linux and FreeBSD Image Deployments  175
PowerShell Commands  179
Summary  182
Video Resources  183
Exam Essentials  183
Review Questions  185

Chapter 5  Configuring High Availability  187

Components of High Availability  188
Achieving High Availability  189
  High Availability Foundation  190
Understanding Network Load Balancing  191
  NLB Requirements  193
  Installing NLB Nodes  193
  Upgrading an NLB Cluster  198
PowerShell Commands for an NLB Cluster  199
Achieving High Availability with Hyper-V 200
  Implementing a Hyper-V Replica 201
  Understanding Live Migration 205
  Implementing Storage Migration 208
  PowerShell Commands for Hyper-V High Availability 210
Summary 211
Video Resources 212
Exam Essentials 212
Review Questions 213

Chapter 6  Understanding Clustering 215
Achieving High Availability with Failover Clustering 216
  Failover Clustering Requirements 218
  Workgroup and Multi-Domain clusters 219
  Site-Aware, Stretched, or Geographically Dispersed Clusters (Geoclustering) 220
  Cluster Quorum 220
  Validating a Cluster Configuration 223
  Creating a Cluster 228
  Clustered Application Settings 231
  Resource Properties 233
Windows Server 2016 Clustering Features 236
PowerShell Commands for Clustering 239
Implementing Storage Spaces Direct 241
  The Benefits of Storage Spaces Direct 243
  Deployment Options 243
  Requirements to Set Up Storage Spaces Direct 244
  Storage Spaces Direct Using Windows PowerShell 245
Summary 247
Video Resources 247
Exam Essentials 247
Review Questions 248

Chapter 7  Configuring Windows Containers 251
Understanding Windows Containers 252
  Container Terminology 253
  Install and Configure Server Containers 253
  Install and Configure Windows Containers 260
  Tagging an Image 265
  Uninstall an Operating System Image 265
  Creating New Images Using Dockerfile 266
Understanding Hyper-V Containers 268
Managing Container Networking 269
Using Docker Hub Repository 270
Using Microsoft Azure for Images 271
Chapter 11 Configuring DNS 401

Introducing DNS 402
   The Form of an IP Address 403
   Understanding Servers, Clients, and Resolvers 408
   Understanding the DNS Process 409

Introducing DNS Database Zones 415
   Understanding Primary Zones 415
   Understanding Secondary Zones 416
   Understanding Active Directory Integrated DNS 417
   Understanding Stub Zones 419
   GlobalName Zones 420
   Zone Transfers and Replication 421

Advantages of DNS in Windows Server 2016 424
   Background Zone Loading 424
   Support for IPv6 Addresses 425
   Support for Read-Only Domain Controllers 425
   DNS Socket Pools 425
   DNS Cache Locking 426
   Response Rate Limiting 426
   Unknown Record Support 427
   IPv6 Root Hints 427
   DNS Security Extensions 427
   DNS Devolution 428
   Record Weighting 429
   Netmask Ordering 429
   DnsUpdateProxy Group 429
   DNS Policies 429

Introducing DNS Record Types 430
   Start of Authority (SOA) Records 431
   Name Server Records 432
   Host Record 433
   Alias Record 433
Contents xix

Chapter 12 Configuring DHCP 467

Understanding DHCP 468
  Introducing the DORA Process 469
  Advantages and Disadvantages of DHCP 470
  Ipconfig Lease Options 471
  Understanding Scope Details 472
Installing and Authorizing DHCP 474
  Installing DHCP 474
  Introducing the DHCP Snap-In 475
  Authorizing DHCP for Active Directory 476
Creating and Managing DHCP Scopes 478
  Creating a New Scope in IPv4 479
  Creating a New Scope in IPv6 486
  Changing Scope Properties (IPv4 and IPv6) 489
  Changing Server Properties 490
  Managing Reservations and Exclusions 491
  Setting Scope Options for IPv4 493
  Activating and Deactivating Scopes 496
  Creating a Superscope for IPv4 496
  Creating IPv4 Multicast Scopes 497
  Integrating Dynamic DNS and IPv4 DHCP 499
Using DHCP Failover Architecture 501
  Working with the DHCP Database Files 502
Contents

Working with Advanced DHCP Configuration Options 503
  Implement DHCPv6 504
  Configure High Availability for DHCP,
    Including DHCP Failover and Split Scopes 505
  Configure DHCP Name Protection 507
PowerShell Commands 508
Summary 510
Exam Essentials 511
Review Questions 512

Chapter 13 Implement IP Address Management 515
Understanding IPAM 516
  Installing IPAM 517
  Provision IPAM Manually or by Using Group Policy 520
  Configure Server Discovery 526
  Create and Manage IP Blocks and Ranges 527
Managing Services 528
  Managing DNS 529
  Managing DHCP 534
IPAM Access and Auditing 539
  Migrate to IPAM 541
  Delegate IPAM Administration 541
  Manage IPAM Collections 545
  Virtual Machine Manager and IPAM 545
  Auditing IPAM 547
PowerShell Commands for IPAM 550
Summary 553
Exam Essentials 553
Video Resources 553
Review Questions 554

Chapter 14 Configuring Network Access 557
Overview of Dial-Up Networking 558
  What DUN Does 559
  How DUN Works 559
Overview of Virtual Private Networks 562
  What VPNs Do 563
  VPNs and Windows Server 2016 563
  How VPNs Work 564
Configuring Your Remote Access Server 567
  Configuring PPP Options 567
Understanding a VPN 574
  How a VPN Works 574
  Enabling RRAS as a VPN 575
Configuring a VPN 575
  Configuring VPN Ports 575
  Troubleshooting VPNs 576
Managing Your Remote Access Server 579
  Managing Remote Users with a RADIUS Server 579
  Monitoring Overall Activity 579
  Controlling Remote Access Logging 579
  Reviewing the Remote Access Event Log 583
  Monitoring Ports and Port Activity 583
  Network Address Translation 584
  Configuring Routes 584
  RAS Gateway 586
Configuring a VPN Client 586
  The General Tab 587
  The Options Tab 588
  The Security Tab 589
  The Networking Tab 591
  The Sharing Tab 592
Configuring a Web Application Proxy 593
  Publishing Applications 593
  Configuring Pass-Through Authentication 594
Understanding DirectAccess 595
  DirectAccess vs. VPNs 595
  Understanding the DirectAccess Process 595
  Knowing the DirectAccess Infrastructure Requirements 597
Overview of Wireless Access 598
  Configuring Wireless Access 599
Remote Access Security 600
  User Authentication 600
  Connection Security 602
  Access Control 603
Configuring User Access 603
  Setting Up User Profiles 604
  Using Network Access Policies 606
  NPS as a RADIUS Proxy Server 609
  Importing and Exporting NPS Policies 611
  Using Remote Access Profiles 613
  Setting Up a VPN Network Access Policy 616
Configuring Security 618
  Controlling Server Security 618
  Configuring Network Access Protection 620
PowerShell for Remote Access 622
Summary 623
Exam Essentials  624
Video Resources  624
Review Questions  625

Chapter  15  Understanding File Services  627
Configuring File Server Resource Manager  628
  FSRM Features  628
  Installing the FSRM Role Service  629
Configure File and Disk Encryption  630
  Using BitLocker Drive Encryption  630
  Features of BitLocker  631
  Windows 7 and 2008 R2 vs. Windows 10 and 2016  633
  Using EFS Drive Encryption  635
Configuring Distributed File System  637
  Advantages of DFS  637
  Types of DFS  638
  What’s New in Windows Server 2016  640
  Remote Differential Compression  642
Configure Advanced File Services  645
  Configure the NFS Data Store  645
  Configure BranchCache  646
Implementing an Audit Policy  653
  Overview of Auditing  653
  Implementing Auditing  654
  Viewing Auditing Information  655
  Using the Auditpol.exe Command  656
  Windows Server 2016 Auditing Features  657
Configure and Optimize Storage  658
  Configure iSCSI Target and Initiator  658
  Configure Internet Storage Name Server  659
  Implement Thin Provisioning and Trim  661
  Manage Server Free Space Using Features on Demand  661
  Configure Tiered Storage  662
Summary  662
Exam Essentials  662
Review Questions  664

Chapter  16  Configuring High Availability  667
Components of High Availability  668
Achieving High Availability  669
  High Availability Foundation  670
Understanding Network Load Balancing  671
  NLB Requirements  673
  Installing NLB Nodes  673
Chapter  17  Implementing Software Defined Networking  729

Understanding Software Defined Networking  730
  Network Controllers  731
  Internal DNS Service (iDNS)  731
  Remote Direct Memory Access and Switch
    Embedded Teaming  734
  Windows Server Containers  735
  Hyper-V Components  737

Hyper-V Overview  737
  What Is Virtualization?  737
  Hyper-V Features  738
  Hyper-V Architecture  743
  Hyper-V Requirements  744
## Contents

Hyper-V Installation and Configuration 746  
  Install the Hyper-V Role 746  
  Hyper-V in Server Manager 749  
  Using Hyper-V Manager 749  
  Configure Hyper-V Settings 751  
  Manage Virtual Switches 752  
  Managing Virtual Hard Disks 755  
Configuring Virtual Machines 760  
  Creating and Managing Virtual Machines 760  
  Linux and FreeBSD Image Deployments 772  
PowerShell Commands 776  
Summary 780  
Exam Essentials 780  
Review Questions 781

### Chapter 18  Installing Active Directory 783

Verifying the File System 784  
  Resilient File System (ReFS) 785  
  NTFS 786  
Verifying Network Connectivity 789  
  Basic Connectivity Tests 789  
  Tools and Techniques for Testing Network Configuration 790  
Understanding Domain and Forest Functionality 792  
  About the Domain Functional Level 792  
  About Forest Functionality 794  
Planning the Domain Structure 795  
Installing Active Directory 796  
  New to Active Directory 796  
  Read-Only Domain Controllers 797  
  Adprep 797  
  Active Directory Prerequisites 798  
  The Installation Process 798  
Deploying Active Directory in Windows Azure 806  
  Installing Additional Domain Controllers 806  
  by Using Install from Media 806  
Verifying Active Directory Installation 807  
  Using Event Viewer 807  
  Using Active Directory Administrative Tools 809  
  Testing from Clients 811  
Creating and Configuring Application Data Partitions 812  
  Creating Application Data Partitions 813  
  Managing Replicas 814  
  Removing Replicas 815  
  Using ntdsutil to Manage Application Data Partitions 815
Chapter 19 **Administer Active Directory**

Configuring DNS Integration with Active Directory 817
Summary 819
Exam Essentials 819
Review Questions 821

### Contents

**Chapter 19 Administer Active Directory**

Administer Active Directory 825

Active Directory Overview 826
- Understanding Active Directory Features 827
- Understanding Security Principals 828
An Overview of OUs 829
- The Purpose of OUs 830
- Benefits of OUs 830
Planning the OU Structure 831
- Logical Grouping of Resources 831
- Understanding OU Inheritance 833
- Delegating Administrative Control 833
- Applying Group Policies 835
Creating OUs 835
Managing OUs 839
- Moving, Deleting, and Renaming OUs 839
- Administering Properties of OUs 840
- Delegating Control of OUs 841
Troubleshooting OUs 844

Creating and Managing Active Directory Objects 845
- Overview of Active Directory Objects 845
- Managing Object Properties 852
- Understanding Groups 856
- Filtering and Advanced Active Directory Features 858
- Moving, Renaming, and Deleting Active Directory Objects 859
- Resetting an Existing Computer Account 861
- Understanding Dynamic Access Control 861
- Managing Security and Permissions 862
- Using ACLs and ACEs 863
Using Group Policy for Security 864
- Fine-Grained Password Policies 866
Publishing Active Directory Objects 868
- Making Active Directory Objects Available to Users 869
- Publishing Printers 869
- Publishing Shared Folders 870
- Querying Active Directory 871
- Using the Active Directory Administrative Center 872
Using the Command Prompt for Active Directory 876
 Configuration 876
## Contents

PowerShell for Active Directory 877  
Summary 879  
Exam Essentials 879  
Review Questions 881  

Chapter 20  
### Maintaining Active Directory 885

Overview of Network Planning 886  
The Three Types of Networks 887  
Exploring Network Constraints 887

Overview of Active Directory Replication and Sites 888  
Replicating Active Directory 889  
Understanding Active Directory Site Concepts 889  
Understanding Distributed File System Replication 893

Implementing Sites and Subnets 894  
Creating Sites 895  
Creating Subnets 897  
Configuring Sites 898

Configuring Replication 899  
Intrasite Replication 900  
Intersite Replication 900  
RODCs and Replication 906  
Configuring Server Topology 907  
Using Universal Group Membership Caching 910  
Configuring DNS SRV Records 911

Monitoring and Troubleshooting Active Directory Replication 911  
About System Monitor 912  
Troubleshooting Replication 912  

Reasons for Creating Multiple Domains 914  
Reasons for Using Multiple Domains 914  
Drawbacks of Multiple Domains 917

Creating Domain Trees and Forests 917  
Planning Trees and Forests 918  
The Promotion Process 921  
Creating a Domain Tree 922  
Joining a New Domain Tree to a Forest 924  
Adding Additional Domain Controllers 924

Demoting a Domain Controller 925  
Managing Multiple Domains 926  
Managing Single-Master Operations 927  
Managing Trusts 931  
Managing UPN Suffixes 935  
Name Suffix Routing 935  
Managing Global Catalog Servers 935
Managing Universal Group Membership Caching 937
Upgrading Existing Domains and Forests 938
Maintain Active Directory 939
Overview of the Windows Server 2016 Backup Utility 940
Setting Up an Active Directory Backup 945
Restoring Active Directory 946
Active Directory Recycle Bin 948
Restartable Active Directory 948
Offline Maintenance 949
Monitoring Replication 951
Using the ADSI Editor 952
Wbadmin Command-Line Utility 952
Summary 953
Exam Essentials 954
Review Questions 957

Chapter 21 Implementing GPOs 961
Introducing Group Policy 962
Understanding Group Policy Settings 963
The Security Settings Section of the GPO 966
Client-Side Extensions 967
Group Policy Objects 967
Group Policy Inheritance 968
Planning a Group Policy Strategy 969
Implementing Group Policy 970
Creating GPOs 970
Linking Existing GPOs to Active Directory 973
Forcing a GPO to Update 973
Managing Group Policy 975
Managing GPOs 975
Security Filtering of a Group Policy 977
Delegating Administrative Control of GPOs 979
Controlling Inheritance and Filtering Group Policy 980
Assigning Script Policies 981
Understanding the Loopback Policy 983
Managing Network Configuration 983
Configuring Network Settings 985
Automatically Enrolling User and
Computer Certificates in Group Policy 985
Redirecting Folders 987
Managing GPOs with Windows PowerShell 988
Group Policy Cmdlets 988
Item-Level Targeting 989
Back Up, Restore, Import, Copy, and Migration Tables 990
Deploying Software Through a GPO 993
   The Software Management Life Cycle 993
   The Windows Installer 995
   Deploying Applications 999
Implementing Software Deployment 1000
   Preparing for Software Deployment 1000
   Software Restriction Policies 1001
   Using AppLocker 1002
   Group Policy Slow Link Detection 1002
   Publishing and Assigning Applications 1002
   Applying Software Updates 1004
   Verifying Software Installation 1005
   Configuring Automatic Updates in Group Policy 1006
Configuring Software Deployment Settings 1006
   The Software Installation Properties Dialog Box 1007
   Removing Programs 1010
   Microsoft Windows Installer Settings 1011
Troubleshooting Group Policies 1011
   RSoP in Logging Mode 1013
   RSoP in Planning Mode 1015
   Using the gprestat.exe Command 1016
   Using the Group Policy Infrastructure Status Dashboard 1018
Summary 1018
Exam Essentials 1019
Review Questions 1021

Chapter 22 Understanding Certificates 1025
Features of Windows Server 2016 Certificate Services 1026
   Active Directory Certificate Services Roles 1027
   Planning the Certificate Authority Hierarchy 1028
   Installing AD CS 1034
       Configuring Active Directory Certificate Services 1037
PowerShell for AD CS 1048
Summary 1049
Exam Essentials 1050
Review Questions 1051

Chapter 23 Configure Access and Information Protection Solutions 1055
Implement Active Directory Federation Services 1056
   What Is a Claim? 1056
   What’s New for AD FS in Windows Server 2016? 1060
   Active Directory Federation Services Installation 1062
Table of Exercises
