David Sibbet is founder and CEO of The Grove Consultants International, a full-service organization consulting firm in The Presidio national park’s Thoreau Center for Sustainability in San Francisco. He is a master graphic facilitator, information designer, and considered a leader in the field of visual facilitation and process leadership. The Grove is hub to a global network of associates, partners, and other visual practitioners. He is co-directing the Grove’s Global Learning & Exchange Network (GLEN) with Gisela, focused on evolving new approaches to collaboration and cross boundary work. David consults on organization change worldwide across government, private, and nonprofit sectors. He is author of the best-selling Visual Facilitation series from Wiley, including Visual Meetings, Visual Teams, and Visual Leaders. David is also designer of the Grove’s Sustainable Organizations Model, the Drexler/Sibbet Team Performance System, the Grove’s Visual Planning Systems, and author of The Grove’s Facilitation Series. He holds a masters degree in Journalism from Northwestern University, a BA in English from Occidental College, and a Coro Fellowship in Public Affairs. In 2013 he was awarded the Organizational Development Network’s lifetime achievement award for creative contribution to the field of OD. For further information see www.grove.com and www.davidsibbet.com

Gisela Wendling, PhD. is vice president of Global Learning at The Grove Consultants International. She provides organization development, change, and program design services to business, nonprofit organizations, and communities. Her expertise is based on 25 years of consulting and working within a wide range of organizations in the private and public sectors. Gisela has held leadership positions in the high-tech industry and education. She holds a doctorate from the School of Human and Organizational Systems at Fielding Graduate University. She is former director of the master’s program in Organization Development at Sonoma State University, CA. For several years she facilitated the California Roundtable on Water and Food Supply, a statewide, multisector stakeholder initiative focused on applying whole systems approaches to developing sustainable water management solutions. At the Grove she leads Designing and Leading Change workshops and the Leading Change Program. She is co-director of the Grove’s new Global Learning and Exchange Network (GLEN). She also teaches in the Professional Psychology PhD. program at Meridian University, CA.

Gisela brings a multicultural perspective (on change) to her work that includes field experiences in South America, Africa, and Australia, as well as herself being German-born and raised. Translating these deeply relevant perspectives into innovative approaches to organization and community development continues to inspire her and makes her work with her clients more insightful, culturally and globally sensitive, and ultimately more transformative. For further information see https://glen.grove.com and www.giselawendling.com.

Gisela and David are married and work together all over the world.
