INDEX

Note: Page numbers in *italics* indicate figures.

AAP. *See* American Academy of Periodontology (AAP)

Aberrant frenum attachment, 12, 180, 182, 185, 198

Abrasion
  - cervical, 177
  - resulting in pulpal inflammation, 210, 211
  - root, 182
  - toothbrush, 46, 311

Abssesses
  - periodontium, 11
  - socket preservation and, 269
  - systemic antibiotics and, 78

Accessory pulpal canals, 54

Acellular dermal matrix (ADM) graft, 189, 192–194, 192–194
  - advantages of, 196
  - derivation of, 196
  - disadvantages of, 196
  - maxillary left side, 193, 193
  - socket grafting and, 268
  - uses of, 196

Acquired neutropenia, periodontitis associated with, 11

*Actinobacillus actinomycetemcomitans*, aggressive
  - periodontitis and, 12, 35, 37, 38

*Actinomyces*, 211

Actisite, 68, 70
  - placement of, 70
  - side effects, 71

Acute endodontic lesion, 215

ADA. *See* American Dental Association (ADA)

Adjustable stopper and bone ejector (ASBE) trephine, sinus
elevation procedure and, 257, 257, 300, 301, 303, 305

ADM. *See* Acellular dermal matrix (ADM) graft

Advanced periodontitis, ADA diagnosis of, 7

Aesthetic crown lengthening, 100–101, 223

Age
  - furcation and, 129
  - implant placement and, 292

risk of complications in guided bone regeneration and, 161
  - tooth discoloration and, 297

Aggressive disease, AAP diagnosis of, 10

Aggressive periodontitis, 11, 32–39
  - AAP classification of, 34
  - case study, 32–35
  - compared to chronic periodontitis, 13, 44, 46
  - features of, 12
  - generalized, 13, 37
  - localized, 13, 32–35, 37
  - prevalence of, 38
  - systemic antibiotics and, 77, 78, 83

Air abrasives, 61

Alcoholism, risk of complications in guided bone regeneration and, 161

Allergic reactions, gingival manifestations of, 11

Allografts. *See also* Acellular dermal matrix (ADM) graft;
  Freeze-dried bone allograft (FDBA)
  - for guided bone regeneration, 162
  - sinus elevation and, 252
  - to treat intrabony defects, 132–141

Alloplastic materials, 138
  - choosing, 153
  - forms of, 152
  - for guided bone regeneration, 162
  - resorbable, 153
  - sinus elevation and, 252
  - socket grafting and, 268
  - treatment of intrabony defects using, 149–154, 190–196
  - uses of, 152–153

Al-Shammari et al classification of furcations, 128

Alveolar ridge defect
  - choices for treatment, 281, 283–284
  - Seibert’s classification of, 284

Alveoloplasty, 223
  - extraction of supraerupted teeth with simultaneous, 223–224

Risk factors, for periodontal disease, 8
Root abrasion, free gingival grafts and, 182
Root amputation, differentiating from root resection and hemisection, 119
Root canal therapy, 209, 213
  for root fracture, 239, 243
Root concavity, 52–53, 53
  furcations and, 129
Root conditioning, 189
Root divergence, 53, 53
Root form, furcations and, 129
Root fractures, 116, 243–244
  apical, 238–240
  classification of, 153
  furcations and, 129
  gingival diseases/periodontitis and, 12
Root fusion, 53
Root preparation, in connective tissue grafting, 174–175, 174–175
Root proximity, 52, 52
Root resection, 112–121
  case study, 117
  commonly resected roots, 120
  differentiating from root amputation and hemisection, 119
  failure rates of, 120
  for furcations, 130
  indications and contraindications for, 119
  procedure, 114–115, 115
  reasons for failure of, 116
  restoration of tooth following, 116–117
  vital, 119
Root sensitivity, following flap osseous surgery, 110
Root trunk length, 53–54, 54
  furcations and, 129
Rotary toothbrushes, 17
Rotated palatal pedicle graft, 170–171, 171
RPP. See Rapidly progressive periodontitis (RPP)
RRR. See Replacement external root resorption (RRR)
Rubber cups, 61
Rubber tip, 310, 311
Scaffolds, 268
Scalers, 60, 61, 62
Scaling and polishing, 60
Scaling and root planing (SRP), 310
  adjunctive chemotherapeutics to, 69, 70
  for chronic periodontitis, 42
  for furcations, 130
Scalpel gingivectomy, 89
Schneiderian membrane, sinus elevation procedure and, 247, 248, 251, 252, 254, 257, 258, 259, 300–301
Scrubbing technique, 313
Secondary occlusion, 236
Second-degree occlusal trauma, 140
SECTG. See Subepithelial connective tissue graft (SECTG)
Seibert's classification, of alveolar ridge defect, 283
Semilunar coronally repositioned flap, 305, 305
Severe chronic periodontitis, case study, 263–266
Severe periodontitis, AAP diagnosis of, 10
Short clinical crowns, 100, 223
Sickle scaler, 60, 61, 62
Siebert classification of ridge defects, 10, 161
Sinus elevation, 300–303, 301, 305–306
alloplastic materials for, 153
complications, 253–254
contraindications for, 305–306
crestal, 252, 255–262, 257
determinants of success, 253
guided bone regeneration and, 163
immediate implant placement and, 299–306
lateral, 248–249, 248–249, 252–254
Sinus pneumatization, 251
Smoking
complications following free gingival grafts and, 189
inflammation with plaque accumulation and, 315
as risk factor for periodontitis, 8, 17
risk of peri-implantitis and, 297–298
systemic antibiotics, periodontal treatment and, 78, 80
Socket augmentation, 268
Socket grafting, 263–270
free gingival grafts and, 182
guided bone regeneration and, 163
Soft tissue and gingival examination, 5
Sonic scalers, 62
Son of Sevenless-1 gene mutation, 29
Spiramycin, in periodontitis treatment, 78
Spirochetes, 211
Splinting, 237, 239, 243
Spreader instrument, 257, 258
Squamous cell carcinoma, invasive, 215
Square distal wedge, 110
SRP. See Scaling and root planning (SRP)
Stationary jiggle technique of toothbrushing, 311, 314
Stillman's toothbrushing technique, 313
modified, 17
Streptococcal species-associated lesions, 11
Streptococcus, 211
Subepithelial connective tissue graft (SECTG), 177, 178, 185, 186–187, 187, 189
Subgingival plaque, 313
Sublingual edema/bleeding, following guided bone regeneration, 164
Subluxations, 243
Sulcus depth, true periodontal pocket, 30
Supracrestal fiberotomy, 201
Supraerupted teeth, extraction of, 223–224
Surface modifiers, 137
Sweeping technique, 313
Systemic antibiotics, 73–84
advantages of, 76–77
after reconstructive periodontal therapy, 138
bacterial resistance and, 80, 84
clinical benefits, additional, 84
following regenerative periodontal therapy, 163
following reimplantation, 242
guidelines for use, 80, 83–84
prophylactic use of, 80
risks of, 77
selection of, 79, 83
time of administration, 79–80
Systemic conditions
gingival diseases modified by, 11
gingival manifestations of, 11
periodontitis as manifestation of, 11
plaque-induced gingivitis and, 17
Tannerella forsythia, red complex and, 68
Tarnow and Fletcher classification of furcation invasion, 55
Taurodontism, 54
Teeth
discoloration of, 297
impacted, 230
Temporomandibular joint pain and symptoms, 236
Tetracycline
contraindications for, 38
local delivery of, 68, 69. See also Actisite
in periodontitis treatment, 78
as surface modifier, 137
tooth discoloration and, 297
Tetracycline-HCl, for root conditioning, 189
Thermal injury, resulting in pulpal inflammation, 210, 211
Throat cancer, 17
Thrombocytopenic purpura, idiopathic, plaque-induced gingivitis and, 17
Tissue biopsy, for diagnosis of desquamative gingivitis, 20
Titanium mesh/titanium foil, 138, 162
Tobacco use. See also Smoking
tooth staining and, 297
Tongue, visualization and palpation of, 18
Tooth, attachment apparatus, 99, 100
Toothbrush abrasion, 46, 311
Toothbrushes, 310, 311
rotary, 17
Tooth brushing, 310–311, 313, 314
Bass method, 17
gingival recession and aggressive, 185
modified Stillman's technique, 17
INDEX

Tooth extraction
- for furcations, 130
- immediate implant insertion, 295–296, 295–296
- prior to implant replacement, 144
- socket preservation and, 265–266, 266
- tissue healing following, 267–268

Tooth fracture
- case study, 149–151
- crown lengthening and, 101
- sinus grafting and immediate implant placement, 299–303

Tooth loss, prognostic system for, 153–154

Tooth Sleuth, 210

Transforming growth factor-β, gingival enlargement and, 31

Trauma
- differentiated from occlusion, 236
- occlusal (See Occlusal trauma)
- tooth discoloration and, 297

Traumatic lesions, gingival manifestations of, 11, 22

Traumatogenic occlusion, 236

Treatment planning, 220, 222

Trephine
- adjustable stopper and bone ejector, 257, 257, 300, 301, 303, 305
- pointed, 257, 257

Treponema denticola, red complex and, 68

Treponema pallidum-associated lesions, 11

Triangular distal wedge, 110

Tunnel procedure, 130, 192, 192

Type I collagen, 148

Ulcerative stomatitis, chronic, desquamative gingivitis and, 22

Ultrasonics, 61, 62

Ultrasonic scalers, 62

Underbite, 237

Universal curettes, 60, 62, 62

Valium, 215

Varicella-zoster infections, 11

Vascular endothelial growth factor (VEGF), 147

VDO. See Vertical dimension of occlusion (VDO)

VEGF. See vascular endothelial growth factor (VEGF)

Vertical bone loss, 109

Vertical classification of furcations, 128

Vertical dimension of occlusion (VDO), 219, 220, 222
  alteration of, 223

Vertical fracture, 212

Vertical grooving, 109

Vertical maxillary excess, 101

Vertical ridge augmentation, guided bone regeneration for, 163

Vesiculoerotic diseases, 22

Vestibule, 201

Vestibuloplasty, 181, 197–203, 202
  defined, 201
  techniques, 202–203

Viruses, gingival lesions caused by, 11

Vital root resection, 119

Vitamin K deficiency, plaque-induced gingivitis and, 17

Widows’ peaks, 102–103

Wolinella, 211

World Workshop in Periodontics, 153

Xenografts, 138
  for guided bone regeneration, 162
  sinus elevation and, 252
  socket grafting and, 269

Xylocaine, 215

Zinc oxide-eugenol cement, 239

Zucchelli technique, 174, 174
