Preface ix

Introduction xi

CARBON MATERIALS AND FUEL CERAMICS 3

Irradiation-Induced Dimensional Change and Fracture Behavior of C/C Composites for VHTR Application
Junya Sumita, Taiju Shibata, Kazuhiro Sawa, Ichiro Fujita, Jun Ohashi, Kentaro Takizawa, W. Kim, and J. Park

R&D and Irradiation Plans for New Nuclear Grade Graphites for Application to VHTR
Kentaro Takizawa, Kazuyuki Kakehashi, Toshiaki Fukuda, Tohru Kida, Kazuhiro Sawa, Junya Sumita, Yutai Katoh, and Lance L. Sneed 13

CRYSTALLINE, AMORPHOUS, AND COMPOSITE MATERIALS FOR WASTE IMMOBILIZATION 23

Functionalized Silica Aerogels: Advanced Materials to Capture and Immobilize Radioactive Iodine

Layered Double Hydroxides for Anion Capture and Storage
J. Phillips and L. J. Vandepere 33

Bottom-Up Design of a Cement for Nuclear Waste Encapsulation
T. Zhang, L. J. Vandepere, and C. Cheeseman 41
FUEL CERAMICS AND IRRADIATION EFFECTS

Microstructural Analysis of Secondary Phases in Silicon Carbide
Fabricated with SiC Nano-Powder and Sintering Additives
Takaaki Koyanagi, Sosuke Kondo, and Tatsuya Hincki

Measurements of Irradiation Creep Strain in Silicon Carbide
Irradiated with Silicon Ions
S. Kondo, T. Koyanagi, T. Hincki, and O. Hashitomi

JOINING AND INTEGRATION OF CERAMIC STRUCTURES

Preliminary Results on Joining of Thin SiC/SiC Composites by
Silicides Compounds and Local Heating
Elodie Jacques, Laurence Maille, Yann Lepetitcorps, Christophe Lorrette,
and Cédrick Sauder

Joining of NITE SiC/SiC Composite and Tungsten for Nuclear
Applications
H. Kishimoto, T. Abe, T. Shibayama, J. S. Park, H. C. Jung, Y. Kohno,
and A. Kohyama

PROCESSING

Integrated R & D of SiC Matrix Ceramic Composites for
Energy/Environmental Application
Akira Kohyama, Y. Kohno, H. Kishimoto, J. S. Park, H. C. Jung, and
K. Shimoda

Effects of Two-Step Sintering on Densification and Performance of
Near-Net Shaped NITE-SiC/SiC Composites
N. Nakazato, H. Kishimoto, K. Shimoda, Y. Kohno, and A. Kohyama

CERAMICS FOR ELECTRIC ENERGY GENERATION, STORAGE,
AND DISTRIBUTION

Ceramic Processing for Dense Magnesium Diboride
C. E. J. Dancer, R. I. Toddi, and C. R. M. Groovenor

Investigation on Phase Transformation of YBCO-In2O3 Composite
Superconductor Cooled Down via Different Routes
Y. M. Z. Ahmed, M. S. Hassan, and H. Abd-Elatif

Morphologies and Electrochemical Capacitor Behaviors of
Co(OH)2/Polyaniline Composite Films
Hiroshi Itohara and Tetsuro Kobayashi

Optimization of Spark-Plasma-Sintering Conditions for Maximizing
Figure of Merit of La-Doped SrTiO3
Asami Kikuchi, Sidney Lin, Noriyuki Okinaka, and Tomohiro Akiyama

vi Ceramic Materials for Energy Applications
ADVANCED MATERIALS AND TECHNOLOGIES FOR RECHARGEABLE BATTERIES

Design of (Thio) Phosphates for High Performance Lithium Ion Batteries
Stefan Adams, Rayavara Prasada Rao

Lithium Ion Conductive Solid Electrolyte with Porous/Dense Bi-Layer Structure for All Solid State Battery
Kiyoshi Kanamura, Ryo Cosone, Hirokazu Munakata, and Masashi Kotobuki

Autogenic Reactions for Fabricating Lithium Battery Electrode Materials
Vilas G. Pol and M. M. Thackeray
