List of Contributors  xi
Preface to the Thirteenth Edition  xv
Preface to the First Edition  xvi

1 Anatomy and Function  1
   Jay H. Lefkowitch
   Development of the liver and bile ducts  1
   Anatomy of the liver  1
   Functional liver anatomy: sectors and segments  3
   Anatomical abnormalities of the liver  3
   Anatomy of the biliary tract  4
   Surface marking  5
   Methods of examination  6
   Microanatomy of the liver  7
   Hepatic ultrastructure (electron microscopy) and organelle functions  9
   Functional heterogeneity of the liver  13
   Dynamics of the hepatic microenvironment in physiology and disease  14
   Hepatocyte death and regeneration  15
   References  16

2 Liver Function in Health and Disease: Clinical Application of Liver Tests  20
   George Mells and Graeme Alexander
   Bilirubin metabolism  21
   Bile acids  23
   Lipid and lipoprotein metabolism  26
   Amino acid metabolism  28
   Plasma proteins  29
   Carbohydrate metabolism  31
   Markers of hepatocellular injury: the serum transaminases  32
   Markers of cholestasis: alkaline phosphatase (ALP) and gamma-glutamyl transferase (GGT)  33
   Haematology in liver disease  34
   Effects of ageing on the liver  35
   References  36

3 Biopsy of the Liver  39
   David Patch and Tu Vinh Luong
   Selection and preparation of the patient  39
   Techniques  40
   Risks and complications  43
   Sampling variability  45
   Naked-eye appearances  46
   Preparation of the specimen  46
   Interpretation: a stepwise diagnostic approach  46
   Indications  48
   Special methods  49
   References  50

4 Coagulation in Cirrhosis  53
   Nicolas M. Intagliata and Stephen H. Caldwell
   Introduction  53
   Normal coagulation pathways: a hepatologist’s perspective  54
   The coagulation system in cirrhosis  56
   Bleeding and thrombosis in cirrhosis  57
   Clinical laboratory tests of the coagulation system in cirrhosis  58
   Conclusion  60
   References  60

5 Acute Liver Failure  62
   Shannan R. Tujios and William M. Lee
   Definition  62
   Epidemiology and aetiologies  63
   Clinical features  66
   Initial investigations  67
   Complications and management of acute liver failure  68
   Specific therapies  73
   Prognosis  75
   Liver transplantation  76
   Conclusion  78
   References  78
6  Hepatic Fibrogenesis  
   Meena B. Bansal and Scott L. Friedman  
   Introduction 82  
   Natural history of hepatic fibrosis 82  
   Cellular and molecular features of hepatic fibrosis 83  
   Clinical aspects of hepatic fibrosis 89  
   Emerging antifibrotic targets and strategies 89  
   References 90

7  Non-invasive Assessment of Fibrosis and Cirrhosis  
   Avik Majumdar and Massimo Pinzani  
   Introduction 93  
   The use of invasive and non-invasive tests 93  
   Non-invasive tests: specifics 95  
   Conclusions 102  
   References 103

8  Hepatic Cirrhosis  
   P. Aiden McCormick and Rajiv Jalan  
   Definition 107  
   Causes of cirrhosis 107  
   Anatomical diagnosis 108  
   Reversible cirrhosis 110  
   Clinical cirrhosis: compensated versus decompensated 110  
   Prognosis (Child–Pugh score, MELD, UKELD) 111  
   Clinical and pathological associations 112  
   Management 119  
   Acute-on-chronic liver failure 120  
   References 123

9  Ascites  
   Guadalupe Garcia-Tsao  
   Mechanisms of ascites formation 127  
   Clinical features 130  
   Differential diagnosis 132  
   Spontaneous bacterial peritonitis 132  
   Treatment of cirrhotic ascites 134  
   Hyponatraemia 138  
   Refractory ascites 139  
   Hepatorenal syndrome 141  
   Prognosis 144  
   References 145

10 Hepatic Encephalopathy in Patients with Cirrhosis  
    Marsha Y. Morgan  
    Clinical Features 151  
    Classification 153  
    Prevalence and consequences 154  
    Diagnosis 154  
    Diagnostic comorbidities, confounders, and alternatives 160  
    Pathogenesis 161  
    Management 167  
    Prevention 174  
    References 174

11 Portal Hypertension in Cirrhosis  
    Jaime Bosch and Annalisa Berzigotti  
    Introduction 180  
    Pathophysiology and rational basis of therapy 185  
    Evaluation and diagnosis 188  
    Natural history and prognosis 194  
    Management 196  
    Treatment of portal hypertension according to clinical scenarios 200  
    References 205

12 Vascular Disorders of the Liver and Extrahepatic Portal Hypertension  
    Dominique-Charles Valla  
    Hepatic artery occlusion 209  
    Aneurysms of the hepatic artery 210  
    Hepatic arterioportal fistula 211  
    Hepatic vascular malformations in hereditary haemorrhagic telangiectasia 212  
    Congenital portosystemic shunts – Abernethy malformation 213  
    Budd-Chiari syndrome – hepatic venous outflow tract obstruction 214  
    Extrahepatic portal vein obstruction – portal vein thrombosis and portal cavernoma in the absence of cirrhosis 217  
    Portal vein thrombosis in patients with cirrhosis 220  
    Idiopathic non-cirrhotic intrahepatic portal hypertension 221  
    Hypoxic hepatitis 223  
    Congestive cardiac hepatopathy 223  
    Non-obstructive sinusoidal dilation (NOSD) and peliosis 225  
    References 226

13 Jaundice and Cholestasis  
    Peter L. M. Jansen  
    Introduction 231  
    Mechanics of bile formation 233  
    Syndrome of cholestasis 238  
    Causes of isolated hyperbilirubinaemia 239  
    Causes of cholestatic and hepatocellular jaundice 242
# Contents

## 14 Gallstones and Benign Biliary Disease

*James S. Dooley, Kurinchi S. Gurusamy, and Brian R. Davidson*

1. Introduction 256
2. Imaging the gallbladder and biliary tract 256
3. Gallstones 259
4. Symptoms and complications of gallstones 264
5. Cholecystectomy 266
6. Complicated acute gallbladder disease 268
7. Percutaneous cholecystostomy 269
8. Asymptomatic gallbladder stones 269
9. Non-surgical treatment of gallstones in the gallbladder 269
10. Common bile duct stones 270
11. Acute gallstone pancreatitis 272
12. Large common duct stones 272
13. Mirizzi syndrome 273
14. Intrahepatic gallstones 274
15. Haemobilia 274
16. Functional gallbladder and sphincter of Oddi disorders 274
17. Other gallbladder pathologies 276
18. Relationships to malignant change 279
20. Anastomotic strictures following biliary surgery 282
21. IgG4-related sclerosing cholangitis 283
22. Chronic pancreatitis 283
23. References 284

## 15 Malignant Biliary Diseases

*Rahul S. Koti and John Bridgewater*

1. Carcinoma of the gallbladder 294
2. Carcinoma of the bile duct (cholangiocarcinoma) 296
3. Other biliary malignancies 301
4. Metastases at the hilum 301
5. Ampullary and periampullary carcinomas 301
6. Conclusion 305
7. References 305

## 16 Fibropolycystic Liver Diseases and Congenital Biliary Abnormalities

*Nedim Hadžić and Mario Strazzabosco*

1. Overview 308
2. Polycystic liver disease 309
3. Fibropolycystic diseases 313
4. Autosomal recessive polycystic kidney disease 314
5. Congenital hepatic fibrosis 314
6. Caroli disease 316
7. Microhamartomas (von Meyenberg complexes) 318
8. Choledochal cysts 318
9. Solitary non-parasitic liver cyst 320
10. Congenital anomalies of the biliary tract 321
11. References 324

## 17 Primary Biliary Cholangitis

*David E. J. Jones*

1. Clinical features 328
2. Diagnosis 329
3. Epidemiology 333
4. Aetiology and pathogenesis 334
5. Management 335
6. Prognosis 337
7. References 338

## 18 Sclerosing Cholangitis

*Tom Hemming Karlsen and Kirsten Muri Boberg*

1. Introduction 341
2. Primary sclerosing cholangitis 341
3. Secondary sclerosing cholangitis 350
4. Sclerosing cholangitis in systemic inflammatory diseases 351
5. References 351

## 19 Autoimmune Hepatitis and Overlap Syndromes

*Ashnila Janmohamed and Gideon M. Hirschfield*

1. Introduction 355
2. Disease overview 356
3. Biological determinants of disease 357
4. Disease presentation 359
5. Laboratory features 361
6. Imaging 363
7. Liver biopsy and histological features 363
8. Differential diagnosis 365
9. Diagnostic dilemmas 366
10. Making a diagnosis in practice 367
11. Management strategies 368
12. Pretreatment and on-treatment considerations 371
13. Treatment challenges and alternative agents 371
14. Pregnancy and autoimmune hepatitis 372
15. The elderly and autoimmune hepatitis 372
16. Childhood-onset autoimmune hepatitis 373
17. Autoimmune hepatitis and liver transplantation 373
18. Overlap syndromes 374
19. Conclusion 377
20. References 377

29 Nutrition and Chronic Liver Disease 561
Manuela Merli
Introduction 561
Epidemiology and general characteristics 562
Causes of malnutrition 562
Consequences of malnutrition 564
Diagnosis and assessment 565
Treatment and management 568
References 570

30 Pregnancy and the Liver 572
Rachel H. Westbrook and Catherine Williamson
Introduction 572
Normal physiology in pregnancy 572
Pregnancy-related liver diseases 573
Pre-existing liver diseases and pregnancy 578
Liver transplantation and pregnancy 580
Liver disease coincidentally arising with pregnancy 581
Conclusion 582
References 582

31 The Liver in the Neonate, in Infancy, and Childhood 588
Susan M. Siew and Deirdre A. Kelly
Investigation of liver disease in children 588
Neonatal jaundice 589
Neonatal unconjugated hyperbilirubinaemia 589
Neonatal liver disease (conjugated hyperbilirubinaemia) 591
Neonatal hepatitis 594
Inherited disease in the neonate 596
Genetic cholestatic syndromes 598
Structural abnormalities: biliary atresia and choledochal cyst 600
Acute liver failure in infancy 602
Liver disease in older children 605
Metabolic disease in older children 607
Cirrhosis and portal hypertension 613
Liver transplantation 613
Tumours of the liver 614
References 615

32 The Liver in Systemic Diseases 622
James S. Dooley and Christopher McNamara
Collagen-vascular and autoimmune disorders 622
Hepatic granulomas 624
Sarcoidosis 626
The liver in endocrine disorders 628
Amyloidosis 629
Porphyrias 632
The liver in haemolytic anaemias 634
The liver in myelo- and lymphoproliferative disease 638
Bone marrow transplantation 639
Lymphoma 640
Extramedullary haemopoiesis 642
Rare haematological disorders that may involve the liver 643
Lipid storage diseases 643
Non-metastatic complications of malignancy 646
References 646

33 The Liver in Infections 652
Sanjay Bhagani and Ian Cropley
Introduction 652
Jaundice of infections 652
Pyogenic liver abscess 652
Hepatic amoebiasis 655
Tuberculosis of the liver 657
Hepatic actinomycosis 659
Syphilis of the liver 659
Perihepatitis 660
Leptospirosis 660
Relapsing fever 663
Lyme disease 663
Rickettsial infections 663
Fungal infections 664
Schistosomiasis (bilharzia) 665
Malaria 667
Kala-azar (visceral leishmaniasis) 668
Echinococcosis (hydatid disease) 668
Ascariasis 673
Strongyloides stercoralis 674
Trichinosis 674
Toxocara canis (visceral larva migrans) 674
Liver flukes 675
References 676

34 Imaging of the Liver and Diagnostic Approach of Space-Occupying Lesions 682
Neil H. Davies and Dominic Yu
Ultrasound 682
Computed tomography 683
Magnetic resonance imaging 685
Radioisotope scanning 688
Positron emission tomography 691
Contents

MR spectroscopy 691
Conclusions and choice of imaging technique 691
References 691

35 Benign Liver Tumours 693
Ian R. Wanless
Diagnosis of focal liver lesions 693
Hepatocellular lesions 693
Biliary and cystic lesions 699
Mesenchymal tumours 700
References 701
