### Index

Page numbers in italics represent figures.

- **abdominal obesity** 66
- **acute stress** 60–65, 68
  - alarm system 64–5
  - blood coagulation 62, 78
  - digestion and energy mobilisation 63
  - immune response 62
  - memory and conditioning 63–4
  - pain 61–2
  - stage fright 65
  - stress hormones 60–61
  - tunnel vision 63
- **adaptation**
  - costs of 6
  - general adaptation syndrome 72
  - see also evolutionary perspective
- **adrenaline** 56, 80, 93
  - levels of 94
- **adrenocorticotrophic hormone (ACTH)** 57
- **age and job stress** 40
- **alarm system** 64–5
- **alcohol** 27–8
- **allostasis** 69
- **allostatic load** 44, 69–73, 70, 130, 142
- **anabolic processes** 73–4
- **animals, stress in** 60
- **antidepressants** 28, 115
- Antonovsky, Aaron 113
- **apathetic children** 72–3
- **assembly lines** 23
- **ASSET model** 19, 111, 139
- **atherosclerosis** 78, 79
- **attributes** 55
- **autonomic nervous system** 53–4, 54
- **beliefs** 55
- **blood coagulation** 62, 78
- **body mass index (BMI)** 83
- **boundaryless jobs** 30
- **burnout** 71, 76–8
- **cancer** 89–90
- **cardiovascular disease** 78–9, 78
  - Baltic states 130
  - gender differences 121–2
  - and Type A behaviour 49–50
  - see also coronary heart disease
- **cardiovascular system** 57–8
- **catabolic processes** 73–4
- **catastrophic thoughts** 67
- **changing employment relationships** 37–9
- **childbirth** 61
- **children** 132
  - age of having 26
  - contribution to workload 28
  - and women’s stress 128
  - and workload 28
  - chronic fatigue 71, 76–8, 77
  - chronic stress 66–8
  - and neuronal death 82
  - Cinderella hypothesis 88, 116
  - circadian rhythm 117
  - climate change 59
- **Cognitive Activation Theory of Stress (CATS)** 41, 44
  - cognitive function 28–9, 81–2
  - conditioning 55, 63–4
  - memory 63–4
  - tunnel vision 63
- **Cohen, Sheldon** 79
- common cold 79–80, 80
communication technology 29–31
advantages and disadvantages 136
effect on work conditions 135
management out of work 117
comprehensibility 113
conditioning 55, 63–4
Cook–Medley Hostility Scale 50
coping with stress 58–9, 59
women 40
coronary heart disease 3, 4, 63
and job strain 50–52
risk factors 4
and Type A behaviour 49–50
see also cardiovascular disease
corticosterone 56
cortisol 56, 76–7, 80–81, 93
chronic stress 66
circadian variation 61
hypercortisolism 76–7
insulin resistance 83
levels of 94
in women 125
cortisol awakening response 72
counselling 108
Cushing’s syndrome 76, 81–2
cytokines 55

Darwin, Charles, *On the Origin of Species* 4
demand–control model 30, 43, 43, 95, 122
demands vs resources 42, 43
demographic changes 76–8, 77
factors increasing 25
diabetes 5, 118
immune component 62
metabolic syndrome 82–3
risk of myocardial infarction 4
diet, and cardiovascular risk 51
digestion 63
dinosaurs, extinction of 59
downsizing 1, 25
economic recession 142
effort-reward imbalance 41, 44, 95
electromyography 86–7, 87
electronic communications 12
empowerment 129, 143
endless work 29–31
derphins 114
energy mobilisation 63
enterprise culture 17, 33
environmental changes 59

Europe
demographic changes 140–41
occupational conditions 130
evolutionary perspective 4–10
executive functioning 115

family structure
changes in 7
see also children; gender roles; gender differences
fat distribution 66
fibromyalgia syndrome 67, 68, 71–2
fight or flight 54, 59
financial crisis 142
flexible workforce 34–5
age and tenure 40
changing employment relationships 35–7
gender role 37–9, 39
flexicurity 14
Foresight Project on Mental Capital and Well-being 9–10, 109, 109

symptoms, health and life expectancy 120–22
unpaid work and total workload 126–8, 127
work tasks 122–5, 123, 125
gender roles 26, 37–9, 39
general adaptation syndrome 72
global competition 11–13
global economy 11–13
global issues 141–4
global warming 142–3
and job creation 143
greenhouse effect 142

Hartig, Terry 115
Hawthorne effect 108
hazardous working conditions 9
men’s involvement in 121
health interventions 102–3
individual 104–5
policies 111–12
health promotion 102–19, 129
health status 5
health and well-being 33–4, 109–11, 109
and productivity 138–40
work-related 136–8
healthcare workers 12
healthy work 106–9, 130–31
components of 131
heart rate 115
*Helicobacter pylori* 60, 89
hippocampus, stress-induced atrophy 81–2
historical aspects 1–10
HIV/AIDS 89–90
Holmes, Thomas 6
home working 31
*Homo sapiens* 9
horizontal organisation 30
hormones see stress hormones;
and separate hormones
hospitals, changes in 12
household duties, responsibility for 39
hypertension 58
risk of myocardial infarction 4
hyperventilation 87
hypocortisolism 69
hypothalamic pituitary adrenocortical system 56
hypothalamus 56
illegitimate tasks 45
immune function 79–81, 80
immune response 62
immune system 54–5
infectious diseases 5
common cold 79–80, 80
insecurity climate 14
insulin resistance 83
International Day for the Evaluation of Abdominal Obesity (IDEA) study 83
Japan, demographic changes 140–41
Job Content Questionnaire 43, 73
job control 43
job demand 43
job insecurity 14, 36
