## Contents

**Contributors**  
xiii  

**Preface**  
xv  

### Physical Examination

1  
- Charting  
- Goals of the consultation appointment  
- Conclusion  

### Endocrinology

11  
- Section 1 Pituitary Gland  
  - Growth hormone disorders  
  - Diabetes insipidus  
  - 11  
- Section 2 Thyroid Glands  
  - Canine hypothyroidism  
  - Feline hyperthyroidism  
  - Canine thyroid tumors  
  - 14  
- Section 3 Parathyroid Glands  
  - Hypoparathyroidism  
  - Hyperparathyroidism  
  - 22  
- Section 4 Adrenal Glands  
  - Hypoadrenocorticism: Addison’s disease  
  - Hyperadrenocorticism: Cushing’s disease  
  - Pheochromocytoma  
  - 25

### Section 5 Pancreas

31  
- Feline diabetes mellitus  
- Canine diabetes mellitus  
- Canine diabetic ketoacidosis  
- Insulinomas  
- Glucagonoma  

### Section 6 Miscellaneous Hormones, Glands, and Disease

47  
- Calcitriol  
- Erythropoietin  
- Gastrin  
- Gastrinoma  
- The kinins  
- Melatonin  
- Natriuretic peptides  
- Renin  
- Somatostatin  
- Other rare neuroendocrine tumors  
- Bibliography  

### Musculoskeletal

69  
- Section 1 Anatomy and Physiology  
- The skeletal system  
- The muscular system  
- 69  
- Section 2 Selected Diagnostics in Musculoskeletal Disease  
- Arthrocentesis  
- Muscle biopsy  
- 72

---

**COPYRIGHTED MATERIAL**
Section 3 Diseases of the Musculoskeletal System

- Inflammatory joint disease
- Noninflammatory joint disease
- Neuromuscular diseases
- Inflammatory myopathies
- Hepatozoonosis
- Neoplasia

Section 4 General Musculoskeletal Examination

Section 5 Musculoskeletal Therapy

- Veterinary rehabilitation therapy
- Palliative radiation therapy

Section 6 Musculoskeletal Nutrition

- Nutrients
- Antioxidants
- Energy and growth
- Osteoarthritis
- Body condition scoring
- Body condition score uses
- Muscle condition scoring

Chapter 4

The Neurological Examination

- Clinical signs and the relevant anatomy
- Seizures
- Encephalopathies
- Cerebral neoplasia
- Inflammatory/infectious etiologies: encephalitis
- Meningitis
- Cranial nerve syndromes
- Spinal diseases
- Neuromuscular diseases
- Diagnostic testing
- Pharmacology
- Nursing considerations
- Neurological glossary
- Suggested readings

Chapter 5

Thrombotic Disorders in Small Animal Medicine

- Physiology
- Thrombotic disorders
- Diagnosis
- Therapy
- Client education

Chapter 6

Respiratory

Section 1 Upper Airway Disease
- Anatomy and physiology
- Diseases of the upper airway
- Nutritional considerations
- Anesthetic and analgesic considerations

Section 2 Mediastinal Disease
- Anatomy and physiology
- Mediastinitis
- Pneumomediastinum
- Mediastinal masses

Section 3 Lower Airway Disease
- Anatomy and physiology
- Clinical signs
- Diagnostic testing
- Specific airway diseases and treatment
- Anesthetic and analgesic considerations

Section 4 Pulmonary Parenchymal Disease
- Anatomy and physiology
- Clinical signs
- Diagnostic testing
- Treatment
- Diseases
- Nutritional considerations
- Anesthetic and analgesic considerations

Section 5 Pleural Disease
- Anatomy and physiology
- Clinical signs
- Diagnostic testing
- Treatment
- Nutritional considerations
- Anesthetic and analgesic considerations

Section 6 Anesthetic and Analgesic Considerations in Respiratory Disease
- Premedication
- Induction
- Maintenance anesthesia
- Monitoring
- Recovery

Section 7 Feeding Considerations for Respiratory Disease

Bibliography

Chapter 7

Hematology

Section 1 Anatomy and Physiology
- The circulatory system
- The lymphatic system
- The spleen
- The coagulation system
Chapter 10

Urinary and Renal Diseases

Section 1 Urinary Anatomy and Physiology

Section 2 Clinical Signs

Section 3 Urinary Diseases

Chronic kidney disease

Acute renal failure

Urinary tract infections

Pyelonephritis

Urolithiasis

Prostatic diseases

Lower urinary tract disease in cats

Ectopic ureters

Urethral sphincter mechanism incompetence

Protein-losing nephropathy

Urinary neoplasia

Section 4 Urinary Diagnostics and Therapeutic Implications

Urinalysis

Complete blood count and serum biochemistry profile

Proteinuria

Blood pressure

Urine culture

Section 5 Urinary Tract Biopsy Techniques

Aspiration biopsy

Biopsy

Sample handling

Postbiopsy nursing care

Section 6 Urinary Imaging

Radiology

Ultrasound

Cystoscopy and vaginoscopy

Computed tomography

Section 7 Renal and Urinary Disease Pharmacology

Fluid therapy and correction of electrolyte imbalances

Section 8 Anesthetic and Analgesic Considerations

Anesthesia

Pain management

Section 9 Nutritional Considerations

Chronic kidney disease

Urolithiasis

Feline idiopathic cystitis

Bibliography

Chapter 11

Infectious Diseases

Section 1 Infectious Bacterial Diseases

Bartonella

Lyme borreliosis

Canine brucellosis

Ehrlichiosis

Helicobacter-associated disease

Leptospirosis

Methicillin-resistant Staphylococcus aureus

Mycobacterial disease

Mycoplasmal diseases

Plague

Section 2 Fungal Diseases

Histoplasmosis

Aspergillosis

Coccidioidomycosis

Cryptococcosis

Blastomycosis

Section 3 Protozoal Diseases

Amebiasis

Babesiosis

Giardia

Trichomoniasis

Leishmaniasis

Toxoplasmosis

Neosporosis

Cytauxzoonosis

Hepatozoonosis

Section 4 Infectious Viral Diseases

Canine and feline herpesvirus

Influenza

Papillomas

Section 5 Infectious Disease Testing

Disease prevention and control in the small animal hospital

Bibliography

Chapter 12

Vaccine, Vaccination, and Immunology

Section 1 The Immune Response and Cancer Immunotherapy

Innate and adaptive immune response

Humoral and cell-mediated immunity

Immunomodulation

Cancer vaccines

Cytokine immunotherapy

Summary

Section 2 Laboratory Diagnostics in Immunology

Serology

Biopsy techniques
