INDEX

Absolute noncentral $q$-Stirling numbers of the first kind, 27
Absorption distribution
  application of, 104, 105
  factorial moments of, 128
  $q$-factorial moments of, 128
  probability function of, 104, 143, 162
Absorption process, 104
Approximation of the $q$-deformed binomial distribution of the first kind, 190
Approximation of the $q$-deformed Heine distribution, 196
Approximation of the $q$-deformed negative binomial distribution of the first kind, 195
Asymptotic expansion of $q$-factorial, 187
Asymptotic normality of the number of records, 184
$q$-Analogues
  lack of uniqueness of, 4
Bernoulli trial, 61
Bernoulli trials and number theory, 7
Binomial moments
  in terms of $q$-binomial moments, 43
$q$-Beta function, 58

$q$-Binomial coefficient, 3
$q$-Binomial coefficients
  combinatorial interpretation, 5, 7
  Gauss summation formula for, 47
  horizontal recurrence relation, 46
  orthogonality relation, 18
  triangular recurrence relation, 3
  vertical recurrence relation, 46
$q$-Binomial convolution formula, 11
$q$-Binomial distribution of the first kind
  application of, 64, 66, 170
  as stationary distribution, 65
  $q$-binomial moments of, 88
  definition of, 62
  factorial moments of, 62
  $q$-factorial moments of, 62, 88
  generating function of, 88
  mean of, 63, 87
  probability function of, 62, 88
  variance of, 63, 88
  $q$-variance of, 88
$q$-Binomial distribution of the second kind
  as limit of $q$-Pólya distribution, 140
  application of, 128
  as sum of two-point distributions, 127
  definition of, 102

$q$-Binomial distribution of the second kind

(Continued)

factorial moments of, 102
$q$-factorial moments of, 102
mean of, 103
probability function of, 102
variance of, 103
$q$-Binomial formula, 16
additional, 48
another, 20
general, 24
negative, 17
$q$-Binomial moment, 42
$q$-Binomial moments
expression of probability function by, 44

Central limit theorem
for independent and uniformly bounded random variables, 183
for independent random variables, 182
for independent zero-one Bernoulli random variables, 184
Lindeberg–Feller, 182
Lyapunov, 182
Chebyshev’s law of large numbers, 177
particular case, 181
Convergence in distribution
definition of, 175
Convergence in probability
definition of, 174
Crossing a minefield, 128
with a random number of absorption points, 128–130
$q$-Cauchy’s formula, 11

Degenerate distribution
distribution function of, 175
probability function of, 175

Discrete $q$-uniform distribution
application of, 168
as sum of two-point distributions, 167
definition of, 166
factorial moments of, 167
$q$-factorial moments of, 60, 167
probability function of, 7, 167
$q$-Deformed Heine distribution
approximation of, 196
$q$-Deformed binomial distribution of the first kind
approximation of, 190
$q$-Deformed distribution, 43
$q$-Deformed negative binomial distribution of the first kind
approximation of, 195
$q$-Derivative, 55
$q$-Derivative operator, 55
$q$-Difference, 59
$q$-Difference operator, 59

Euler distribution
as distribution of undiscovered oilfields, 108
as limit of $q$-binomial distribution of the second kind, 107
as limit of negative $q$-binomial distribution of the second kind, 107
definition of, 105
factorial moments of, 106
$q$-factorial moments of, 106
mean of, 106, 130
probability generating function of, 130
variance of, 106, 130
Euler process
definition of, 110
elementary derivation of, 131
probability function of, 110
$q$- Ehrenfest model, 170
$q$-Erlang distribution of the first kind
definition of, 75
distribution function of, 75
$q$-density function of, 75
$q$-moments of, 76
$q$-Erlang distribution of the second kind
definition of, 112
distribution function of, 112
$q$-density function of, 112
$q$-moments of, 112
$q$-Eulerian numbers, 52
triangular recurrence relation, 52
$q$-Expected value, 43
$q$-Exponential distribution of the first kind
definition of, 75
$q$-density function of, 77
$q$-moments of, 77
$q$-Exponential distribution of the second kind
definition of, 112
$q$-density function of, 113
$q$-moments of, 113
$q$-Exponential function, 25
application of, 69, 105
$q$-differential equation for, 55
limiting expression, 25, 49

Factorial moments
in terms of $q$-factorial moments, 44
$q$-Factorial, 2
asymptotic expansion of, 187
INDEX

of negative order, 3
triangular recurrence relation, 4
$q$-Factorial convolution formula, 10
$q$-Factorial moment, 42
as $q$-derivative, 59
of discrete $q$-uniform distribution, 60
$q$-Foster process, 132

Gauss summation formula
for $q$-binomial coefficients, 47
Gaussian polynomial, 3
General $q$-binomial formula, 24
General negative $q$-binomial distribution of the second kind, 109
General negative $q$-binomial formula, 24
Generalized $q$-factorial coefficient distribution
as mixture distribution, 158
factorial moments of, 155
$q$-factorial moments of, 155
mean of, 156, 163
probability function of, 155, 163
variance of, 156, 163
Generalized $q$-factorial coefficients noncentral, 36, 51
Generalized Lah numbers, 54
triangular recurrence relation, 54
Generalized Stirling number of the first kind, 52
signless, 52
triangular recurrence relation, 53
Generalized Stirling numbers orthogonality relations, 54
Generalized Stirling numbers of the second kind, 53
application of, 124, 125
triangular recurrence relation, 53
Generating function
of noncentral $q$-Stirling numbers of the first kind, 26
of noncentral $q$-Stirling numbers of the second kind, 27, 30
Geometric sequence of trials, 97
Geometrically increasing population estimating the rate of increase of, 179
records in, 84
$q$-Gamma function, 57
$q$-Geometric distribution of the second kind probability function of, 101
$q$-Geometric series, 48

Heine distribution
application of, 73
as distribution of undiscovered oilfields, 73
as limit of $q$-binomial distribution of the first kind, 71
as limit of negative $q$-binomial distribution of the first kind, 71
definition of, 69
factorial moments of, 70
$q$-factorial moments of, 70
mean of, 70, 90
$q$-mean of, 91
probability-generating function of, 90
variance of, 70, 90
$q$-variance of, 91
Heine process
definition of, 74
elementary derivation of, 91
probability function of, 74
Hermite polynomials, 186
$q$-Hypergeometric distribution
application of, 169
definition of, 144
factorial moments of, 144
$q$-factorial moments of, 144
probability function of, 144
$q$-Hypergeometric urn model, 144
negative, 147
Inverse absorption distribution, 100
factorial moments of, 126
$q$-factorial moments of, 126
Inverse $q$-hypergeometric distribution
definition of, 153
factorial moments of, 154
$q$-factorial moments of, 154
probability function of, 154
Inverse $q$-Pólya distribution
another, 169
as stationary distribution, 151
definition of, 150
factorial moments of, 150
$q$-factorial moments of, 150
limiting distribution of, 152
probability function of, 150
$q$-Integral, 56

Lack of uniqueness of $q$-analogues, 4
Lah numbers
generalized, 54
Law of large numbers
Chebyshev’s, 177
Poisson’s, 178
Lindeberg–Feller central limit theorem, 182
Lognormal distribution
  density function of, 185
  moments of, 186
Lognormal size-biased distribution, 186
Lognormal weighted distribution, 186
Lyapunov central limit theorem, 182
$q$-Lah numbers, 51
$q$-Lah numbers
  noncentral, 51
$q$-Leibnitz formula, 56
$q$-Logarithmic distribution
  as group size distribution, 116
  as limit of zero-truncated negative $q$-binomial
distribution of the second kind, 116
  definition of, 114
  factorial moments of, 114
  $q$-factorial moments of, 114
  mean of, 114
  variance of, 115
$q$-Logarithmic function, 26
  as $q$-integral, 56
$q$-Mean, 43
$q$-Multinomial coefficient, 49

Negative $q$-binomial distribution of the first kind, 89
  another, 68
  definition of, 67
  factorial moments of, 67
  $q$-factorial moments of, 67
  probability function of, 67
Negative $q$-binomial distribution of the second kind
  as limit of inverse $q$-Pólya distribution, 152
  application of, 101
  binomial moments of, 126
  definition of, 98
  factorial moments of, 99
  $q$-factorial moments of, 98
  general, 109
  generating function of, 126
  mean of, 99, 125
  probability function of, 98
  variance of, 99, 126
Negative $q$-binomial formula, 17
  additional, 48
  general, 24
Negative $q$-factorial convolution formula, 12, 14
Negative $q$-hypergeometric distribution
  definition of, 147
  factorial moments of, 148
$q$-factorial moments of, 147
probability function of, 147
Negative $q$-hypergeometric urn model, 147
Negative $q$-Vandermonde’s formula, 12, 14
Noncentral $q$-Lah numbers, 51
Noncentral $q$-Stirling number of the first kind
  as multiple sum, 31
  explicit expression, 33
Noncentral $q$-Stirling number of the second kind
  as multiple sum, 32
  explicit expression, 33
Noncentral $q$-Stirling numbers of the first kind,
  27, 50
  absolute, 27
  expressed by $q$-derivatives, 55
  generating function, 26
  sign of, 32
  signless, 27
  triangular recurrence relation, 28
Noncentral $q$-Stirling numbers of the second kind,
  27, 50
  bivariate generating function, 50
  generating function, 27, 30
  sign of, 32
  triangular recurrence relation, 28
Noncentral generalized $q$-factorial coefficients, 36,
  51
  absolute, 36
  explicit expressions, 41
  expressed in terms of the $q$-Stirling numbers,
  38
  sign of, 39
  triangular recurrence relation, 37
Number of errors in a manuscript
  estimator of, 146
Number of partitions of integers, 9
Number of records
  asymptotic normality of, 184
  probability function of, 85
Number of subspaces of a vector space, 8
Number of undiscovered oilfields, 72, 108
$q$-Newton’s binomial formula, 16
$q$-Number, 2

One-point distribution
  distribution function of, 175
  probability function of, 175
Poisson’s law of large numbers, 178
Probabilistic algorithm for counting events in a
  small counter, 120
Proofreading a manuscript, 101
$q$-Pascal’s triangle, 3
q-Poisson distribution, 69, 105, 107
characterization of, 131
modality and failure rate of, 130
q-Poisson processes, 111
q-Pólya distribution
as stationary distribution, 139
as sum of two-point distributions, 166
definition of, 137
factorial moments of, 138
q-factorial moments of, 138
limiting distribution of, 140
probability function of, 138
q-Pólya urn model, 137
Random q-drawing, 136
Rogers–Szegö polynomial, 49
Sequential capture of endangered animals, 104
Signless generalized Stirling numbers of the first kind
application of, 86
Signless noncentral q-Stirling numbers of the first kind
Stationary distribution
for a dichotomized parasite populations, 65
in a birth and death process, 65
Stieltjes–Wigert distribution, 187
density function of, 186
moments of, 187
Stieltjes–Wigert polynomials, 186
Stirling numbers of the first kind
generalized, 52
Stirling numbers of the second kind
generalized, 53
Stochastic convergence
definition of, 174
q-Stirling distribution of the second kind
application of, 121, 122
factorial moments of, 119
q-factorial moments of, 119
probability function of, 119
q-Stirling distributions of the first kind
application of, 81, 82, 85
factorial moments of, 78, 82
mean of, 78, 82
probability function of, 78, 82
variance of, 78, 82
q-Stirling numbers
orthogonality relation, 28
q-Stirling numbers of the first kind, 27
absolute noncentral, 27
noncentral, 27, 50
signless noncentral, 27
q-Stirling numbers of the second kind, 27
noncentral, 27, 50
q-Vandermonde’s formula, 10
negative, 12
q-Variance, 43
Waiting time for records
probability function of, 85
Waiting time generalized q-factorial coefficient distribution
as mixture distribution, 159
probability function of, 159
Waiting time q-Stirling distribution of the second kind
factorial moments of, 117
mean of, 117
probability function of, 117
variance of, 117
Waiting time q-Stirling distributions of the first kind
application of, 85
probability function of, 80
Weldon’s classical dice data, 64
Width of a chain decomposition of a random acyclic digraph, 121
