Contents

Index Layout and Acknowledgements vii

Chapter 1 Positioning Terminology 1

Chapter 2 Digital Radiography Considerations 3

Chapter 3 Plain Radiography Projections 6
  Lower limb examinations 6
  Axial skeletal examinations 17
  Upper limb examinations 34
  Examination of thorax and contents 45
  Examination of abdomen and contents 50
  Skull and craniofacial skeleton examinations 53

Chapter 4 Named Radiography Projections 58
  Index 58
  Named projections 63

Chapter 5 Procedures Using Contrast Agents +/– Fluoroscopy 105

Chapter 6 Mobile Radiography and Fluoroscopy 116

Chapter 7 Diagnostic Angiography 122

Chapter 8 Contrast Media, Emergency Drugs and Reaction Responses 133

Chapter 9 Computed Tomography Protocols 150
  Computer tomography of brain and head 150
  Computed tomography of spine and neck 158
Contents

Computed tomography of thorax 166
Computed tomography of abdomen 174
Computed tomography of extremities 187

Chapter 10 Magnetic Resonance Imaging Safety 193

Chapter 11 Magnetic Resonance Imaging Sequences 196

Chapter 12 Typical Effective Doses from Diagnostic Medical Imaging Procedures 206

Chapter 13 Indicated Imaging 209
  Indicated examinations for the diagnosis of common trauma presentations 209
  Indicated examinations for the diagnosis of common musculoskeletal presentations 223
  Indicated examinations for the diagnosis of chest and cardiovascular system presentations 236
  Indicated examinations for the diagnosis of common gastrointestinal presentations 244
  Indicated examinations for the genitourinary system and adrenal glands 254
  Indicated examinations for the diagnosis of common cancers 260

Chapter 14 Eponymous Injuries and Classification Systems 270

Appendix 1 Common Radiological and Medical Abbreviations 297
Appendix 2 Glossary of Common Terms for Medical Radiation Practice 311
Appendix 3 Typical Normal Blood Values 338
