List of Contributors, vii

1 The evidence base for diabetes care, 1
   William H. Herman, Ann Louise Kinmonth, Nicholas J. Wareham, Rhys Williams

Part 1: Evidence-based definition and classification

2 Classification of diabetes, 9
   Maximilian de Courten

3 Commentary on the classification and diagnosis of diabetes, 25
   Stephen O’Rahilly, Nicholas J. Wareham

Part 2: Primary and primordial prevention and early detection

4 Prevention of type 1 diabetes, 31
   Jay S. Skyler

5 Prevention of type 2 and gestational diabetes, 49
   Richard F. Hamman, Dana Dabelea

6 The evidence to screen for type 2 diabetes, 111
   Michael M. Engelgau, K.M. Venkat Narayan

7 The effectiveness of interventions aimed at weight loss and other effects of diet and physical activity in achieving control of diabetes and preventing its complications, 137
   Nita Gandhi Forouhi, Nicholas J. Wareham

8 What is the evidence that changing tobacco use reduces the incidence of diabetic complications?, 161
   Deborah L. Wingard, Elizabeth Barrett-Connor, Nicole M. Weidick

9 Does intensive glycaemic management reduce morbidity and mortality in type 1 diabetes?, 178
   William H. Herman

10 Does intensive glycaemic management reduce morbidity and mortality in type 2 diabetes?, 189
    Amanda I. Adler

11 Glycaemic control and other interventions in the treatment of gestational diabetes, 199
    David R. McCance

12 Antihypertensive therapy to prevent the cardiovascular complications of diabetes mellitus, 226
    Tonya L. Corbin, Alan B. Weder

13 Does treating hyperlipidaemia with medication prevent complications?, 241
    Helen M. Colhoun

14 Other cardiovascular risk factors, 256
    Stephen Thomas, GianCarlo Viberti

15 Prevention of the consequences of diabetes – a commentary, 266
    Hertzel C. Gerstein

Part 4: Treatment of established complications

16 Treatment of diabetic retinopathy, 275
    Ayad Al-Bemani, Roy Taylor

17 Prevention and treatment of diabetic nephropathy: the role of blood pressure lowering, 285
    Carl Erik Mogensen
Contents

18 Treatment of established complications: periodontal disease, 291
   George W. Taylor, Wenche S. Borgnakke

19 Treatment of diabetic neuropathy, 317
   Rodica Pop-Busui, Zachary Simmons, Eva L. Feldman

20 Treatment of erectile dysfunction, 341
   David E. Price, Geoffrey Hackett

21 Cardiac complications and management, 355
   Anthony S. Wierzbicki, Simon R. Redwood

22 The treatment of established complications: cerebrovascular disease, 377
   Devin L. Brown, Susan L. Hickenbottom, Teresa L. Jacobs

23 The management of peripheral arterial disease in patients with type 2 diabetes, 393
   Sydney A. Westphal, Pasquale J. Palumbo

24 Epidemiology of foot ulcers and amputations in people with diabetes: evidence for prevention, 403
   Gayle E. Reiber, William R. Ledoux

Part 5: Self-management, healthcare organization and public policy

25 What is the evidence that increasing engagement of individuals in self-management improves the processes and outcomes of care?, 421
   Debra L. Roter, Ann Louise Kinmonth

26 Delivering care to the population, 438
   Rhys Williams, Ann John, Ambady Ramachandran, Chamukuttan Snehalatha

27 Cost-effectiveness of interventions for the prevention and control of diabetes, 449
   Rui Li, Ping Zhang

28 The role of public policy, 471
   Julia Critchley, Nigel Unwin

Index, 489
