## PART ONE

Commodity Markets and Products

### CHAPTER 1

**Oil Markets and Products** \hspace{0.5cm} 3

*Cristiano Campi and Francesco Galdenzi*

1.1 Introduction \hspace{0.5cm} 3

1.2 Risk Management for Corporations: Hedging Using Derivative Instruments 4

1.2.1 Crude Oil and Oil Products Risk Management for Corporations 4

1.2.2 Aviation: Risk Profile and Hedging Strategies 11

1.2.3 Shipping: Risk Profile and Hedging Strategies 20

1.2.4 Land Transportation: Risk Profile and Hedging Strategies 27

1.2.5 Utilities: Risk Profile and Hedging Strategies 32

1.2.6 Refineries: Risk Profile and Hedging Strategies 35

1.2.7 Industrial Consumers: Risk Profile and Hedging Strategies 40

1.3 Oil Physical Market Hedging and Trading 41

1.3.1 The Actors, Futures and OTC Prices 41

1.3.2 The Most Commonly Used Financial Instruments 45

1.3.3 How to Monitor and Manage Risk 49

1.3.4 How to Create a Market View 52

1.3.5 Trading Strategies to Maximize a Market View 54

Further Reading 66
CONTENTS

CHAPTER 2
Coal Markets and Products 67
Lars Schernikau

2.1 Introduction 67
2.2 Source of Coal – Synopsis of the Resource Coal 72
  2.2.1 The Fundamentals of Energy Sources and Fossil Fuels 72
  2.2.2 Process of Coal Formation 74
  2.2.3 Coal Classification 74
  2.2.4 Reserves and Resources 79
  2.2.5 Coal Mining and Production 83
2.3 Use of Coal – Power Generation and More 90
  2.3.1 Steam Coal and its Role in Power Generation 91
  2.3.2 Coal-Fired Power Plant Technologies 93
  2.3.3 Cement and Other Industry 95
  2.3.4 Alternatives to Coal: Shale Gas and Other 95
  2.3.5 Future Trend: CtL and Coal Bed Methane 101
2.4 Overview of Worldwide Steam Coal Supply and Demand 102
  2.4.1 Atlantic Demand Market: Europe at its Core 102
  2.4.2 Pacific Demand Market: China, India, Japan, Taiwan, Korea and SEA 104
  2.4.3 Steam Coal Supply Regions: ID, AU, USA, SA, RU, CO and Others 107
  2.4.4 Seaborne Freight 116
  2.4.5 Geopolitical and Policy Environment 118
2.5 The Global Steam Coal Trade Market and its Future 121
  2.5.1 Current and Future Market Dynamics of the Coal Trade 121
  2.5.2 Future Steam Coal Price Trends 125
  2.5.3 Future Source of Energy: What Role Will Coal Play? 127
2.6 Concluding Words 129
  Abbreviations and Definitions 130
  Acknowledgements 132
  References 132

CHAPTER 3
Natural Gas Markets and Products 135
Mark Cummins and Bernard Murphy

3.1 Physical Natural Gas Markets 135
  3.1.1 Physical Structure 141
  3.1.2 Natural Gas Market Hubs and Main Participants 146
  3.1.3 Liquefied Natural Gas 147
  3.1.4 Shale Gas 149
3.2 Natural Gas Contracting and Pricing 154
  3.2.1 Natural Gas Price Formation 155
3.3 Financial Natural Gas Markets 158
  3.3.1 Exchange-Based Markets 158
  3.3.2 Natural Gas Futures 159
  3.3.3 Natural Gas Options 172
  3.3.4 OTC Markets and Products 179
  References 180
CHAPTER 4  
Electricity Markets and Products  
Stefano Fiorenzani, Bernard Murphy and Mark Cummins  
4.1 Market Structure and Price Components  
4.1.1 Spot and Forward Markets  
4.1.2 Supply and Demand Interaction  
4.1.3 Electricity Derivatives  
4.1.4 Power Price Models  
4.1.5 Spot Price Analysis (IPEX Case)  
4.1.6 Forward Price Analysis (EEX Case)  
4.2 Renewables, Intra-Day Trading and Capacity Markets  
4.2.1 Renewables Expansion Targets  
4.2.2 Growth in Intra-Day Trading  
4.2.3 Implications for Future Price Volatility and Price Profiles  
4.2.4 Reforms and Innovations in Capacity Markets  
4.2.5 Provision and Remuneration of Flexibility – Storage Assets  
4.3 Risk Measures for Power Portfolios  
4.3.1 Value-Based Risk Measures  
4.3.2 Flow-Based Risk Measures  
4.3.3 Credit Risk for Power Portfolios  
References  
Further Reading  

CHAPTER 5  
Emissions Markets and Products  
Marc Chesney, Luca Taschini and Jonathan Gheyssens  
5.1 Introduction  
5.2 Climate Change and the Economics of Externalities  
5.2.1 The Climate Change Issue  
5.2.2 The Economics of Externality and GHG Pollution  
5.3 The Kyoto Protocol  
5.3.1 The United Nations Framework Convention on Climate Change  
5.3.2 The Conference of Parties and the Subsidiary Bodies  
5.3.3 The Kyoto Protocol  
5.3.4 The Road to Paris  
5.4 The EU ETS  
5.4.1 Institutional Features  
5.4.2 Allocation Criteria  
5.4.3 Market Players and the Permit Markets  
5.4.4 The Future of the EU ETS  
5.5 Regional Markets: A Fragmented Landscape  
5.5.1 Regional Markets  
5.5.2 Voluntary Markets  
5.6 A New Asset Class: CO₂ Emission Permits  
5.6.1 Macroeconomic Models  
5.6.2 Econometric Investigation of CO₂ Permit Price Time-Series
5.6.3 Stochastic Equilibrium Models 251
Abbreviations 252
References 252

CHAPTER 6
Weather Risk and Weather Derivatives 255
Alessandro Mauro
6.1 Introduction 255
6.2 Identification of Volumetric Risk 257
6.2.1 Weather Events on the Demand Curve 258
6.2.2 Weather Events on the Supply Curve 260
6.2.3 Risk Measurement and Weather-at-Risk 262
6.3 Atmospheric Temperature and Natural Gas Market 264
6.3.1 Characterization of the Air Temperature Meteorological Variable 264
6.3.2 Degree Days 267
6.3.3 Volumetric Risk in the Natural Gas Market 270
6.4 Modification of Weather Risk Exposure with Weather Derivatives 272
6.4.1 Weather Derivatives for Temperature-Related Risk 273
6.5 Conclusions 276
Nomenclature 277
References 277

CHAPTER 7
Industrial Metals Markets and Products 279
Alessandro Porru
7.1 General Overview 279
7.1.1 Brief History of the LME 280
7.1.2 Non-ferrous Metals 282
7.1.3 Other Metals 291
7.1.4 LME Instruments 292
7.1.5 OTC Instruments 298
7.1.6 A New Player: The Investor 301
7.2 Forward Curves 305
7.2.1 Building LME’s Curves in Practice 308
7.2.2 Interpolation 313
7.2.3 LME, COMEX and SHFE Copper Curve and Arbitrage 314
7.2.4 Contango Limit… 318
7.2.5 …and No-Limit Backwardation 324
7.2.6 Hedging the Curve in Practice 328
7.3 Volatility 337
7.3.1 A European Disguised as an American 338
7.3.2 LME’s Closing Volatilities 339
7.3.3 Sticky Strike, Sticky Delta and Skew 342
7.3.4 Building the Surface in Practice 345
7.3.5 Considerations on Vega Hedging 348
Acknowledgements 352
References 353
Further Reading 353
Contents

CHAPTER 8
Freight Markets and Products 355
Manolis G. Kavussanos, Ilias D. Visvikis and Dimitris N. Dimitrakopoulos
8.1 Introduction 355
8.2 Business Risks in Shipping 356
  8.2.1 The Sources of Risk in the Shipping Industry 356
  8.2.2 Market Segmentation in the Shipping Industry 358
  8.2.3 Empirical Regularities in Freight Rate Markets 359
  8.2.4 Traditional Risk Management Strategies 365
8.3 Freight Rate Derivatives 366
  8.3.1 Risk Management in Shipping 366
  8.3.2 The Underlying Indices of Freight Rate Derivatives 366
  8.3.3 The Freight Derivatives Market 372
  8.3.4 Examples of Freight Derivatives Trading 380
8.4 Pricing, Hedging and Freight Rate Risk Measurement 382
  8.4.1 Pricing and Hedging Effectiveness of Freight Derivatives 382
  8.4.2 Value-at-Risk (VaR) in Freight Markets 384
  8.4.3 Expected Shortfall (ES) in Freight Markets 389
  8.4.4 Empirical Evidence on Freight Derivatives 390
8.5 Other Derivatives for the Shipping Industry 393
  8.5.1 Bunker Fuel Derivatives 393
  8.5.2 Vessel Value Derivatives 395
  8.5.3 Foreign Exchange Rate Derivatives Contracts 395
  8.5.4 Interest Rate Derivatives Contracts 396
8.6 Conclusion 396
Acknowledgements 396
References 397

CHAPTER 9
Agricultural and Soft Markets 399
Francis Declerk
9.1 Introduction: Stakes and Objectives 399
  9.1.1 Stakes 399
  9.1.2 Objectives 399
9.2 Agricultural Commodity Specificity and Futures Markets 400
  9.2.1 Agricultural Commodity Specificity 400
  9.2.2 Volatility of Agricultural Markets 402
  9.2.3 Forward Contract and Futures Contract 402
  9.2.4 Major Agricultural Futures Markets and Contracts 404
  9.2.5 Roles of Futures Markets 405
  9.2.6 Institutions Related to Futures Markets 406
  9.2.7 Commodity Futures Contracts 406
  9.2.8 The Operators 408
  9.2.9 Monitoring Hedging: Settlement 409
  9.2.10 Accounting and Tax Rules 409
9.3 Demand and Supply, Price Determinants and Dynamics 409
  9.3.1 Supply and Demand for Agricultural Commodities: The Determinants 409
CONTENTS

9.3.2 Agricultural Market Prices, Failures and Policies 413
9.3.3 The Price Dynamics of Seasonal and Storable Agricultural Commodities 416
9.3.4 The Features of Major Agricultural and Soft Markets 417

9.4 Hedging and Basis Management 466
9.4.1 Short Hedging for Producers 466
9.4.2 Long Hedging for Processors 469
9.4.3 Management of Basis Risk 471

9.5 The Financialization of Agricultural Markets and Hunger: Speculation and Regulation 480
9.5.1 Factors Affecting the Volatility of Agricultural Commodity Prices 480
9.5.2 Financialization: Impact of Non-commercial Traders on Market Price 483
9.5.3 The Financialization of Grain Markets and Speculation 484
9.5.4 Bubble or Not, Agricultural Commodities have Become an Asset Class 489
9.5.5 Price Volatility and Regulation 490
9.5.6 Ongoing Research about Speculation and Regulation 493

9.6 Conclusion about Hedging and Futures Contracts 493
9.6.1 Hedging Process 493
9.6.2 Key Success Factors for Agricultural Commodity Futures Contracts 494
9.6.3 Conclusion and Prospects 495
References 495
Further Reading 496
Glossary, Quotations and Policy on Websites 497

CHAPTER 10

Foreign Exchange Markets and Products 499
Antonio Castagna

10.1 The FX Market 499
10.1.1 FX Rates and Spot Contracts 499
10.1.2 Outright and FX Swap Contracts 500
10.1.3 FX Option Contracts 504
10.1.4 Main Traded FX Options Structures 507

10.2 Pricing Models for FX Options 509
10.2.1 The Black–Scholes Model 510

10.3 The Volatility Surface 511

10.4 Barrier Options 512
10.4.1 A Taxonomy of Barrier Options 512

10.5 Sources of FX Risk Exposure 513

10.6 Hedging FX Exposures Embedded in Energy and Commodity Contracts 517
10.6.1 FX Forward Exposures and Conversions 518
10.6.2 FX-Linked Energy Contracts 522

10.7 Typical Hedging Structures for FX Risk Exposure 533
10.7.1 Collar Plain Vanilla 533
10.7.2 Leveraged Forward 536
Contents

10.7.3 Participating Forward 538
10.7.4 Knock-Out Forward 540
10.7.5 Knock-In Forward 543
10.7.6 Knock-In Knock-out Forward 545
10.7.7 Resettable Forward 548
10.7.8 Range Resettable Forward 550
References 553

PART TWO

Quantitative Topics

CHAPTER 11
An Introduction to Stochastic Calculus with Matlab® Examples 557
Laura Ballotta and Gianluca Fusai

11.1 Brownian Motion 558
11.1.1 Defining Brownian Motion 558

11.2 The Stochastic Integral and Stochastic Differential Equations 566
11.2.1 Introduction 566
11.2.2 Defining the Stochastic Integral 567
11.2.3 The Itô Stochastic Integral as a Mean Square Limit of Suitable Riemann–Stieltjes Sums 567
11.2.4 A Motivating Example: Computing \( \int_0^t W(s) dW(s) \) 568
11.2.5 Properties of the Stochastic Integral 569
11.2.6 Itô Process and Stochastic Differential Equations 571
11.2.7 Solving Stochastic Integrals and/or Stochastic Differential Equations 573

11.3 Introducing Itô’s Formula 575
11.3.1 A Fact from Ordinary Calculus 576
11.3.2 Itô’s Formula when \( Y = g(x) \), \( g(x) \in C^2 \) 576
11.3.3 Guiding Principle 577
11.3.4 Itô’s Formula when \( Y(t) = g(t, X) \), \( g(t, X) \in C^{1,2} \) 577
11.3.5 The Multivariate Itô’s Lemma when \( Z = g(t, X, Y) \) 578

11.4 Important SDEs 581
11.4.1 The Geometric Brownian Motion \( GBM(\mu, \sigma) \) 581
11.4.2 The Vasicek Mean-Reverting Process 588
11.4.3 The Cox–Ingersoll–Ross (CIR) Model 595
11.4.4 The Constant Elasticity of Variance (CEV) Model 604
11.4.5 The Brownian Bridge 607
11.4.6 The Stochastic Volatility Heston Model (1987) 611

11.5 Stochastic Processes with Jumps 618
11.5.1 Preliminaries 618
11.5.2 Jump Diffusion Processes 623
11.5.3 Time-Changed Brownian Motion 628
11.5.4 Final Remark: Lévy Processes 632

References 633
Further Reading 633
CONTENTS

CHAPTER 12

Estimating Commodity Term Structure Volatilities 635
Andrea Roncoroni, Rachid Id Brik and Mark Cummins

12.1 Introduction 635
12.2 Model Estimation Using the Kalman Filter 635
12.2.1 Description of the Methodology 636
12.2.2 Case Study: Estimating Parameters on Crude Oil 642
12.3 Principal Components Analysis 646
12.3.1 PCA: Technical Presentation 647
12.3.2 Case Study: Risk Analysis on Energy Markets 651
12.4 Conclusion 655
Appendix 655
References 657

CHAPTER 13

Nonparametric Estimation of Energy and Commodity Price Processes 659
Gianna Figà-Talamanca and Andrea Roncoroni

13.1 Introduction 659
13.2 Estimation Method 660
13.3 Empirical Results 663
References 672

CHAPTER 14

How to Build Electricity Forward Curves 673
Ruggero Caldana, Gianluca Fusai and Andrea Roncoroni

14.1 Introduction 673
14.2 Review of the Literature 674
14.3 Electricity Forward Contracts 675
14.4 Smoothing Forward Price Curves 677
14.5 An Illustrative Example: Daily Forward Curve 679
14.6 Conclusion 684
References 684

CHAPTER 15

GARCH Models for Commodity Markets 687
Eduardo Rossi and Filippo Spazzini

15.1 Introduction 687
15.2 The GARCH Model: General Definition 690
15.2.1 The ARCH(q) Model 692
15.2.2 The GARCH(p,q) Model 693
15.2.3 The Yule–Walker Equations for the Squared Process 695
15.2.4 Stationarity of the GARCH(p,q) 696
15.2.5 Forecasting Volatility with GARCH 698
15.3 The IGARCH(p,q) Model 699
15.4 A Permanent and Transitory Component Model of Volatility 700
15.5 Asymmetric Models 702
15.5.1 The EGARCH(p,q) Model 702
15.5.2 Other Asymmetric Models
15.5.3 The News Impact Curve
15.6 Periodic GARCH
15.6.1 Periodic EGARCH
15.7 Nesting Models
15.8 Long-Memory GARCH Models
15.8.1 The FIGARCH Model
15.8.2 The FIEGARCH Model
15.9 Estimation
15.9.1 Likelihood Computation
15.10 Inference
15.10.1 Testing for ARCH Effects
15.10.2 Test for Asymmetric Effects
15.11 Multivariate GARCH
15.11.1 BEKK Parameterization of MGARCH
15.11.2 The Dynamic Conditional Correlation Model
15.12 Empirical Applications
15.12.1 Univariate Volatility Modelling
15.12.2 A Simple Risk Measurement Application: A Bivariate Example with Copulas
15.13 Software
References

CHAPTER 16
Pricing Commodity Swaps with Counterparty Credit Risk: The Case of Credit Value Adjustment
Marina Marena, Gianluca Fusai and Chiara Quaglini
16.1 Introduction
16.1.1 Energy Company Strategies in Derivative Instruments
16.2 Company Energy Policy
16.2.1 Commodity Risk
16.2.2 Credit Risk
16.3 A Focus on Commodity Swap Contracts
16.3.1 Definition and Main Features of a Commodity Swap
16.4 Modelling the Dynamics of Oil Spot Prices and the Forward Curve
16.4.1 The Schwartz and Smith Pricing Model
16.5 An Empirical Application
16.5.1 The Commodity Swap Features
16.5.2 Calibration of the Theoretical Schwartz and Smith Forward Curve
16.5.3 The Monte Carlo Simulation of Oil Spot Prices
16.5.4 The Computation of Brent Forward Curves at Any Given Valuation Date
16.6 Measuring Counterparty Risk
16.6.1 CVA Calculation
## CONTENTS

16.6.2 Swap Fixed Price Adjustment for Counterparty Risk 782
16.6.3 Right- and Wrong-Way Risk 784
16.7 Sensitivity Analysis 788
16.8 Accounting for Derivatives and Credit Value Adjustments 788
   16.8.1 Example of Hedge Effectiveness 791
   16.8.2 Accounting for CVA 796
16.9 Conclusions 797
   References 798
   Further Reading 798

**CHAPTER 17**

**Pricing Energy Spread Options** 801
*Fred Espen Benth and Hanna Zdanowicz*

17.1 Spread Options in Energy Markets 801
17.2 Pricing of Spread Options with Zero Strike 805
17.3 Issues of hedging 813
17.4 Pricing of Spread Options with Nonzero Strike 815
   17.4.1 Kirk’s Approximation Formula 817
   17.4.2 Approximation by Margrabe Based on Taylor Expansion 820
   17.4.3 Other Pricing Methods 823
   Acknowledgement 824
   References 825

**CHAPTER 18**

**Asian Options: Payoffs and Pricing Models** 827
*Gianluca Fusai, Marina Marena and Giovanni Longo*

18.1 Payoff Structures 832
18.2 Pricing Asian Options in the Lognormal Setting 833
   18.2.1 Moment Matching 835
   18.2.2 Lower Price Bound 844
   18.2.3 Monte carlo simulation 845
18.3 A Comparison 856
18.4 The Flexible Square-Root Model 858
   18.4.1 General Setup 861
   18.4.2 Numerical Results 870
   18.4.3 A Case Study 871
18.5 Conclusions 874
   References 874

**CHAPTER 19**

**Natural Gas Storage Modelling** 877
*Álvaro Cartea, James Cheeseman and Sebastian Jaimungal*

19.1 Introduction 877
19.2 A Simple Model of Storage, Futures Prices, Spot Prices And Convenience Yield 878
19.3 Valuation of Gas Storage 880
   19.3.1 Least-Squares Monte Carlo 881
CONTENTS

21.5  Quantitative Spread Trading in Oil Markets 956
   21.5.1  Testing Framework and Data 956
   21.5.2  Optimal Statistical Arbitrage Model 957
   21.5.3  Resampling-Based MHT Procedures 959
   21.5.4  Empirical Results 964
   References 964

APPENDIX

A Quick Review of Distributions Relevant in Finance with Matlab® Examples 967
Laura Ballotta and Gianluca Fusai

Index 1005
