Foreword vii

Professor Jacqueline Glass

Preface viii

1 Introduction 1

1.1 Sustainability and sustainable development 1

1.2 The role of the design team in sustainable development 3

1.3 Sustainability credentials of concrete 3

1.4 Book layout and context 8

References 9

2 Challenges and Responses 11

2.1 Introduction 11

2.2 Climate change 11

2.3 Environmental protection 17

2.4 Social progress 32

2.5 Economic growth 41

2.6 Regulatory responses 43

2.7 Summary 50

References 52

3 Conceptual Design of Buildings and Infrastructure 55

3.1 Introduction 55

3.2 Conceptual design of buildings 58

3.3 Conceptual design of infrastructure 94

3.4 Summary 114

References 115

4 Material Specification 118

4.1 Introduction 118

4.2 Assessing environmental impacts of materials 118

4.3 Responsible sourcing of materials 129

4.4 Cements and combinations 131

4.5 Aggregates 143

4.6 Water 149

4.7 Admixtures 150

4.8 Novel constituents 155

4.9 Reinforcement 158

4.10 Special concretes 160

4.11 Specification examples 164
4.12 Key guidance to specify sustainable concrete | 165
4.13 Summary
   Acknowledgements | 167
   References | 167

5  Construction, Operation and End of Life | 170
  5.1 Construction | 170
  5.2 Operation | 172
  5.3 End of life | 173
  5.4 Summary
     References | 175

Appendix A: Thermal Mass | 176
Appendix B: Biomass Substitution | 187
Appendix C: Choice of Concrete Slab Options | 191
Appendix D: Example on Embodied CO₂ for a Building Slab | 206
Index | 213
