Index

A
action-oriented research, 210
adoption, meaning of, 6, 87, 93, 96
Advanced Practice Institute, 142, 143, 144
affirmed experience, definition of, 52
Agency for Health Care Policy and Research, 197
Alberta Context Tool (ACT), 129
analysis and synthesis, of models and frameworks, 223
application criteria, assessment on, 225
background, 223–6
conceptual clarity, 235–6
development, 231–4
development criteria, assessment on, 224
function, 240–42
levels, 237–8
type, 226–8
purpose, 228–30
situation, 238–9
synthesis, 226–40
testable hypotheses/propositions, 242–4
theoretical underpinnings, 234–5
users, 239–40
appropriateness, evidence of, 188
ARCC (Advancing Research and Clinical practice through close Collaboration) model, 169, 227–8
assumptions, 170–71
background, 171
central constructs and relationships in, 173–6
cognitive behavioral theory, 171–3
testable hypotheses/propositions, 242–4
theoretical underpinnings, 234–5
users, 239–40
control theory, 171–3
tenets, 176–7
barriers and facilitators, for implementation, 180–81
development, 231
EBP intervention program, 179
hypotheses generated from, 177
research evidence to support, 178–9
implementation, 181
implications for, 181
intended users, 177, 239
purpose, 170, 230
strengths, 181
tenets, 176–7
theoretical underpinnings, 234
usage, 179–81, 182, 233, 240
weaknesses, 181–2
assessing, monitoring, and evaluating (AME) process, 94, 95–6
implementation interventions and adoption, 96
innovation, potential adopters, and practice environment, assessment of, 94
outcomes, evaluation of, 97

B
barriers, for implementation of ARCC model, 180–81
of dissemination and research utilization, 160
of Iowa model, 143–4
of Stetler model, 74–5
Basic Cardiac Life Certification, 143
Baystate Medical Center (BMC), 58
boundary spanners, 13
C
Canadian Institute of Health Research (CIHR), 73, 210
central constructs and relationships, in ARCC model, 173–6
change champions, 12–13
clinical audit, meaning of, 197
clinical decision making, 2, 3, 150
clinical nurse specialists (CNSs), 56
clinician, for implementation of EBP, 10–11, 15
Cochrane, Archie, 3
Cochrane Effective Practice and Organization of Care Group, 92
Cochrane Collaboration, 4
cognitive behavioral theory (CBT), as guide for ARCC model, 171–3
collaborative research, 210
communication and facilitation, for EBP implementation, 12–13, 16
conceptual clarity, of models and frameworks, 235–6
conceptual framework, 208–9
for implementation of EBP
analysis and synthesis, approach to, 45–7
meaning, 25, 27–8
and models, 39–44
and theory, 30–39
usage, 30–39
utility, 28
for research and evaluation, of PARIHS, 127–9
conceptual models, see conceptual framework
conceptual use, of knowledge, 93
Conduct and Utilization of Research in Nursing (CURN), 40–43
“contact sport”, 248
context, 15
of KTA framework, 210–12
of OMRU, 84–97
of PARIHS, 114, 254
culture, 116, 118
evaluation, 117, 119
leadership, 116–17, 118–19
meaning, 118
of Stetler model, 56–61
context assessment index (CAI), 129
control theory, as guide for ARCC model, 171–3
D
decision making, 1, 33, 34, 72, 73, 75, 76, 118, 130, 148–61, 175, 189, 191, 192, 198, 212, 216, 250
descriptive framework/model, 228
descriptive theory, 26
developer-related evidence, of Stetler model, 65–7
diffusion, definition of, 6
Diffusion of Innovations Theory, see Roger’s Diffusion of Innovations Theory
dissemination, definition of, 6
dissemination and research utilization, for policy and practice, 147, 227
barriers, for implementation, 160
development, 231, 232
facilitators, for implementation, 160–61
future plans for, 161, 162–3
hypothesis generation, 155–7, 243
intended audience, 154–5
levels, 237
model development, 150, 151
background, 150, 152–4
purpose, 149–50, 230
strengths, 159
theoretical underpinnings, 234
usage, 157–9, 233, 240
weaknesses, 159–60
E
EBP beliefs (EBPB), 175
and EBP implementation, 178–9
EBP guidelines, 139
EBP implementation (EBPI), 175–6
in ARCC model, 175, 181
and EBP beliefs, 178–9
EBP mentors, 172, 173, 174
economic analyses, synthesis of of JBI model, 191
effectiveness, evidence of, 188–9 evidence 
of appropriateness, 188
definition, 52
of effectiveness, 188–9
of feasibility, 188
for implementation of EBP, 9–10, 15
of meaningfulness, 188
of PARIHS, 114, 254
  clinical experience, 115, 118
  local data/information, 116, 118
  patient experience, 115, 118
  research evidence, 115, 118
of Stetler model, 67–72
synthesis
  conceptual model from, 39–40
  of JBI model, 189–91
Evidence-Based Clinical Fellow project, 199
evidence-based health care, 188
evidence-based medicine (EBM) application, 4
rise, 4
Evidence-Based Nursing: A Guide to Clinical Practice, 153
evidence-based practice (EBP), 1
  and clinical expertise, 3
definition, 2–3, 52, 61
emergence, 4–5
evolution, 3–5
implementation, 5–8
  attributes influencing, 9
  need for, 14, 17
  tools/resources for, 62
evidence implementation cycle, of JBI model, 196
evidence/knowledge translation, in health care, 186
evolution, of evidence-based practice, 3–5
expert opinion and text synthesis, of JBI model, 191
explanatory framework/model, 229

explanatory theory, 26
explicit theory, 26
external evidence, definition of, 56

F
facilitators, for implementation
  of ARCC model, 180–81
  of dissemination and research utilization, 160–61
  of Iowa model, 143–4
  of PARIHS, 114, 254
    meaning, 119
    role, 117, 119
    skills and attributes, 117, 119
  of Stetler model, 74–5
feasibility, evidence of, 188
functions, of models/frameworks, 240
facilitators and barriers, assessment of, 241
intervention development, 241
outcome measurement and variable selection, 242
processes, evaluation of, 242
future plans, for development of dissemination and research utilization, 161, 162–3
  of Iowa model, 144
  of JBI model, 201–2
  of KTA framework, 218
  of OMRU, 100–101
  of PARIHS, 131
  of Stetler model, 76

G
Gerontological Nursing Intervention Research Center, 142
getting research into practice (GRIP) module, 197–8

H
health care evidence generation, of JBI model, 188–9
  appropriateness, evidence of, 188
  effectiveness, evidence of, 188
  feasibility, evidence of, 188
  meaningfulness, evidence of, 188
