Index

acceptance region, 81, 83
adapted cumulative sum, 34
addition of fuzzy numbers, 23
a-posteriori density, 88
a-posteriori distribution, 88
a-priori density, 88
a-priori distribution, 87
Aumann expectation, 191
Axonometric diagram, 40, 15, 16, 18

Bayes’ formula, 87
Bayes’ theorem, 89, 91
Bayes’ theorem for fuzzy a-priori distribution, 91, 93, 95
Bayes’ theorem for fuzzy a-priori distribution and fuzzy data, 97, 98
Bayesian confidence regions, 103
Bayesian decisions, 113
Bayesian inference, 87
beta distribution, 109
Bochner expectation, 191
Borel - measurable, 59
Borel sets, 59

cartesian product, 17, 65, 71, 113
characterizing function, 7
class of a histogram, 37
classical function, 21, 22
classical probability distribution, 58, 59, 69
classical statistical inference, 69
color intensity pictures, 13
combined fuzzy sample, 65
combination of fuzzy samples, 65
combination rule, 66
compact set, 7, 22
complete data, 88
complete probability space, 60
components model, 176
concrete sample, 65
correlation coefficient, 49
covariance function, 75
covariance interval, 76
covariance level, 103
covariance regions based on fuzzy data, 76, 103
covariance parameter space, 88, 97, 103, 108
data, xi, 3
decision, 81, 84, 113
description of fuzzy data, 7, 14
descriptive statistics, 31
difference filter, 182
difference of fuzzy numbers, 27
discrete models with continuous parameter space, 108
discrete parameter space, 107
discrete probability, 107
δ-cut, 7, 14
δ-cut representation, 8
δ-level function, 27, 39
empirical correlation coefficient, 49
empirical distribution function, 43
empirical distributions, 34
empirical fractiles, 45
errors, 4
estimations based on fuzzy samples, 71
event, 40, 58
expectation, 190
expected loss, 114
expected utility, 113
exponential distribution, 72, 76, 99, 105
exponential smoothing, 175
extension principle, 21, 22, 71
Fréchet expectation, 190
Fréchet principle, 190
Fréchet variance, 190
fuzziness, xii, 4
fuzzy, xi, 3
fuzzy a-priori distribution, 91, 97, 99
fuzzy Bayesian inference, 87
fuzzy confidence regions, 76
fuzzy correlation coefficient, 49
fuzzy data, 3
fuzzy element, 66
fuzzy empirical correlation coefficient, 49
fuzzy empirical fractiles, 45
fuzzy estimator, 71
fuzzy expectation, 190
fuzzy expected loss, 114
fuzzy expected utility, 114
fuzzy fractile, 45
fuzzy frequencies, 37
fuzzy histogram, 40
fuzzy HPD-regions, 104
fuzzy information, 1
fuzzy integral, 28
fuzzy interval, 116
fuzzy k-dimensional interval, 15
fuzzy model, xii, 4
fuzzy number, 7
fuzzy predictive distribution, 107
fuzzy probability, 55
fuzzy probability density, 55
fuzzy probability distribution, 55, 61
fuzzy p-values, 82
fuzzy quantile, 45
fuzzy quantities, 3
fuzzy random variables, 59
fuzzy random vector, 189
fuzzy relative frequency, 38
fuzzy sample, 33
fuzzy sample dispersion, 74
fuzzy sample variance, 74
fuzzy subset, 1, 76
fuzzy utility, 114
fuzzy value, 27, 37, 59
fuzzy valued empirical distribution function, 43
fuzzy valued functions, 27, 97
fuzzy variables, 21
fuzzy vectors, 14, 66, 133
gamma distribution, 105
generalized Bayes’ theorem, 97
generalized confidence set, 75
generalized empirical distribution function, 43
generalized Holt-Winter method, 184
generalized Hukuhara difference, 161
generalized integration, 28, 56
generalized law of large numbers, 63
generalized point estimators, 71, 148
Hausdorff metric, 156
histograms for fuzzy data, 37
HPD – regions, 104
Hukuhara addition, 173
Hukuhara difference, 162
imprecision, 4
independent random variables, 62
indicator function, xi, 8
interval, 3, 7
interval valued empirical distribution function, 44

law of large numbers, 59
lifetime, 3
likelihood function, 88
likelihood function for fuzzy data, 97
loss function, 114
lower δ-level curve, 27, 97
lower δ-level function, 27, 97
LR-fuzzy number, 8, 24

mathematical model, 7, 14
maximum of fuzzy numbers, 33
mean value of fuzzy numbers, 25
measurable function, 59
measure space, 55
measurement, 3, 11
membership function, 76
minimum combination rule, 66, 134
minimum of fuzzy numbers, 33
minimum t-norm, 17, 134
multiplication of fuzzy numbers, 25

nonlinear filter, 173
nonparametric estimation, 43
non-precise data, 3
non-precise number, 7
normal distribution, 76

observation space, 65

parameter, 69
parameter space, 72, 75, 87, 91
parametric family of distributions, 69, 87

partially fuzzy data, 51
point probability, 87, 92, 115
predictive density, 110
predictive distribution, 107
probabilities based on fuzzy densities, 56
probability space, 59

product t-norm, 17
propagation of fuzziness, 21

quotients of fuzzy numbers, 27
rejection region, 81
representation lemma, 15

sample dispersion, 74
sample mean, 73
sample moments, 73
sample space, 65
sample variance, 74
scalar multiplication of fuzzy numbers, 25
sequences of fuzzy random variables, 62
sequential analysis, 62
smoothed empirical distribution function, 45
standard statistical inference, 53
standard statistics, 31
state space, 212
statistic, 66
statistical analysis, xi, 69
statistical inference, 53, 69, 87
statistical test, 81
statistical tests for fuzzy data, 81
statistics of fuzzy data, 71
Steiner point, 159
Stieltjes integral, 28
stochastic model, 4, 69, 71, 76, 87
stochastic quantity, 4, 121, 202
stochastic uncertainty, 4, 5
sum of fuzzy numbers, 23
support function, 155
support of a characterizing function, 7
test decision, 81
test statistic, 81
transformed parameter, 73, 79
translation of a fuzzy number, 24
trapezoidal fuzzy number, 9, 24, 164
triangular norm, 16
two-sided test problem, 82, 84
INDEX

updating, 92
upper $\delta$-level curve, 27, 94, 97
upper $\delta$-level function, 27, 94, 97
utility, 113
utility function, 113
variability, 4, 59
vector-characterizing function, 14, 66, 71
