Courses. See Lessons/courses
Crandall, B., 160
Criterion-Referenced Test Development
(Shrock & Coscarelli), 126
Critical decision method, 160, 160fig
Critical thinking: for common
knowledge and skills required in
workplace, 21t; incorporating into
your lessons, 168–171; scenario-based
e-learning used for, 14, 19–20. See
also Knowledge elicitation
Cues used: incorporating into scenario-
based e-learning, 168, 169t, 170;
sample questions to elicit, 167t; as
type of knowledge, 164, 165t
Customer Service Scenario-Based
e-Lesson, 74fig

D
de Jong, T., 141, 145
Decision making: lengthy timelines tasks
and, 20; military Gator 6 course on
leadership, 20, 22fig; scenario-based
e-learning evidence-based,
137–156. See also Operational
decisions domain
Decisions made knowledge:
incorporating into scenario-based
e-learning, 168, 169t; sample
questions to elicit, 167t; as type of
knowledge, 164, 165t
Defining Feedback Form, 117–118
Defining Guidance Form, 87–88
Defining Instructional Resources Form,
100–101
Defining Your Trigger Event and Case
Data Form, 71–73
DeNisi, A., 104, 108
Design domain: case data examples
for, 68t; description of, 23t, 26; draft
design model consideration of, 45;
feedback options for, 111t, 114;
learning objectives and response
options for, 55t; learning objectives
of, 38t; potential advisors for, 83t;
revising learning objectives for
purpose of, 61; sample terminal and
enabling learning objectives, 91t;
settings and trigger events for, 65t
Design model: draft design of, 45–46;
illustrated figure of, 36fig; modes
and media used in scenario-based
e-learning, 4; overview of individual
components of, 35–43; task
deliverable design options for, 35–36,
38–39fig, 48, 56t–59; typical learning
objectives by domain built into,
37t–38t. See also Lesson development
Design model components: feedback,
41fig–42, 46, 103–118; guidance and
instruction, 40–41, 46, 73–88, 89–101;
reflection, 42–43fig, 46; scenario data,
40, 46; the task deliverable, 35–36,
38–39fig, 46, 47–61; the trigger event,
39–40, 46, 63–73
Designing scenario-based e-learning
templates: aligning scenario to
design model, 187–188; for branched
scenario design, 188fig; for menu
design, 187fig; for whole-screen,
187fig
Diagnosis and repair domain: case
data examples for, 68t; description
of, 23t, 24–25; draft design model
consideration of, 45; feedback options
for, 110t, 113; learning objectives and
response options for, 54t; learning
objectives of, 37t; potential advisors
for, 83t; sample terminal and enabling
learning objectives, 91t; settings and
trigger events for, 65t
Directive training: comparing
environment of scenario-based vs.,
7–10; comparing specific features of
scenario-based vs., 8t–9t; description
of, 7; learning Excel in scenario-based
vs., 141–143
Discovery learning, 140–141
Dog anesthesiology lesson: branching logic used in, 15; scenario-based e-learning simulation used in, 11–12

Drag and drop response option: Bioworld Drag-and-Drop Interactions, 50fig; description of, 57t

Scenario-Based e-Learning and You

Your Scenario-Based e-Learning Opportunities, 32–33

Scenario-based e-learning applications:

compliance-mandated training, 22; critical thinking skills training, 19–20; learner expertise and scenario-based e-learning, 22; lengthy timeline tasks, 20; rare occurrence tasks, 19; risk-adverse tasks, 20; strategic tasks, 18–19

Scenario-based e-learning benefits: better transfer potential, 13–14; build critical thinking skills, 14; can accelerate expertise, 6, 12–13; can offer return on investment, 13; learners like scenario-based e-learning, 13; technology can facilitate scenario-based e-learning development, 13, 14

Scenario-based e-learning components:

the environment is preplanned, 5; the goal is to accelerate workplace expertise, 6; the instruction is guided, 6; learner is an actor responding to job-realistic situation, 5; learning is inductive rather than instructive, 6; scenarios incorporate instructional resources, 6

Scenario-based e-learning domains:

compliance policies and procedures, 23; design, 23t, 26, 45, 65t, 83t, 91t, 110t, 112–113; diagnosis and repair, 23t, 24–25, 45, 65t, 83t, 91t, 110t, 113; evidence-based research on when to introduce, 143; interpersonal skills, 23t, 24, 45, 65t, 83t, 91t, 110t, 112; operational decisions and actions, 23t, 25–26, 45, 65t, 83t, 92t, 111t, 114; research, analysis, and rationale, 23t, 25, 45, 65t, 83t, 91t, 110t, 113; team coordination/collaboration, 23t, 26, 45, 65t, 83t, 92t, 111t, 114–115; tradeoffs, 23t, 25, 45, 65t, 83t, 111t, 114. See also Outcomes
Scenario-based e-learning instruction. See Instruction
Scenario-based e-learning myth busters: not a game, 10; not a scenario with questions, 10–11; not a simulation, 11–12; not about a delivery mode or media, 12; not about specific technology, 12
Scenario-based multimedia interfaces. See multimedia interfaces
Scenario data. See Case data
