access limitations, 37–38
adjacent tooth damage, 60–61, 80
adrenal diseases, 17
adrenal system, 7
age, 60–61
alveolar bone loss, 85–86. See also pre-prosthetic oral surgery
alveolar osteitis (AO), 51, 79, 283–284
alveolar ridge recontouring, 88
alveolar ridge resorption, 116
alveoplasty, 88–90
American Academy of Orthopaedic Surgeons, 259
American Dental Association, 24, 259
American Society of Anesthesiologists (ASA), 23
anatomic space infections, 242–245. See also orofacial infections
anatomy, 39–41
anemia, 17–18
anesthesia
anxiolysis, 26
benzodiazepines, 29–31
depth, 25–26
discharge and, 32–33
endodontic periradicular
microsurgery and, 188–192, 193
general, 25–26
goals and benefits of, 26
implants and, 117
levels of, 23–24
limitations, 34
mandibular third molar impactions
and, 64–65
minimal, 25
moderate parenteral, 25
monitoring, 31–32
need for, 23
nitrous oxide and oxygen, 26–29
rescue, 33–34
routes of, 24–25
aneurysmal bone cysts (ABCs), 271, 274
ankylosis, 41
antibiotics
administration of, 14, 255
choice of, 251–255
costs of, 254
pharmacology, 256–257
prophylactic, 258–261
resistance to, 252, 253
anxiolysis, 26
aortic regurgitation (AR), 13
aortic stenosis (AS), 13
apical root resection, 203–209
armamentarium, 62, 88, 113, 166, 181–186
arrhythmias, 14
arteriovenous malformations (AVMs), 271, 274, 276
atherosclerosis, 11
asthma, 4, 14–15
avulsion, 227, 231–232
benzodiazepines, 26, 29–31, 33–34
biopsies
brush biopsy, 105–106
excisional biopsy, 107–110
hemostasis, 111–112
instrumentation, 110–111
bisphosphonate-induced osteonecrosis (ONJ), 265–270
bisphosphonate therapy, 21
bleeding. See also hemorrhage; hemostasis
connective tissue autografts and, 163
implants and, 121–122
soft tissue lesions and, 111–112
third molar extractions and, 79–80
bone grafts, 129–132
bone healing, 127–128
bone loss, 85–86
bone necrosis, 51
bone removal, 67–68, 75–76
bone structure, 39, 41–42
bone surgery. See hard tissue surgery
brush biopsies, 105–106
buccal-palatal exostosis, 91–93
buccal plate preservation (BPP), 116, 117
buccal space abscess, 239, 242, 245–246, 248
Caldwell-Luc approach, 132
cancer
brush biopsy, 105–106
clinical judgment and, 105
examination, 104–105
excisional biopsy, 107–110
hemostasis, 111–112
instrumentation, 106–107
patient evaluation, 103–104
capnography, 32
cardiovascular disease, 11–14, 180, 247, 251, 258–261
cardiovascular monitoring, 31–32
cardiovascular system, 3–4
caries, 55, 56, 267
cellulitis, 245
central nervous system, 5–6
cerebrovascular accident (CVA), 5–6, 20
chlorhexidine, 29. See also benzodiazepines
chronic obstructive pulmonary disease (COPD), 4, 15, 28–29
cirrhosis, 19
coaagulation studies, 6
coaagulopathy, 18, 272–276
coomorbidities. See pre-existing conditions
conscussion, 227, 228
cone beam computerized tomography (CBCT), 113, 115
congestive heart failure (CHF), 3–4, 12–13
connective tissue autografts. See also soft tissue surgery
complications, 163
epithelialized palatal grafts, 138–140
free subepithelial connective tissue grafts, 158, 160–162
modified palatal roll technique, 147–149
pouch technique, 147, 150–155
subepithelial grafts, 136–138, 140–147
vascularized interpositional periosteal-connective tissue (VIP-CT) flap, 151, 156–160
Continuum of Depth of Sedation (American Society of Anesthesiologists), 23
coronary artery disease (CAD), 3–4, 11–12
cortical block grafts, 127–128
Coumadin, 18
creeping substitution, 127
crown fracture, 227–228
crown lengthening, 165–167
curette, 200–202
deep spaces of head and neck, 243
dehiscence, 43, 163, 276
dehydration, 250–251
dentigerous cysts, 58–59
dentoalveolar surgery complications
alveolar osteitis, 283–284
displacement, 277–278
fractures, 285–288
hemorrhage, 270–276
nerve injury, 284–285
non-healing wounds, 265–270
oroantral communication, 280–283
swelling and trismus, 276–277
dentoalveolar trauma
avulsion, 231–232
classification, 227
clinical examination, 225–226
concussion, 228
crown fracture, 227
history and examination, 225
immobilization period, 230
postoperative instruction, 233
primary tooth injuries, 232–233
pulpal management, 232
radiographic examination, 226
root fractures, 227–228
soft tissue injury treatment, 227
tooth displacement, 228–229
diabetes, 6–7, 15–16, 103–104, 246, 251. See also immune system compromise
diazepam, 29, 30. See also benzodiazepines
discharge after sedation, 32–33
displacement, 80–81, 226, 228–229, 277–278
distalangular impactions, 71–72, 73
dry socket. See alveolar osteitis
dysrhythmias, 4
endocarditis, 259
derocrine disorders, 15–17
docrine system, 6–7
endodontic periradicular microsurgery anatomical factors, 172–174
anesthesia and hemostasis, 188–192, 193
apical root resection, 203–210
armamentarium, 181–186
