## 1 Nutrition, Genes, and Neuroscience: Implications for Development, Health, and Disease
*Margaret Joy Dauncey*

## 2 Neurochemical Effects of Western Diet Consumption on Human Brain
*Akhlaq A. Farooqui and Tahira Farooqui*

## 3 Effect of Mediterranean Diet on Human Health in Seniors: Relationship with Telomers
*Virginia Boccardi and Giuseppe Paolisso*

## 4 Effect of a Mediterranean Diet on Mental and Physical Quality of Life
*Marialaura Bonaceo, Giovanni de Gaetano, and Licia Iacoviello*

## 5 Ketogenic Diets for the Treatment of Neurologic Disease
*Christa W. Habela and Eric H. Kossoff*

## 6 Levels of n-3 Fatty Acids and their Metabolites in the Brain: Their Impact on Brain Function and Neurological Disorders
*Akhlaq A. Farooqui and Tahira Farooqui*

## 7 Homocysteine Levels in Neurological Disorders
*Ahmed A. Moustafa, Doaa H. Hewedi, Abeer M. Eissa, Dorota Frydecka, and Błażej Misiak*

## 8 Table Salt and Dementia
*Surender R. Neravetla and Shantanu R. Neravetla*
## CONTENTS

9 **Contribution of Diet and Exercise in the Pathogenesis of Major Depression**  
Adrian L. Lopresti  

10 **Role of Diet and Exercise in Diabetic Retinopathy**  
Mohammad Shamsul Ola, Haseeb A. Khan, and Abdullah S. Alhomida  

11 **The Effect of Western Diet on Cognition in Humans**  
Heather M. Francis and Richard J. Stevenson  

12 **Role of Diet and Exercise in Intervention of Age-Induced Impairments**  
Kanti Bhooshan Pandey and Syed Ibrahim Rizvi  

13 **Hormesis and Cognitive Function: An Evolutionary/Adaptive Arabesque Leading to Longevity**  
Alistair V.W. Nunn, Geoffrey W. Guy, and Jimmy D. Bell  

14 **Polyphenols and Cognitive Function**  
Edwin D. Lephart  

15 **Prevention of Dementia Through Modifiable Risk Factors**  
Patsri Srisuwan  

16 **Physical Exercise Improves Cognition in Brain Disorders: Alzheimer’s Disease**  
Trevor Archer and Danilo Garcia  

17 **Molecular, Biochemical, and Physiological Basis of Beneficial Actions of Exercise**  
Undurti N. Das  

18 **Beneficial Effects of Exercise and Cognitive Training on Cognitive Functions in Older Adults: Introduction of Smart Aging Studies**  
Rui Nouchi and Ryuta Kawashima  

19 **Exercise and Cognitive Functions**  
Bijli Nanda and S. Manjunatha  

20 **Role of Sleep in Cognition, Immunity, and Disease and Its Interaction with Exercise**  
Mark R. Zielinski and Dmitry Gerashchenko  

21 **Effect of Forced and Voluntary Exercise on Neural Plasticity Mediated by Astrocytes**  
Caren Bernardi, Mario Roberto Generosi Brauner, and Carlos Alberto Gonçalves  

22 **Effect of Exercise on the Aging Brain**  
Bonita L. Marks  

23 **The Effects of Exercise on Neuronal Survival**  
Michael J. Chen  

24 **Exercise and Cognitive Function in Older Adults**  
Nicola J. Gates and Maria Fiatarone Singh  

25 **Research Issues and Clinical Implications of Exercise Effects in the Treatment of Depressive and Anxiety Disorders**  
A. Garrett Hazelton, Richard Bloch, and Sy Saeed
26 Exercise-Induced Protection Against Aging and Neurodegenerative Diseases: Role of Redox- and Mitochondrial-Based Alterations
   Inês Marques-Aleixo, Estela Santos-Alves, Paula I. Moreira, Paulo J. Oliveira, José Magalhães, and António Ascensão
   309

27 Exercise, Neuroplasticity, and Growth Factors in Adolescence
   Helios Pareja-Galeano, Sara Mayero, and Fabián Sanchis-Gomar
   323

28 Summary, Perspective, and Direction for Future Studies
   Tahira Farooqui and Akhlaq A. Farooqui
   339
