*Foreword*  xi

*Introduction*  xiii

1. **Airway management**  
   - Definition of airway management  1
   - Concept of a stepwise approach  2
   - Basic anatomy of the airway  3
   - Basic airway management manoeuvres  6
   - Basic airway adjuncts  7
   - Advanced airway adjuncts and cricothyroidotomy  16
   - Chapter key points  30
   - References and Further reading  30

2. **Assisted ventilation**  35
   - Definition of assisted ventilation  36
   - Indications for assisted ventilation  37
   - The literature and complications associated with assisted ventilation  39
   - Equipment and procedures for assisted ventilation  42
   - Chapter key points  47
   - References and Further reading  47

3. **Cardiopulmonary resuscitation and basic life support**  49
   - Definitions  50
   - The chain of survival  50
   - Adult basic life support  51
   - Basic life support in pregnancy  58
   - Mechanical chest compression devices  59
   - The recovery position  60
   - Paediatric basic life support  62
   - Newborn life support  67
   - Foreign body airway obstruction (choking)  70
   - Chapter key point  76
   - References and Further reading  76

4. **Defibrillation**  79
   - Definition of defibrillation  80
   - The literature behind defibrillation  80
   - Procedure for defibrillation  84
## 8. History taking and communication

- Definitions 176
- Key communication skills 176
- Communication models 177
- The practitioner–patient relationship 178
- A standardised history framework 178
- Questioning techniques 183
- Consent 184
- Chapter key points 185
- References and Further reading 185

## 9. Documentation and record keeping

- Definitions 188
- Why keep healthcare records? 188
- What constitutes good medical records? 189
- Models of record keeping 190
- Abbreviations 192
- Key documents in record keeping and documentation 192
- The Caldicott Guardian 194
- Electronic patient records 194
- Chapter key points 195
- References and Further reading 195

## 10. Drug administration

- Definitions 198
- Legislation related to paramedic administration of drugs 198
- Drug formulations 199
- Drug documentation 201
- Storage of drugs 201
- Routes of administration 203
- Chapter key points 211
- References and Further reading 211

## 11. Medical gases

- Definition and indications for the use of Entonox 214
- Advantages of Entonox 214
- Contraindications to the use of Entonox 214
- Equipment 216
- Principles of administration of Entonox 216
- Procedure for administering Entonox 217
- Troubleshooting 218
- Definition of oxygen therapy 218
- Indications for use 219
- Cautions and contraindications to the use of oxygen 219
- Equipment 220
- Procedure for administering oxygen 224
- Use of cylinders and cylinder safety 225
- Chapter key points 226
- References and Further reading 227
12. **Infection control** 229
   - Definitions 230
   - Indications for infection control 230
   - Hand hygiene 231
   - Personal protective equipment 232
   - Chapter key points 237
   - References and Further reading 237

13. **Vascular access devices** 239
   - Definition of a vascular access device 240
   - Anatomy of veins 240
   - Peripheral cannulas 241
   - Indications for peripheral cannulation 242
   - Selection of device for peripheral cannulation 242
   - Selection of vein 243
   - Techniques of venodilatation 244
   - Complications of peripheral venous cannulation 245
   - Procedure for peripheral venous cannulation 247
   - Intraosseous infusion 257
   - Anatomy of bones 257
   - Indications for intraosseous access 257
   - Contraindications to intraosseous access 258
   - Equipment for intraosseous access 258
   - Complications of intraosseous access 258
   - Location sites for intraosseous access 258
   - Procedures for intraosseous access 259
   - Chapter key points 266
   - References and Further reading 266

14. **Needle thoracocentesis** 271
   - Definitions 272
   - The literature surrounding needle thoracocentesis 273
   - Equipment 274
   - Indications for use 274
   - Contraindications for use 274
   - Potential problems of use 275
   - Procedures for needle thoracocentesis 275
   - Chapter key points 276
   - References and Further reading 277

15. **Pain assessment and management** 279
   - Definitions 280
   - Acute pain v chronic pain 281
   - Assessing pain 281
   - Assessing pain in cognitively impaired patients 287
   - Overview of pain management techniques 288
   - Chapter key points 290
   - References and Further reading 291
