INDEX

Abandonment, 132, 140
Abortion, 15–16, 25, 140, 237, 291
Acceptance, grieving process, 101, 109–111, 115
Accepting, 264–265
Acculturation, 285–286, 298
Adaptation, 127, 141, 163–164, 333
Addiction, 111
Adherence:
characterized, 155–157, 170
increasing, methods for, 167–169, 171
influential factors, 166–167, 171
learning activities, 171–172
Adjustment, 127, 260
Adolescents:
adolescence defined, 254
cartographics of, 178, 184–185, 192
cognitive development, 255–256, 275
communications skills, 263–266
connecting with, 253, 255, 264–266
counseling session components, 266–272
developmental goals, 264
emotional development, 257–258, 275, 277
identity development/formation, 254, 256–257
learning activities, 257–277
patient-designed counseling session, 262–264, 275
peer support, 257
physical development, 255, 275, 277
pregnancy in, 273–274
social development, 257, 275, 277
stress management, 261–262
transition to adult care, 272–273
Adult-onset disorders, 32, 52–54, 101, 192
Adult screening, decision-making scenarios, 40, 52–55
Advanced maternal age (AMA) pregnancies, 17–18
Advocacy groups, 300–301, 398
Agency:
family-centered genetic counseling, 240
in medical family therapy, 239
Aggression/aggressive behavior, 126, 129, 131, 148
Agitation, 109
AIDS, 111
Allostatic load, 210
Alternation, 208
Alternative medicine, 211–212, 330
Alternative prior risk, 77
Altruism, 336
Alzheimer’s disease, 110–111, 185
Ambiguity effect heuristics, 37
Ambivalence, 159, 213, 241, 246
American Academy of Pediatrics (AAP), Committee on Bioethics, 256
American Association on Intellectual and Developmental Disabilities (AAIDD), 282, 301
American Association on Mental Retardation, 282
American Board of Genetic Counseling (ABGC):
functions of, 2
practice-based competency domains, 66–67, 87–91, 354, 360

Genetic Counseling Practice: Advanced Concepts and Skills, Edited by Bonnie S. LeRoy, Patricia McCarthy Veach, and Dianne M. Bartels
Copyright © 2010 Wiley-Blackwell
American Psychological Association (APA), 358–359
Amniocentesis, 15–16, 18, 24, 35, 41, 81, 183, 212, 290
Analogies, practice applications, 288
Androgen-sensitivity syndrome, 138
Anencephaly, 108, 134
Anger:
defined, 148
in grieving process, 101, 105–107, 127, 132–133, 147
indications of, 156
management, 139, 150–151
parental, 138–139
patient, see Patient anger
stages of, 135
unresolved, 147
Animism, 255
Annoyance, 195
Antecedent-focused regulation, 131
Anthropological stance, 216
Anticipatory guidance, 90, 96, 114, 146–147
Anxiety, 70, 126, 128, 130, 138, 157, 161, 167–168, 175, 187–188, 195, 260, 332
APGAR, 274
Apologies, 128, 135, 137, 147, 218
Appraisals, 312
A priori risk, 76–77, 79, 85
Artificialism, 255
Art therapy, 270
Ashkenazi carrier screening, 71
Assent, AAP requirements, 256
Assertive behavior, 126
Assimilation, 227, 333
Assisted reproductive technologies (ARTs), 17–19
Attachment:
early crisis counseling, 127
grieving process and, 115–116
theory, 309, 312
Attending skills, 214–215, 265–266
Attention-deficit hyperactivity disorder (ADHD), 47
Attitude:
cultural diversity and, 202–203
family systems, 237, 242–243, 248–249
Audio dharma, U.S. centers web sites, 351–352
Audio journaling, 373
Australasian Society of Genetic Counselors, 15
Autism, 111, 283, 285
Autonomy:
in children and adolescents, 254
cultural differences, 19–20, 22
defined, 14–15
genetic counseling techniques and, 22–23
importance of, 19, 22, 168, 170, 178, 214, 240,
254, 288–290
learning activities, 23–27
limitations of, 22
locus of control, 228
practice recommendations, 23
resistance and, 162, 171
revocation of, 16
six critiques of, 15–22
social influences, 13–14
socioeconomic status and, 16–17
Autosomal dominant disorders, 41
Autosomal recessive metabolic conditions, 128
Availability heuristics, 37, 69
Avoidance, 103, 126, 167
Awareness:
contact with irresolvable conflict stage, 220
cultural competence, 220–222
cultural diversity issues, 202–203
developmental stages, 219–222
mindfulness-based stress reduction (MBSR), 331
precontact stage of, 219–220
Ayurvedic medicine, 211
Background risk, 66, 76, 78
Balance:
empathic strain vs. empathic attunement, 328
stress reduction strategy, 332–333
Bargaining, in grieving process, 101, 107
Base rate neglect, 78
Bayesian reasoning:
common errors in, 78
defined, 76
risk communication skills, 79–83
Behavioral heuristics, 57
Belief system:
cultural diversity and, 202–203
family systems/family therapy, 237, 242–243, 248–249
impact of, 134, 158–159, 183–184
Benchmarks, 137
Beneficence, 203, 325
Bereavement, defined, 96. See also Grief/grieving process
Best practice, 51–52, 273
Bias(es):
cultural, 203
framing, 56
heuristics and, 69
types of, 38
Bicultural competence, 208
Biculturalism, 208, 227
Bicultural negotiation, 227
Bigotry, 217–218
Biomedical model of health/illness, 202, 211, 219, 222
Birth defects, 127
Blame/blaming behavior, 119, 128, 134, 292.
See also Self-blame
Body language, 71, 136, 140, 266
Boredom, 191
Boundary issues, 187–188
Brainstorming, 247, 262
Brain tumor, 51
BRCA/BRCA1 gene, 21–22, 25–26, 77–78, 138, 150, 249, 300
Breast cancer, 71, 76–78, 80. See also BRCA/BRCA1 gene
Breathing exercises, 337, 339–341
Broaden-and-build theory, 327
Brooding, 126, 129–130
Buddhist psychology, 309, 313, 319, 328
Burnout/burnout syndrome:
case study, 310
prevalence of, 320–321
prevention strategies, 329–330
reduction strategies, 341
sources of, 117, 312, 314–315, 319
Cancer, see specific types of cancers
 genetics, 22, 217, 240–241
risk counseling, 192
screening tests, 16, 166–167
Career development, 358. See also Professional development
Caregiver distress, 337–338
Caregivers, burnout and, 320
Caseloads, 321
Case management skills, 89
Centering, 284
CGG repeats, 42
CGH microarray analysis, 46
Change, in reflection process, 356, 364, 372
Child abuse, 267
Childhood stages, 254
Children:
chronic illness and, 260–261
cognitive development, 255–256, 275
communication skills, 263–264, 266
connecting with, 253, 255, 264–266
counseling session components, 266–272
countertransference issues, 184–185
developmental goals, 254
emotional development, 257, 275
learning activities, 275–277
physical development, 254, 275
self-esteem, 256–257
social development, 257, 275
stress management, 261–262
Chromosomal abnormalities, 17
Chromosome imbalance, 245–246
Chronic grief, 112
Clefting syndromes. See Ectrodactyly (EEC), 41
Cleft lip, 41–42, 286
Client-centered therapy, 309
Clinical depression, signs of, 108–109
Cognitive-behavioral therapy, 309
Cognitive development, 358
Cognitive function, 6
Cognitive impairment, 282, 286
Cognitive reappraisal, 126, 131–132, 145, 151
Cognitive theories, 259–260
Collectivism, 212–213, 228
Colorblindness, 222
Communal coping, 333–336
Communication skills:
anger expression, 126–127
body language, 71, 136, 140, 266
development of, 35
language barriers, 165
in leaders, 391, 393, 395
risk communications, 66, 79–83, 88–89
tools, methods, roles, and processes, 38–39
tone of voice guidelines, 71, 136
working with children and adolescents, 267–268, 275
Communication style, 315
Communion, in medical family therapy, 239
Community, with patients, 335–336
Comorbidty, 285
Compassion fatigue:
avoidance of, 361, 366–367
case study, 310
empathy and, 319
impact of, 117, 310, 314
prevalence of, 320
ruminations, 368
symptoms of, 367–368
training about, 367
Competence:
importance of, 144, 168, 180
leadership and, 389–390
patient, 170
Competency, in patients, 170, 289
Complementary and alternative medicine, 330
Compliance, 156. See also Adherence
Concentration:
  cultivation strategies, 349–350
  lack of, 108
  skills, 330
Conceptual skills, 391
Concreteness, 284
Concrete operations, 284
Concrete thinking, 255
Conditional probability, 78
Confidentiality, 89–90, 267, 288–289
Confirmation bias, 38
Confirmatory genetic testing, 51
Conflict:
  avoidance, 159
  impact of, 165
  in grieving process, 119–120
  irresolvable, 220
  management, 130, 136
  resolution, 23, 260
Confounding, 35, 52
Confusion, 157
Congenital adrenal hyperplasia (CAH), 262
Congruence, 264
Consent, autonomy and, 14. See also Informed consent
Conservatism, 78
Control, loss of, 140. See also Locus of control
Cooling-off period, 135, 137
COPE, 321
Coping:
  defined, 313
  mechanisms, 159
  models, 90
  nonproductive, 261
  skills, importance of, 115, 129, 132, 134, 164, 216, 237, 261
  strategies, see Coping strategies
  styles, 85, 100, 104, 131
Coping strategies:
  community refuge, 332–336
  competence and confidence, development of, 328–332
  false vs. true refuges from stress, 323–325, 340
  importance of, 3, 5, 70
  physical well-being, 327–328, 336
  resilience and, 326–327
  self-empathy, 325–326
  self-realization, 325
Counseling skills:
  assessment, 67, 90–91
  characterized, 19–20, 23
Counselor-patient relationship. See Patient-counselor relationship
Countertransference:
  addressing, methods of, 191–194
  compassion fatigue and, 314
  consequences of, 185–191
  contemporary issues, 180
  defined, 176
  developmental life processes, 178
  diversity issues, 203
  emotional, 335
  empathy and, 319
  example of, 176–177
  family dynamics, 177–178
  human variation, 179
  influential factors, 180–185
  learning activities, 195–196
  life vulnerabilities, 178–179
  process overview, 177–181

Critical incident exercise, 373–374
Critical-thinking skills, 67, 89–90, 395
Cross-cultural medicine, 217–218
Cultural competence:
  awareness, 202–203, 219–222
  benefits of, 204–205, 222
  challenges of, 220
  characterized, 6, 203–204, 212–213, 219, 222–224
  defined, 202, 227
  genetic counselor roles, 214–215
  knowledge and, 202, 204–212, 221–222
  language barriers, 201–202
  learning activities, 224–226
  political correctness distinguished from, 204
  resistance and, 203, 222–223
  significance of, 201–202
  skills, see Cultural competence skills
  terminology, 203, 227–228
  training in, 209, 218, 220, 222–224
Cultural competence skills:
  application mistakes, 217–219
INDEX 405

defined, 202–203
explanatory models, 202, 211, 216–218
investigation and, 216
observations, 216
types of, 213–215
Cultural differences:
anger, 126, 132, 140
autonomy issues, 19–20, 22
grieving process, 117–118
patient autonomy, 19
resistance, 159, 165–166
risk communications, 73–74
Cultural diversity. See Cultural competence;
Cultural competence skills
Cultural encapsulation, 219
Cultural environment, significance of, 167, 170
Culture, see Cultural competence;
Ethnicity; Race
defined, 204–205, 227
impact on genetic counseling, 211–212
nature of, 205
types of, 205
CVS, 43–44
Cystic fibrosis (CF), 82, 260–261, 275–276
Death/dying, see Grief/grieving process
ethnocultural beliefs/practices, 118
loss of child, 99, 101, 106–107, 118, 127, 134
reading recommendations, 278–279
suicide, 109, 118, 185, 267
thoughts of, 109
Decision-making process:
autonomous, 15–16
children and, 256
communication process, 33–35
complexity of, 36
components of, 60
cultural diversity in, 212–213
cultural issues, 202
deliberative, 33–34
difficulties in, 241–242
evidence, 39
by genetic counselors, 20–21, 39–40, 214
heuristics, 37–38, 69
historical perspectives, 32–33
influential factors, 33, 168
intellectually disabled patients, 287, 289–292
learning activities, 56–60
motivation, 35–36, 50
patient autonomy and, 19
quantitative risk information, 76
reasoning and, 21, 34
resistance and, 159
risk communication and, 66, 83
scenarios, 40–55
shared, see Shared decision making (SDM)
traditional, 32
Defense mechanisms, 159–160, 180, 216. See also Psychological defenses
Deferral, 104,160, 164, 169, 171
Degenerative disease, 237
Delayed grief, 112
Deletion syndrome, 22111.2, 285, 292–298
Deliberative shared decision-making platform,

Sexual behavior, 106, 109, 267
Shame, 158–159, 162, 177
Shared decision making (SDM), 23, 33–35, 42
Shared language, 265
Shock, 127
Sickle-cell disease, 71–72, 169
Single-event probability, 81
Six Hats exercise, 57–59
Sleep disturbance, 108, 367, 327–328
Slow learner, defined, 286
Smoking behavior, 267
Social adjustment, 260
Social development, 358
Social environment, significance of, 159, 167, 170
Social history, 88–89
Social justice, 210
Social milieu, 158–159
Social networks, 333
Social network theory, 319
Social support, 261, 333–335
Social withdrawal, 115–116
Society for Adolescent Medicine, 272
Socioeconomic status, impact of, 16–17, 73, 133
Somatic symptoms, 260
Special needs, 282
Spiritual anger, 128, 134, 146
Spiritual distress, 134
Spirituality, 134, 138. See also Religiosity
Spiritual support, 261
Stagnation, 358–359, 361
Standard of care, 32
Stereotypes/stereotyping, 19, 183, 192, 202–203, 205, 207, 226
Sterilization, voluntary, 16
Stigmatization, 281, 301
Stress, impact of, 117, 119, 157, 161. See also Professional stress
Stressor, defined, 313
Stress reduction strategies: learning activity, 341
literature review, 352
overview of, 331–332
Strong back-soft front meditation, 339–340
Substance abuse, 16–17, 115, 267
Suffering: defined, 313
empathic, 319
exposure to, 314
Suicide/suicidal behavior, 109, 118, 185, 267
Supervision: clinical, 334–335
peer, 333–334, 370, 373
types of, generally, 194
Supervisory positions, 388, 393–394
Support groups, 90, 103, 111, 114, 147–148, 262
Supportive leadership, 385
Suppression, 131
Systems thinking, 319
Task facilitation skills, 391, 393
Tay-Sachs disease, 71
Teens in Therapy (Bromfield), 265
Terminating pregnancy. See Abortion;
Pregnancy, termination of
Therapeutic relationship. See Patient-counselor relationship
Thought-stopping, 115
Threatening behavior, 137
Time management skills, 329–330
Time warp concept, 255
Tracking skills, 269, 277
Traditional Chinese medicine, 211
Transference, 150–151, 214. See also Countertransference
Transition coordinators, 273
Transtheoretical model, 167
Traumatic brain injury, 111
Traumatic recollection/memories, 315, 321
Triplet births, 17
Trisomy, 18, 70, 107–108
Trisomy 21, 31
Trust:
in genetic counselor-patient relationship, 34, 39, 74, 161, 165–167, 264
mistrust, 184, 215, 218
reestablishment of, 135
Tuberous sclerosis (TS), 51–52
Tuberous Sclerosis Alliance, 301
Twin births, 17
Ultrasound screening, 16, 41–42
Unconditional positive regard, 258
U.S. Preventive Services Task Force, 34
U.S.Army “Be, Know, Do” (BKD) leadership development model, 391–392
Validation, 39, 102, 246
Value system, 67, 91, 158–159, 184
Velocardiofacial syndrome, 138–139
Verbal attack, 126, 135
Very long chain fatty acids, 46
Vicarious traumatization, 314
Vision creation, 390
Vulnerability, 70–71, 100, 179, 209, 317
