Page numbers in italics refer to figure captions. Page numbers in bold refer to tables.

### 2D GE images issues two-dimensional gradient echo images
1. 3.0 T MRI, 55, 56–8, 59

### 3D GE images issues three-dimensional gradient echo images

- abdominal distension, 189
- abdominal enlargement, 185
- abdominal mass, 190
- abdominal pain, 83, 122, 184, 241
- abdominal wall, 209, 210
- ablation, 140, 160, 285, 294, 296, 297, 298, 299
- ablative therapy see ablation
- ABLE see arterial-phase bolus-track liver examination
- abscess cavity, 202
- abscesses, 33, 40, 43, 44, 76, 81, 91–6, 155, 155, 197, 201–5, 213, 267, 270, 287, 288, 294
- anemic, 91, 92, 201–3
- appendical, 30
- bacterial, 92, 155, 203
- completely treated 204–5, 210
- distinguishing from metastasis, 204, 205
- focal, 215
- fungal, 91, 92, 201–3, 204, 208, 210, 211
- hepatic, 91
- multifocal, 207
- partially treated, 204
- prostatic, 91, 92, 93, 201–3, 205, 207, 209, 211
- subcapsular, 202, 208
- untreated, 204
- acalculous cholecystitis, 216
- acquired immunodeficiency syndrome (AIDS), 203, 216
- acquisition methods, 55
- acquisition time, 31
- actinomycetes, 132
- active bleeding, 303
- acute calculous cholecystitis, 271
- acute hemorrhage, 303
- acute hepatic encephalopathy, 278
- acute hepatitis, 39, 42, 214, 224, 229, 232, 261, 263
- acute-on-chronic hepatitis, 37, 178, 267
- acute portal vein thrombosis 272–3, 274, 277
- acute radiation hepatitis, 263
- acute radiation injury, 266
- acute toxic hepatitis, 261, 263
- acute toxicity, 64, 65, 261, 263
- acute viral hepatitis, 212–13
- adenocarcinomas
  - biliary, 83
  - colon, 137, 138, 139, 141, 142, 143, 145, 153, 157
  - mimicked by lymphoma, 181
- mucinous, 137, 140
- ovarian, 137
- pancreatic, 22, 139, 143, 144, 147
- small bowel, 143
- adenomas 20, 33, 34, 39, 40, 43–4, 47, 96, 119, 120, 123–6, 128, 130, 155, 158, 161, 164, 242
- adenomatosis 123–6, 129
- adenosopathy, 178
- adiabatic pulses, 30, 33
- ADKFD see autosomal dominant polyzystic kidney disease
- adrenal gland, 175, 178
- adrenals, 57
- AFP see alpha-fetoprotein
- AH see autoimmune hepatitis
- AIDS see acquired immunodeficiency syndrome
- air–contrast interfaces, 303
- alcohol consumption, 161, 193, 241, 242
- alcoholic hepatitis, 219, 239
- alcoholic liver disease, 241
- allergies, 63–5
- allergy-like acute adverse reactions, 63–4
- alpha-1-antitrypsin deficiency, 219, 220, 263, 264
- alpha fetoprotein (AFP), 173, 175, 185, 186
- anemic abscesses, 91, 92, 201–3
- amelanotic carcinoids, 148
- American Association for the Surgery of Trauma, 303
- American College of Radiology, 69
- amiodarone, 249
- amylase of celiac, 7, 13
- amyloidosis, 279
- anabolic steroids, 122, 128
- anaplastic reactions, 63, 65
- anaplasm, 209
- anastomotic lines, 289
- anasarca, 39
- anatomy
  - cross-sectional, 1–13
  - functional, 1–13
  - morphological, 1
  - segmental, 1
- androgenic anabolic steroids, 128
- anemias, 254
- anergy, 117, 273, 282, 284
- angiography, 68
- angionema, 20, 22, 23, 24, 128, 131
- angiosarcoma, 185, 190, 191
- anterior pituitary, 249
- antishock therapy, 303
- antibiotics, 51
- anthistamines, 64
- antineural antibodies, 257
- antistomach mucosa antibody, 257
- aorta, 36, 37, 38
- aplasia 4, 7
- appendical abscess, 30
- arsine, 128, 190
- arterial compromise, 53
- arterial enhancement, 128
- arterial malformation, 113
- arterial–venous shunt, 274, 267, 269
- arteriosclerotic shunts, 186, 189
- artifacts, 15
- beam hardening, 303
- bounce–point boundary, 25, 27
- chemical shift, 20, 30, 36, 58
- conductivity, 56, 58
- Indian ink, 20
- motion, 17, 22, 26, 30, 162, 263, 188
- phase–cancellation, 20, 22, 23
- respiratory (breathing), 27, 97
- standing wave, 56, 58
- streak, 303
- susceptibility, 24, 27, 30, 52, 56, 61, 248
- Ascaris lumbricoides, 215
- ascending cholangitis, 39, 42, 43, 44, 53, 201, 214, 215, 216, 274, 289
- ascites, 18, 18, 31, 56, 262, 213, 229, 250, 251, 263, 269, 274, 278, 279, 283
- aspergillus, 203
- asthma, 63
- atelectasis, 150
- atrophy, 193, 215, 255, 258, 259, 258, 261, 262, 266, 277, 290
- autoimmune hepatitis (AIH), 219, 224, 227, 239, 255, 257, 258, 259, 260
- autonomic nerve damage, 216
- autosomal dominant polycystic kidney disease (ADPKD), 77, 81–3
- avascular metastases, 140, 148
- bacterial abscesses, 203
- bacterial actin cholangitis, 213, 215
- Bacteroides, 201
- bandwidth, 55
- beading, 216, 224, 255
- beam–hardening artifact, 303
- bear claw pattern, 301
- Beckwith–Wiedemann syndrome, 185
- BEIR see biological effects of ionizing radiation report
- benign developmental hepatic cysts, 73–82
- benign solid liver lesions, 101–3
- berry aneurysms, 117
- bile, 96, 213, 297
- impusated, 257
- leaks, 284, 288
- bile ducts, 2, 3, 6, 42, 44, 47, 53, 79, 82, 122, 194, 211–17, 224, 226, 234, 256, 258, 259, 262, 282, 301
colorectal cancer, 270

colorectal carcinoma, 137

combined extracellular and hepatocyte-specific agents, 47

colonic bile duct, 12, 13, 18, 31, 47, 86, 92, 195, 213, 214, 216, 274, 285, 289

common hepatic bifurcation, 199

common hepatic duct, 12, 13, 194, 198

complex cysts, 74, 76, 77, 80

composite tissue allotransplantation (CTA), 285

compression, 39, 254

computed tomography (CT) (computerized tomography)

ablative therapies on, 294

abscesses on, 91, 203

active bleeding on, 303

angiosarcoma on, 190

as main cross-sectional imaging technique, 15

autoimmune hepatitis on, 259

benign developmental hepatic cysts on, 73, 74

biliary cystadenoma/cystadenocarcinoma on, 83, 85

biliary hamartomas on, 79

bilmomas on, 96

bland thrombosis on, 273

Caroli disease on, 81–2

ciliated hepatic forerugging cysts on, 77

comparisons with MRI, 39, 170, 175, 232

current-generation multidetector, 56

dysplastic nodules on, 231

enhancement of metastases on, 137, 139

epitheloid hemangiendotheloma on, 184

extramedullary hematopoiesis on, 182

fatty liver disease on, 241

fibrosis on, 221

focal nodular hyperplasia (FNH) on, 117–18

for assessment of IVC, 285

fungal abscesses on, 203–4

hemangomas on, 101–13

hematomas on, 96

hemoperitoneum on, 303

hepatic iron overload on, 249

hepatic veno-occlusive disease, 278, 280

hepatoblastoma on, 185

hepatocellular adenomas on, 122

hepatocellular carcinoma on, 161

HIV-related cholangitis on, 216

hydrated cysts on, 88, 210

imaging techniques, 58, 60–61

infantile hemangiendotheloma on, 189

inflammatory myofibroblastic tumor on, 132

liver trauma on, 301, 303

lymphoma on, 181

mass-forming intrahepatic cholangiocarcinoma on, 193

mesenchymal hamartoma on, 190

multiple myeloma on, 181–2

multislice scanners, 63

peliosis hepatis on, 128

peribiliary cysts on, 79

portal hypertension on, 229

primary sclerosing cholangitis on, 257

pseudocysts/ fluid collections on, 96

pyogenic abscesses on, 201

regenerative nodules on, 229

safety, 63–71

sarcoidosis on, 261

spatial resolution, 15

temporary resolution, 15

transient increased hepatic enhancement on, 267

dundifferentiated sarcoma on, 190

vascular malformations on, 284

computerized tomography see computed tomography

conductivity artifacts 56, 58

confluent fibrosis, 40, 42, 221, 224, 225

congenital disease, 284

congestive heart failure, 186, 189

cosinophilic, 17, 19

contraceptives, 121, 122, 128, 155

donor agents, 47

double target appearance, 201

dots, 74, 76, 77, 80

differential diagnosis

abscesses, 92, 96, 155, 205

adenomas, 128

angiomylipoma/lipoma, 128

angiosarcoma, 190

benign developmental hepatic cysts, 76

biliary cystadenoma/ cystadenocarcinoma, 87–8

biliary hamartomas, 79

biloma, 96

chemotherapy-treated metastases, 155

cholangiocarcinoma, 160

ciliated hepatic forerugging cysts, 77

epitheloid hemangiendotheloma, 184

extramedullary hematopoiesis, 182

focal nodular hyperplasia (FNH), 118, 121, 155, 179

hemangioma, 110, 155

hematomas, 96

hepatoblastoma, 186

hepatocellular adenomas, 122, 155

hepatocellular carcinoma (HCCs), 128, 155, 179

high grade dysplastic nodules, 155

hydatid cysts, 91

hypervascular metastases, 155, 160

infantile hemangiendotheloma, 189

inflammatory cystic lesions, 76

inflammatory myofibroblastic tumor, 135

intraductal polyoid cholangiocarcinoma, 199

liver metastases, 155

lymphoma, 181

mass-forming intrahepatic cholangiocarcinoma, 193

mesenchymal hamartoma, 190

multifocal fat deposition, 246

multiple myeloma, 182

periductal infiltrating cholangiocarcinoma, 199

primary sclerosing cholangitis pseudocyst/ fluid collections, 96

rejection, 288

vascular shunts/anomalies, 155

diffuse fat deposition, 241–3

244, 245, 246

diffuse fatty infiltration, 244

diffuse fatty liver, 247

diffuse hepatocellular carcinoma, 176

diffuse lesions, 33, 189

diffusion imaging, 55

disease conspicuity, 15

Dixon method 21, 244

DNs see dysplastic nodules

Dotarem 48, 66

double target appearance, 201

drug interactions, 63

drug toxicity, 288

dual phase study, 61

ductal dilatation, 159, 197, 198, 199, 211, 213, 215, 217

duct of Wirsung see pancreatic duct

duodenum, 13, 213

dynamic MRI imaging, 33

dysplasia, 231

dysplastic cells, 161

dysplastic nodules (DNs) 37, 121, 155, 161, 173, 175, 231, 236, 237, 238, 239, 276

early hepatic arterial phase (EHAP), 35–9
early hepatic venous phase 33, 39, 43, 47, 53 (continued)
early hepatic venous phase 33, 39, 43, 47, 53 early subacute hemorrhage, 303
Echinococcus granulatus, 88, 205, 207
Echinococcus multilocularis, 88, 205, 207, 211
Echinococcus tapeworm, 205
echo-planar imaging, 33
echo time (TE), 20, 21, 22, 23, 24, 52, 55, 241
echo-train spin-echo (ETSE) images 26, 34, 52, 54
edema, 159, 201, 203, 214, 224, 229, 247, 248, 265, 266, 271, 278, 285, 289
focal, 212
laryngeal, 63
mesenteric, 221
portal, 212
circular, 204
