Volcanic crystals, 383–87
Volcanic eruptions
(U-Th)/He dating of, 354–55
precise dates of, 353–55
Volcanic flows, 404f
Volcanic rock disequilibrium, 381f, 380–83
Volcanic rocks, 388f, 378–79
Volcanic systems, 200f, 199–200
Volpe, A. M., 383–84
Von Weizsacker, C. F., 20, 232
W. See Tungsten
$^{182}$W/$^{184}$W ratio, 432f
Wagner, G. A., 272
Walcott, Charles, 6f, 5–6
Walker, R. J., 155
Walker, R. M., 273–74
Wallrock samples, 97f
Wanke, H., 234
Wasatch Front, 284f, 281–84
Wasserburg, G. J., 180
Wassuk Mountains, 348f
Watson, E. B., 341, 207, 325–26
Waveforms, with isotherms, 109f
Wave lengths, 117f
Weathering, 410f
Weighted least squares, 76, 77f
Weighted-least squares regression, 77, 78f
Weighted mean, 75f, 75–76
Welch–Satterthwaite formula, 75
Wendt, L., 79
Wet-chemical techniques, 45
Wertherill concordia diagrams, 179f
Whole number rule, 46
Whole rock, 241
Whole-rock analysis, 62
Wien, Wilhelm, 45
Willey Table, 40
Willett, S. D., 111, 115f, 112f
Williams, H. S., 6
Williams, I. S., 192, 192f
W isotopic composition, 434f
Wolf, R. A., 320, 294
Wolf’s thermal history, 322f
Wood, A., 232
Wotzlaw, J.-F., 250
Xenon (Xe), 24, 434, 422
Xenon isotopes, 436f, 422f, 434f–35f
Xenotime, 182
Yamada, R., 280, 281f
Yellowstone carbonates, 386f, 385–87
York, D., 78–79
York regression, 77–79
