INDEX

A
Ad hoc mail surveys, 93
After-only with control group design, 162
Allowable sampling error, 276
Analyses, 76–77
Analysis of variance (ANOVA), 315, 345
Appendices, research reports, 364
Applied research, 7
Attitude measurement scales
constant sum scales, 193, 194
graphic rating scales, 189
itemized rating scales, 189–192
Likert scales, 196–197
net promoter score, 200–201
paired comparisons, 193, 194
purchase-intent scales, 197–198
rank-order scales, 192–193
semantic differential scales, 194–195
Stapel scales, 195–196
traditional one-stage format, 189
two-stage format, 192

B
Background, research reports, 364, 367
Balanced scale, 201
Basic research, 7
BBDO Worldwide, 78
Before and after with control group design, 162
Behavioral targeting, 45
Behavioral tracking, 142, 147
Big data analytics
automated decision making, 48
breakthrough, 46–47
broader insights, 46
credit card transactions, 48
data visualization, 48
deep insights, 45
making big data actionable, 48
privacy, 48–52
relationships, defining, 46
Big Data and Hadoop, 351–353
Binary opposition, 130
Bivariate regression analysis, 333

C
California's Notice of Security Breach Law, 51
Callback procedures, 113
Call center telephone interviews, 91
Cartoon tests, 77, 78
Case analysis, 17
Causal research, 152
appropriate time order of occurrence, 153
concomitant variation, 153
elimination of other possible causal factors, 153
Causal studies, 22
Causation, regression analysis, 339
Census, 243, 261
Central limit theorem, 267
Chance variation, 84
The Children's Online Privacy Protection Act (COPPA), 51
Clarity in wording, 223
Classification, predictive analytics, 353–354
Clear wording, 223–224
Closed-ended question, 221
Closed online panel recruitment, 117
Cluster analysis
based on two variables, 342–343
definition, 342
procedures, 342–343
Clustering, predictive analytics, 353
Cluster sampling, 256–258
Coding process
automated coding systems and text processing, 296
closed-ended and precoded questions, 294
open-ended questions, 294–296
Semantria text analytics, 297
Coefficient of correlation, 333
Coefficient of determination, 336
Collinearity, 338
Commercial online panels, 116
closed online panel recruitment, 117
open online panel recruitment, 116
panel management, 118
panel recruitment, 116
respondent participation, 117–118
Comparative scales, 192
Computer-assisted telephone interviews (CATI), 91,
103, 213, 290
Conclusions, research reports, 364
Concomitant variation, 22
Concurrent validity, 186
Confidence interval, 274
Confidence level, 274
Conjoint analysis
  considering features conjointly, 348–349
  definition, 347
  estimating utilities, 349, 350
  example of, 347–348
  simulating buyer choice, 349–352
Constant sum scales, 193
Constitutive definition, 177
Constructs, 177
Construct validity, 187
Consumer drawings, 78
Consumer orientation, 2
Contamination, 160
Content validity, 186
Convenience samples, 259
Convergent validity, 187
Conversion, 143
Copia, 143
Correlation analysis
  bivariate regression analysis, 333
  example of, 333–334
  for metric data, 333
Cost management, 378
Cost per impression, 143
Cost per impression (CPM), 143
Council for Marketing and Opinion Research (CMOR), 227
Counterbiasing statements, 225
Criterion-related validity, 186
Cross tabulations, 302–304
Customer care research (CCR), 74
Customer satisfaction, 4–5

D
Data
  graphic representations, 304–306
  intelligent systems, 298
  logical cleaning, 299
  process, 298
  scanning, 299
Data analysis
  coding, 294–296
  descriptive statistics, 306–309
  editing, 290, 294
  evaluating differences and changes, 309–310
  hypothesis testing, 312–317
  procedure, overview, 289
  \( p \) values, 317
  sample \( t \)-test output, 318
  statistical significance, 310
  tabulation and statistical analysis, 300–304
  validation, 289–290
Data mining, 44
Data quality management, 376–377
Data scientist, 331–332
Data visualization, 48
Decision support systems (DSS), 53–54
Degree of price sensitivity, 188
Delphi method, 75
Dependent variable, 22
Descriptive function, 4
Descriptive statistics
  measures of central tendency, 306–307
  measures of dispersion, 308–309
  percentages and statistical tests, 309
Descriptive studies, 21
Design control, 157
Diagnostic function, 4
Dichotomous questions, 221
Digital media, 6
Discriminant validity, 187
Discussion guide, focus groups, 65, 66
Disguised observation, 127
Disproportional allocation, 256
Door-to-door interviews, 88
Double-barreled question, 224
Dummy variables, 337
DuPont, 79

E
Editing, 213
  open-ended questions, 294
  quality of responses, 294
  sample questionnaire, 290–293
  skip pattern, 294
Electrodermal response. See Electroencephalograph (EEG)
Electroencephalograph (EEG), 136
Ensemble, 87
Equivalent form reliability, 184
Error-checking routines, 299
Estimation, predictive analytics, 353
Ethnographic research, 129. See also Human observation
  advantages, 129–130
  conducting, 130–132
  ethnography and focus groups, 134
Ethnographists, 130
Evaluative research, 7
Executive interviews, 89
Executive summary, research reports, 364
Experience surveys, 17
Experiment, 152
Experimental designs, 158
  after-only with control group design, 162
  before and after with control group design, 162
  one-group pretest-posttest design, 160
  one-shot case study design, 160
  quasi-experiments, 162, 163
  selected, 160–163
  true experimental designs, 161–162
Experimental effect, 159
Experimental notation, 154–155
Experimental research
  contamination, 160
  costs, 159
  implementation problems, 159–160
  security issues, 159
Experimental setting
  field experiments, 154
